3	Text Assistant	Proofread	de_DE	https://task-viewer.scilliance.com/?stepId=64751900-9d34-4c09-80c2-eac577abb130&uowIds=c86b7d49-06d2-5890-9341-575dacba4aad	It seems graders are evaluating better sounding rewrites higher but the output should not be rewritten. Poor phrasing and such should not be a criteria for graders.	Grader quality issue	L&D Feedback: "For Proofread, responses should not paraphrase, edit, or adjust the style of the original input text but should focus on grammatical corrections or simply repeat the input." SAA Feedback: After checking the different comments and grading criteria of the AAs, it is visible that there is a major confusion with the purpose of the project Proofreading, which has been confused by Rewriting by some AAs. This leads the AAs to grade rewritten responses/outputs as better or much better, whereas the "only corrected" text that has not been rewritten would be more Satisfying for the user. See in this example, Response A is rewritten and was graded as Satisfying and Much Better than B, whereas B is not rewritten, only corrected and was penalised in all dimensions.
4	Text Assistant	Proofread	it_IT	https://task-viewer.scilliance.com/?workspaces=IZ8LNC&stepId=64751900-9d34-4c09-80c2-eac577abb130&uowIds=d3bb05fb-b119-5397-9bbd-ae9c59455ba4 https://task-viewer.scilliance.com/?workspaces=IZ8LNC&stepId=64751900-9d34-4c09-80c2-eac577abb130&uowIds=e5c4e096-6386-5035-aae7-5357d2c23adc https://task-viewer.scilliance.com/?workspaces=IZ8LNC&stepId=64751900-9d34-4c09-80c2-eac577abb130&uowIds=ef885745-3d0c-575b-8b4f-de7a1cae8f28	It seems graders are evaluating better sounding rewrites higher but the output should not be rewritten. If any of the models introduces edits that do not fix objective mistakes, the response should be graded as partially following instructions. In particular, even if the source prompt includes factually incorrect information, the response should "not" correct the factuality of the source. Moreover, note that rewrites that change the style of the source prompt should also be marked as partially following instructions; this includes "sanitizing" regionalism by replacing them with standard Italian.	Grader quality issue	SAA feedback: the purpose of "following instructions" it is not clear to analysts. In the links provided, they have a tendency to makr as "fully following" those responses in which a prompt is rewritten with a better grammatical structure rather than factual mistakes. For examples, in tasks with scientific prompts, they tend to grade higher those responses that *correct* the scientific facts, misinterpreting the goal of "proofreading". The point that seems clearer to AAs is that, if the prompt doesn't contain major mistakes and the response simply rewrites the original text with no modifications, that is to be considered fully following. In their defense, the "Following Instructions" section of the guidelines should be more direct and specific on what's the goal of the project. The addiction of the examples surely helps, but an expansion of the definition of that dimension could be of further benefit. Also, the definition of "fully, partially and not" following instructions in the UI are very vague and do not give much insight on what is expected from the project.
5	Text Assistant	Proofread	ja_JP	https://task-viewer.scilliance.com/?workspaces=IZ8LNC&stepId=07409016-6f6e-4eb5-8c01-e8d50c52d4b5&uowIds=5b9a583a-e60d-5199-9ad3-45ff642a0543	It appears that graders prefer rewriting rather than simple proofreading for Japanese. Our team has observed that graders tend to assign lower satisfaction scores to texts that do not require any changes. However, if there are no grammatical errors in the input sentence and therefore no need for proofreading, returning the original input should still be graded as "fully following" the instruction with 100% satisfaction.	Grader quality issue	Response A repeats the original text, and we agree that Fully Following should have been selected as the response contains no modifications made. However, please note that the input text and the response contain a minor grammatical error as they lack a particle in part of the sentence: "...カスタマイズさせて..." should be "...カスタマイズをさせて... That said, we assume that graders incorrectly chose Not Following as no corrections were made to the text. Therefore, the Composition rate should be lowered from Good to Bad for that same reason.
6	Text Assistant	Proofread	zh_CN	https://task-viewer.scilliance.com/?workspaces=IZ8LNC&stepId=07409016-6f6e-4eb5-8c01-e8d50c52d4b5&uowIds=f65b459f-cdac-560e-a345-b6f9552aafc4 https://task-viewer.scilliance.com/?workspaces=IZ8LNC&stepId=07409016-6f6e-4eb5-8c01-e8d50c52d4b5&uowIds=fccf42ba-bc0b-59d4-8c37-f5de5a2261d2	Same feedback as the above feedback (the cell I5) found in zh_CN as well.	Grader quality issue	We agree with customer feedback. Both links here have no grammartical issue and there is no need to change anything, therefore can be graded as Fully Following and Highly Satisfying.
