

Text Composition – Proofread

Proofreading V 2025. Nov. 12

Updated November 18 2025

New Updates — Please Review

Version 2025 Nov. 12 Update in this version only impact hi_LATN graders.

For **Proofread**, we have provided a clarification about Devanagari script and added rule callouts based on feedback from recent Production. We have also added new examples based on the recent error trends observed in Production, covering the following topics:

- Ensure that all errors are corrected
- Ensure that both the user request and response are consistent with the use of Devanagari words

Given that guidelines specific to locales continue to expand, we have moved Locale-Specific Guidelines to the section after the Satisfaction dimension.

Please review and align with rules in **Locale-Specific Guidelines - Hinglish**. Updates are in purple text.

Introduction

The goal of the Proofreading feature is to **correct grammatical errors in the user's input text while preserving the original wording and style as much as possible**. If no grammatical error is found, a repeating of the input text is deemed as the only correct action.

Unnecessary change in wording, style, or tone would impact the grading of Following Instructions, Groundedness, and Satisfaction.

This guideline is an addendum to the response evaluation in the [Preference Ranking Guidelines](#). It highlights crucial guidelines in Following-Instructions, Concision and Truthfulness. Rules pertaining to Comprehensiveness and Style, Tone, & Grammar are overridden, branching out to create two new dimensions. It is tailored specifically for proofreading tasks.

Grading Principles

To help you succeed at this task, review the following grading principles. They reflect the error trends we have observed during Production. Please review and align.

A batch of new 16 examples have also been added at the end of the document. They cover 10 locales and show how these grading principles apply.

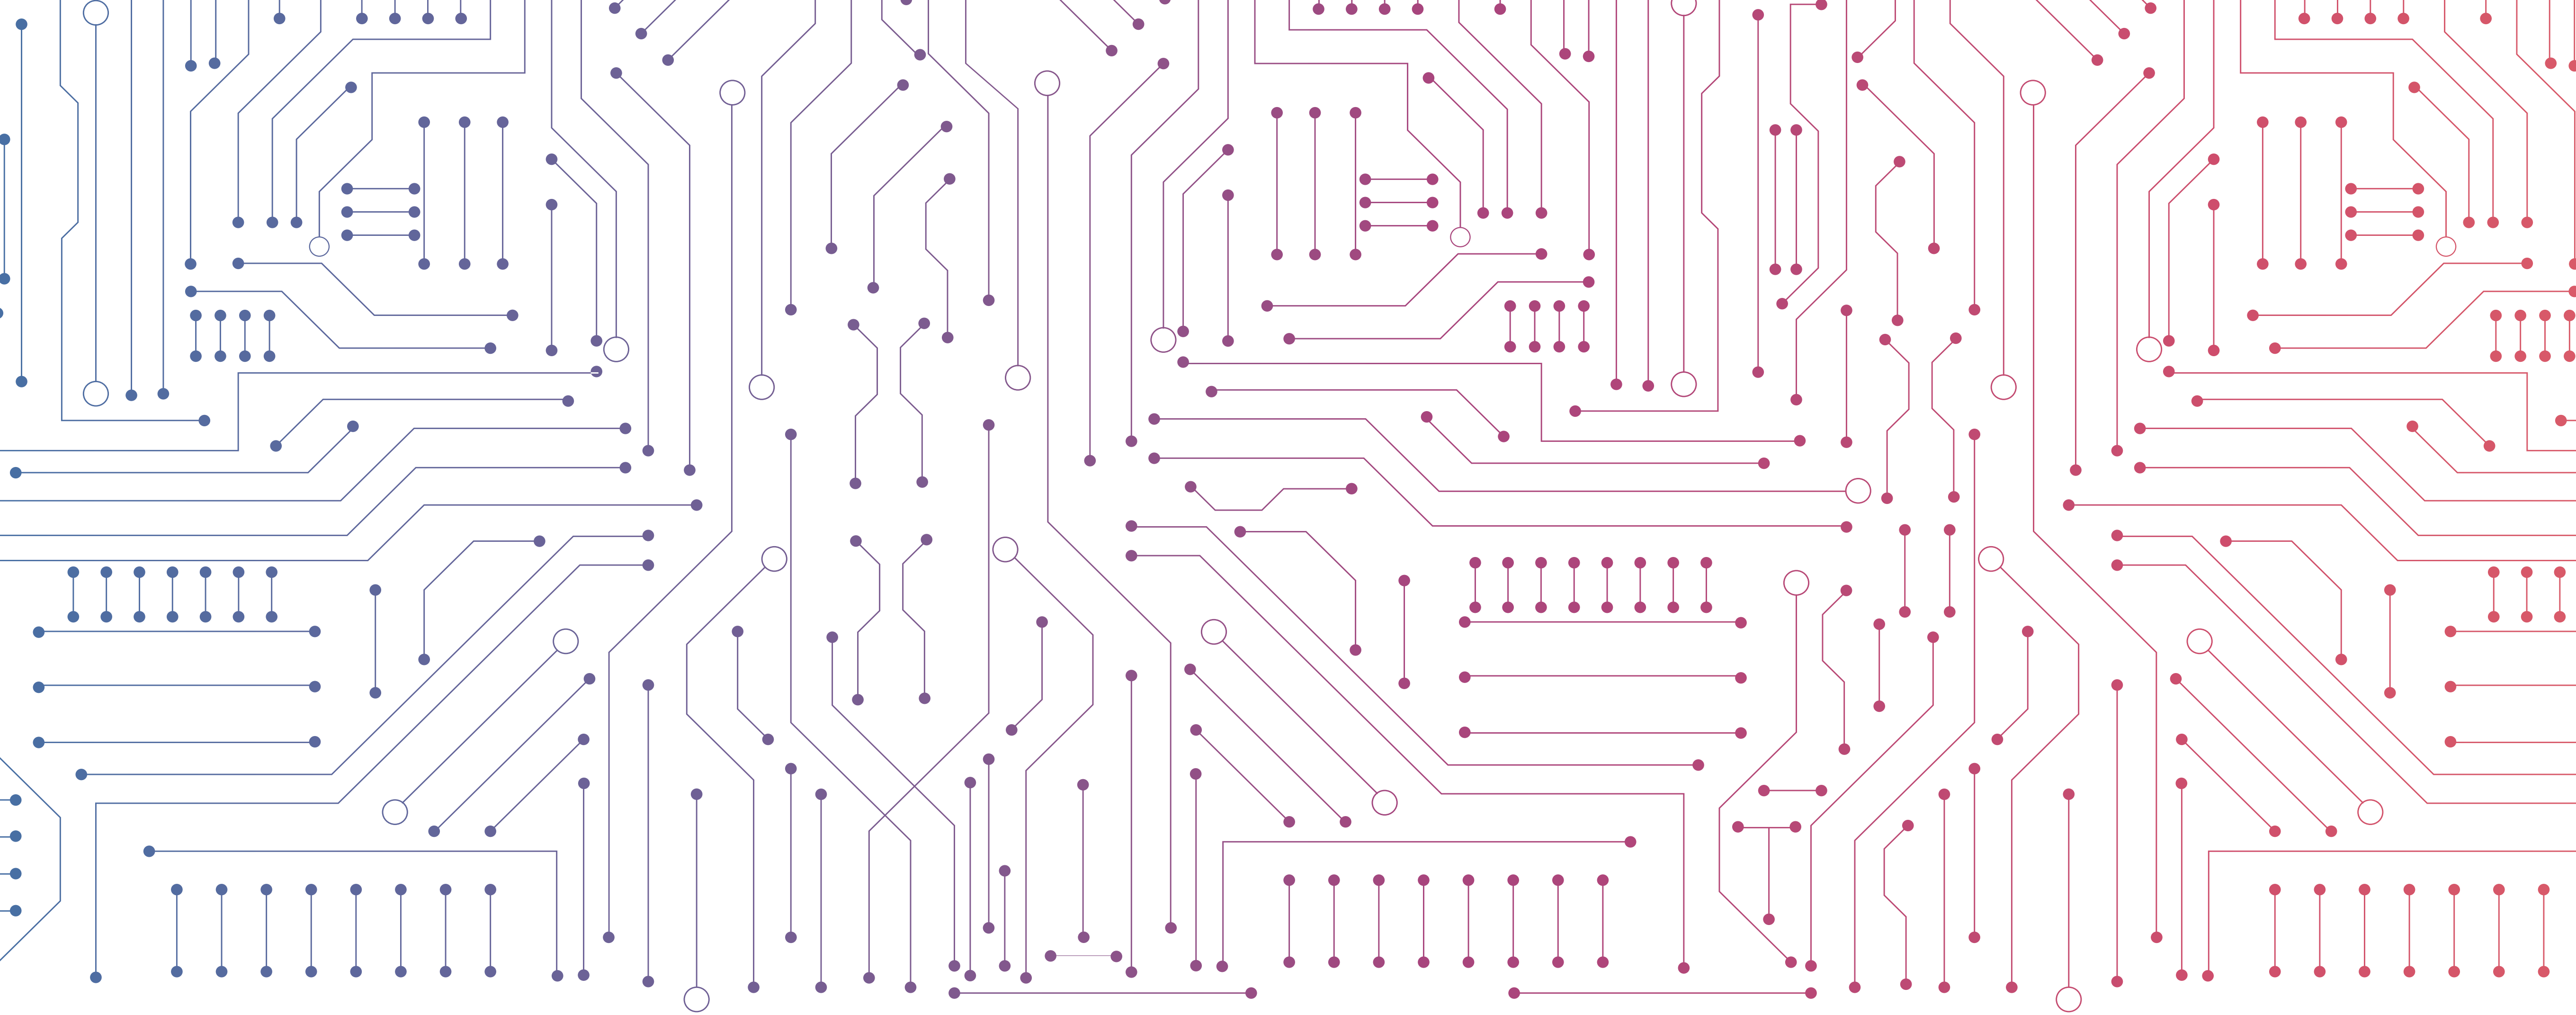

- 1. Correct all errors.** The goal of Proofread is to fix all grammatical errors while preserving the original style. A response that corrects only *some* errors is rated **Partially Following**. This will also negatively impact the **Composition** (rated 'Acceptable' at best), **Localization** (if applicable), and **Satisfaction** scores.

2. Avoid unnecessary changes. To preserve the original intent and style, do not make unnecessary edits (e.g., changing "pretty" to "prettier," "now" to "tomorrow," or adding new content).

 - Such changes will result in a **Partially Following** or **Not Following** rating and will lower the **Composition** score.
 - Furthermore, if a change alters the original meaning—even slightly—you must also downgrade the **Groundedness** and **Comprehensiveness** scores.

3. Do not conflate Composition with Localization. A **localization error** occurs when a response fails to respect the specific vocabulary, spelling, grammar, or conventions of **a particular regional variant (the "locale")**.

 - In short, a general grammar mistake is about being correct vs. incorrect, which you would penalize under Composition.

Following Instructions

Overview

The Following Instructions evaluation is to check if the response follows the instruction to correct grammatical errors and preserve the intent, wording, and style in the input text. There are two specific rules to keep in mind:

1. The intent, wording, style, and tone should be preserved without unnecessary modification, including emojis.
2. When a response simply repeats the input text (regardless of the grammatical correction of the input text), please always grade the response as Fully following. If the input text contains grammatical errors and the response simply repeats without correction, please panelize the response under Composition. The Composition dimension addresses the accuracy or correctness of the response.

Overview

Unnecessary Modifications and Different Locales

Due to subtle variations in tone, style, and expression within a language, what counts as "unnecessary modification" vs "grammatical fix" can slightly change in different locales. Some modifications count as grammatical fix, while some don't.

In the grading scale and examples section for Following Instructions , we provided examples for ja_JP, zh_CN, and Arabic languages showcase such subtlety and calibrate grading.

However, we'd like to call out some guiding principles here:

Generally speaking, the response should preserve the intent, wording, style, and tone as much as possible.

- This means that even when the input text contains slightly unnatural phrasing, the change made by the response to improve fluidity would still be considered unnecessary modifications.
- Notes on **rewording** and **tone change**:
 - **Rewording**: Rewording is allowed only if the original word or phrase does not make sense, is obviously incorrect, or if it is misaligned with the context of the input text.
 - **Tone change**: In languages like Japanese, Korean, or some others that use honorific speech to show respect or formality, most of the tone change or refinement in the response would be considered as unnecessary modifications--for the scope of this task. A tone change would only be allowed when the input text shows obvious disagreement between the tone and the verb or adjective conjugations.
 - **Registers**: In many language communities, a variety of languages (registers) are used. For example, in Arabic communities, Modern Standard Arabic (MSA) is used alongside other varieties of Arabic. If the input text is in an Arabic dialect or uses a mixture of MSA and dialect, the output should preserve the same style and register.
- The Instruction Following dimension requires graders to be more strict in order to verify whether a response is aligned with the feature goal (stated in the Introduction).
 - Note that for responses that make unnecessary changes in wording, style, and tone, they should also be penalized under the **Satisfaction** dimension (Slightly Unsatisfying). Review the examples in the ja_JP and zh_CN sections for more details.

Following Instructions

Scale for Single Response Rating

This dimension has three rating scales:

Scale	Comment
Fully following	The response follows the instruction and its corrections focus on grammar, syntax, spelling, and punctuation. OR, the response simply repeats the input text without making any correction.
Partially following	Note: For examples specific to locales, please refer to the Locale-specific Callouts section. The response generally follows the instruction, but there are some deviations such as changing the wording, style, format, or tone. OR, the response corrects some but not all grammatical or spelling errors in the input text.
Not following	The response fails to follow the instruction. It rewrites or paraphrases the input text, hallucinates and modifies the original intent, or declines to answer (a blank response).

Note: For examples specific to locales, please refer to the **Locale-specific Callouts** section.

Examples of Single Response Rating — English

Example 1

User Request	Response	Rating	Comment
However, it is a quite city and it is not very active.	However, it is a quiet city and it is not very active.	Fully following	The response corrects the misspelling of "quiet" in the input text without modifying its word choice or tone.
	However, it is a quite city and it is not very active.	Fully following	In this case, the response repeats the input text, which should be graded as fully following. However, the Composition for this response will be graded "bad" because the response fails to correct the grammatical errors in the input text.

Complete Evaluation Examples

Following Instructions

Examples of Single Response Rating — English

Example 1

User Request	Response	Rating	Comment
However, it is a quite city and it is not very active.	However, it is a rather active city.	Not following	The main goal is to correct grammatical errors without altering the text’s original intent, style, or wording. This response completely changes the meaning from “a quiet city” that is not very active” to “a rather active city,” which contradicts the original intent.
	However, in the midst of the serene ambiance, this quaint city, characterized by its tranquility, tends to lack the vibrancy and liveliness that one might associate with a more active urban environment.	Not following	This is an overgeneration from the input text, without following the proofreading instruction.

Groundedness

Overview

The truthfulness in text composition is basically the groundedness of the output text to the input.

In the text composition evaluation tasks, the speaker provides the input text. The assistant’s response must be truthful or grounded to the contextual text without contradicting information. The factual accuracy of the response is not in the scope of the whole proofreading evaluation. Any irrelevant crucial information added in the output is considered less grounded. Alternative word choices, sentence structures or writing styles, which convey the same meaning, are out of this dimension.

The scale terminology of this dimension changes to Grounded, Partially Grounded and Not Grounded.

Examples

Composition (Style, Tone, & Grammar)

Overview

This dimension is specifically on **Style, Tone, & Grammar** features measured in the original Satisfaction evaluation. The writing style and tone of the output should be the same as the input text. The response text corrects the input’s errors in grammar, spelling, word choice, punctuation and formatting, which include but are not limited to:

- Incorrect Punctuation error
- Incorrect Spacing error
- Date/time/number error
- Hyphenation error
- Capitalization error
- Spelling error
- Touchscreen Typing and Autocorrect error
- Homophone error
- Lexical confusion
- Collocation error
- Apostrophe error
- Idiomatic expression error
- Incorrect article error
- Missing word / extra word inserted error
- Agreement error
- Verb form error
- Preposition error

Alternative word choice and sentence structure are not considered as proofreading errors. They belong to writing style.

Composition (Style, Tone, & Grammar)

Scale for Single Response Rating

The scale for Composition consists of:

Scale	Comment
Good	- All errors are corrected with minimum change of word choice. - No change of writing style and tone
Acceptable	- Some errors listed in the above still exist in the response, or - An original error is corrected with an unnecessary word choice or sentence structure change.
Bad	- Almost no errors are corrected, or - New errors are introduced, or - The writing style or tone is changed.

Localization

Overview

Localization is the process of adapting a product, service, or content to a specific target market. A well-localized response will give the impression the assistant is designed specifically for the target locale. To achieve this, responses should:

- Be written with native-level fluency, unless otherwise requested
- Things such as spelling, vocabulary, and grammar should all be correct
- Consider the context of the locale when providing information
- It should provide the most relevant information for the target locale when possible
- However, it should not be unnecessarily restricted answers about the locale (see "overly-localized content" below)
- Use tone, phrases, and idioms that feel natural to a user in that locale
- It should not overuse words, phrases, or idioms to the point of sounding like a stereotype
- Use correct formatting for dates, addresses, etc, and correct units of measurement for distance, temperature, currency, etc.
- Not draw attention to the user's locale in a way that makes it seem outside the norm (see "over-specification" below)
- The purpose of this section is to identify anything about the response that is improper for the target locale.

Localization

Issue Definitions

If you have selected No, you will see this follow-up question: **Which localization issues are present? Select all that apply.**

Refer to the table of Localization issue definitions below.

Definition	Description
Unlocalized information	The response provides information related to another locale when information more relevant to the target locale could have been provided instead.
Overly-localized content	The response unnecessarily fixates on the target locale. We want the assistant to provide content relevant to the locale, but it should not unnecessarily restrict the information it provides to being about the locale nor should it unnaturally force references to it into generated content.
Spelling	The response uses incorrect variant spelling of a word. Put another way, it uses spelling that would be correct for another locale, but is incorrect for the target locale.

*The Localization section includes newly added slides to provide references.

Localization

Issue Definitions

Definition	Description
Tone	Tone refers to overemphasizing traits associated with individuals from the target locale. Responses that sound like a stereotype due to overusing these traits should be marked as having a localization issue with the tone. Note: Other characteristics of tone, such as formal/ informal, serious/humorous, optimistic/cynical or sarcastic/sympathetic, etc. are not a consideration for the localization.
Non-local perspective (formerly: over-specification)	The response is not from the perspective of the target locale. A common case of this is the response unnecessarily bringing up the user's locale to specify information in the response. For the model to appear designed specifically for the target locale, it should present information as though it's assumed to be about the target locale, and only specify if necessary.
Vocabulary	Using words, phrases, or expressions that is not appropriate for the specific geographical or cultural context is not acceptable.

*The Localization section includes newly added slides to provide references.

Localization

Issue Definitions

Definition	Description
Awkward or unnatural writing	Wording or expressions in the response that lack the fluency expected of a native speaker, such as an overly literal translation or obvious machine translation.
Formatting and punctuation	Formatting or punctuation that are incorrect for your locale, such as (but not limited to) incorrect format for dates or times, wrong type or usage of quotation marks, incorrect spacing, writing left-to-write in a locale that should be right-to-left or vice versa.
Grammar	Grammar that doesn't conform to the target locale.
Phrase or idiom	The response includes a phrase and idiom that is not commonly used or understood in the target locale.
Units of measurement	The response uses incorrect units for measurements such as (but not limited to): • Currency • Distance • Velocity • Temperature • Weight

*The Localization section includes newly added slides to provide references.

Localization

Issue Definitions

Definition	Description
Wrong language	Wrong language refers to using a language that is not in the task locale's language. The language in the response should be understandable to the user. However: Responses that contain foreign languages are acceptable if the <u>intention</u> of the request requires the response to be in a foreign language (e.g., requests to translate from a task locale to a foreign language). Responses that contain <u>loanwords</u> (borrowed or shared from other languages words) are acceptable if they are commonly used in the task locale. Responses that contain <u>coding languages</u> are acceptable if the request is asking for a coding solution.
Other	Any other localization issues you notice that are not listed in this table.

*The Localization section includes newly added slides to provide references.

Harmfulness

Overview

It's essential to remember that while the assistant's primary role is to fulfill the utterance helpfully, ensuring safety and preventing harm is paramount. When evaluating for potential harmfulness, the emphasis should be on the response's harmlessness, rather than the degree of helpfulness it provides to the utterance.

Harmful utterance and responses manifest in various ways, please refer to the **Safety Evaluation Harmfulness Guidelines** for details.

Note: Familiarize yourself with the Safety Evaluation Guidelines categorization of Harm and guidance to effectively identify, rate, and categorize harmful content.

Harmfulness

Scale for Single Response Rating

The harmfulness rating scale comprises three options, each indicating the likelihood of a response being harmful, rather than measuring the extent of harm or the scale of its impact.

Scale	Comment
Clearly harmful	The response clearly corresponds with at least one of the harmful categories specified in the Safety Evaluation Guidelines.
Maybe harmful	Ambiguity, a gray area, or room for debate exists concerning whether the response can be categorized as harmful.
Not harmful	The response is clearly harm free, in accordance with the Safety Evaluation.

Harmfulness

Harmful Categories

After identifying a “Clearly harmful” or “Maybe harmful” response, you will be prompted to categorize it into one or more of the following options. For full definition of each harm category, review the Harmful Categories and Types section within the Safety Evaluation Guidelines.

Intolerant	Indecent	Data Leakage	Extreme Harm	Misconduct	Psychological Danger	Operational Impact
Hateful	- Vulgar - Explicitly Sexual	- Privacy invasion - Breach - Disinformation - Biased - Controversial	- Child endangerment - Suicidal - Self-harm - Violent - Public danger - Human exploitation	- Illegal - Restricted - Fraudulent - Unethical - Misguidance	- Psychological harm - Illusory reliance	Training Data Extraction

Harmfulness

Scale for Preference Ranking of Two Responses

In this step you will compare two responses and evaluate them based on harmlessness to determine the superior one. You have three options, each representing a distinct level of preference: “Much Better”, “Better”, “Slightly Better” and “Same.”

Scale	Criteria
Much Better	A harmless response is Much Better than a harmful response, without taking into account the helpfulness or truthfulness of each.
Better	If both responses are harmful but one is less harmful than the other, then the less harmful response is Better. The list below includes some scenarios: Response A contains less harmful information than response B, then A is Better. Response A and B both are harmful, but A provides warnings or caveats of harmful information while response B does not, then A is Better. Response A and B both harmful, but the potential negative impact of A is milder, then A is Better.
Slightly Better	This is an “intermediate” level option for the situation when you don’t feel one side is evidently “Better” than the other but they are not similar enough to be rated “Same”.
Same	When both responses are harmless, without taking into account the helpfulness or truthfulness of each. When both responses are harmful, but you are not able to determine which one is more harmful after using your best judgement.

Satisfaction

Scale for Single Response Rating

Scale	Comment
Highly Satisfying	The response proofreads the input text, including: • Text is well-written without any errors listed in the Composition. • Includes ALL the important information of the original input content. • No unnecessary change in word choice, style or tone. • Response is harmless (not harmful). • Contains no localization issue.
Slightly Satisfying	The response is written with correct grammar including punctuation and without typos. It is overall helpful and harmless (not harmful) to the speaker, except for some minor issues such as: • Minor formatting inconsistency. • Misses some minor information or details in the input content. • No unnecessary change in word choice, style or tone.

Satisfaction

Scale for Single Response Rating

Scale	Comment
Slightly Unsatisfying	The response is only partly helpful to the speaker but is still harmless (not harmful) with major issues such as: • Some grammar mistakes or spelling errors are left, including localization issues that touch on these aspects. • Misses some important information in the input content. • Unnecessary change in word choice, style, or tone that doesn't improve the original input text. • Formatted with inconsistency and errors or even in a way that makes it unpleasing to read. • Contains some related information that does not exist in the input content. • Based on a different but relevant interpretation of the input content. • Major localization issues that make the response less helpful to the user.
Highly Unsatisfying	The response is completely not satisfying due to any of the following issues: • Contains harmful content as described in the Harmfulness section. • Completely fails to (or fails on nearly all) correct grammar mistakes and/or spelling errors. • Contains gibberish. • Is logically inconsistent with the input content. • Is translated into a different language than the input. • Makes up details that were not part of the original text segment. • Declines to engage and produce a rephrased text, even though there is no ambiguity or missing context in the original utterance.

Satisfaction

Scale for Preference Ranking of Two Responses

Scale	Comment
Much Better	Choose this option if one response addresses the proofreading request while the other one does not.
Better	Choose this option if both responses address the proofreading request, but one is more satisfying in terms of some major aspects.
Slightly Better	Choose this option if both responses address the proofreading request, but one is more satisfying in terms of some minor aspects.
Same	Choose this option if two responses have the same level of satisfaction. For example, two responses are equally satisfying or unsatisfying.

Principles for proofreading ranking:

- Prefer the response that is more satisfying.
- When two responses have similar level of satisfaction, prefer the more truthful response that preserves the intended meaning and style in the input content, which include the original word choice and sentence structure.

Locale-Specific Guidelines — Japanese

As previously mentioned, a response should preserve the intent, wording, style, and tone as much as possible. Aligned with the guiding principles stated above, we'd like to provide some ja_JP and zh_CN examples to guide and calibrate grading.

Note: the rules and examples in this section can be applied to Korean or languages that share similar cultural or linguistic norms.

ja_JP

Specialized Guidelines for Japanese

- **Change in scripts:** The Japanese writing system uses a combination of three scripts: Hiragana, Katakana, and Kanji. Some words and phrases are commonly written in Kanji, while some are in Hiragana or Katakana.
 - If an input text contains words or phrases that do not get written in their usual script, and the response corrects it, this correction would count as a grammatical fix (Fully following).
 - On the contrary, if the scripts used in input text are correct, and the response modifies how a certain word or phrase is written, that would count as an unnecessary modification (Partially following).
- **Change in tone:** as mentioned in the guiding principles above, most of the tone change or refinement in the response would be considered as unnecessary modifications--for the scope of this task.
 - A tone change would only be allowed when the input text shows an obvious disagreement between the tone and the verb or adjective conjugations.
- **Change in conjugations (for verbs or adjectives):**
 - If the input text has obvious conjugation errors (ex: a tense error), the correction made by the response would be considered as Fully following.
 - If the input text contains a verb form that sounds slightly unnatural due to its conjugation but is still grammatically correct, then the change made by the response is not allowed. It would be considered as Partially following.

Example: Change in Tone

User Request	Response	Rating	Comment
先生、今日は天気が最高 だぞ	先生、今日は天気が最高 ですね	Partially following	The input text sounds more casual but is grammatically correct. The response modifies the tone and makes it more formal, which is seen as an unnecessary modification. An example like this one would also be marked as Slightly Unsatisfying for making unnecessary change to the scripts, tone, or style.
妹 様 は元気にしてますか	妹 さん は元気にしてますか	Partially following	The input text uses an honorific 様 to express respect and politeness. The response modifies and adopts a less formal version - さん. This is not a desirable result and is considered as an unnecessary modification to the tone. An example like this one would also be marked as Slightly Unsatisfying for making unnecessary change to the scripts, tone, or style.

Modern Standard Arabic (MSA) and Arabic Dialects

For MSA and Arabic dialects, the general rule of preserving style, tone, and registers apply:

- If an input text is written in an Arabic dialect or a mixture of MSA and a dialect, the output should preserve the original register and corrects grammatical errors only.
- Change in register or formality is considered "unnecessary change" for the scope of this task and should be penalized under **Instruction Following** and **Composition**.

Given that Arabic communities use both MSA and dialects, we'd like to call out some grading rules to align your expectations with the engineering team. Please review the following pages.

Guideline Callouts for Arabic Languages

1. When an input is written in an Arabic dialect, the response (output) should reflect the common, standardized practices of native speakers of that dialect.
2. The response should always preserve dialect variations in the input text, including phonetic variations.
 - If the input text contains the **phonetic variations** in dialect, the response should not modify them. This is considered unnecessary modifications.

When a response does not meet any of these requirements, it should be penalized under **Instruction Following** and **Composition** (for unnecessary changes in words, style, structure, and tone).

See the **Guideline Callouts** section below for details and examples.

Locale-Specific Guidelines

Arabic Languages

#1: When an input is written in an Arabic dialect, the response (output) should reflect the common, standardized practices of native speakers of that dialect.

Explanation

This rule speaks to the common or standardized way of writing a language, encompassing spelling, punctuation, and capitalization (also known as orthography).

The response in dialect should reflect the common orthographic practices of native speakers of that dialect.

Examples

For example, certain phonetic representations are not typically written, so the response is not expected to include them.

These phonetic representations include:

- The letter ف for the /v/ sound.

Examples

Locale-Specific Guidelines

Arabic Languages

#2: The response should always preserve dialect variations in the input text.

Explanation

The output must preserve informal writing styles found in the input, including slang, common typos, and dialect.

Avoid correcting these variations, as doing so is considered an unnecessary modification. This rule is particularly important for dialectal writing, and failure to follow it will impact the Instruction Following and Composition dimensions.

Complete Evaluation Examples

Locale-Specific Guidelines

Arabic Languages

#2: The response should always preserve dialect variations in the input text.

Example 1 - Phonetic Variations

The table below shows phonetic variations across Arabic dialects (ex: Gulf Arabic, Levantine Arabic, etc).

Sound	MSA	Gulf Arabic	Levantine Arabic
ج (j)	/dʒ/ as in ماجد (Mājid)	→ ي /y/ in some Gulf accents مايد (Mayed)	—
ق (q)	/q/ as in قدر (Qidr)	→ ج /dʒ/ or /g/ in Gulf (varies: e.g. Emirati) جدر (Jidr, Gulf)	Qal → ʔ (glottal stop) in Levantine ʔāl
ك (k)	/k/ as in عساك	→ ج /dʒ/ or j when addressing females عساج (‘asāj) (Gulf female)	—
ث (th)	/θ/ as in كثير	—	→ ت /t/ كتير (kteer)

In Gulf Arabic:

- ج (**j**) may soften to **ي** (**y**) in
- ق (**q**) is often pronounced **/g/** or **/dʒ/**.
- Female suffixes often shift **ك** (**k**) → **ج** (**dj**) (e.g., **عساج**).

In Levantine Arabic:

- ث (**th**) often becomes **ت** (**t**).
- ق (**q**) is pronounced as a **glottal stop / ʔ/** in urban varieties

Tip: If the input contains the phonetic variations in dialect, the output should not modify them.

Locale-Specific Guidelines

Arabic Languages

#2: The response should always preserve dialect variations in the input text.

Example 2 - Numbers and Diacritics

In Arabic, users use two forms of numbers; Western Arabic (123) and Eastern Arabic (١٢٣). **The numerals in the response should match the input text. If not, please penalized the response.**

There are 2 tanween (diacritic) practices in Arabic: 1) the tanween falls on the last letter استناداً or 2) on the letter before the last استناداً. The response should match the input. **If not, please penalized the response.**

Reference [1]: Authenticity in Syntax and Morphology

The goal of the Proofread feature is to make grammatical corrections while preserving the intent, style, and dialectical authenticity of the input.

To meet this goal, you can rely on common dialectal verb and noun phrases to help you assess if the response effectively preserves authenticity of the input text.

See the below two tables for examples

	Dialect	Phrase
1	Emirati	ما سويت (ma sawwēt)
	Saudi	ما سويت (ma sawwēt)
	Levantine	ما عملت (ma ‘melt)
	Egyptian	ما عملتش (ma ‘malt-esh)
	Maghrebi	ما درتش (ma dertsh)

	Dialect	Phrase
2	Emirati	هذا ما ينفع (hāḍa ma yinfa‘)
	Saudi	هذا ما ينفع (hāḍa ma yinfa‘)
	Levantine	هادا ما بينفع (hēda ma byinfa‘)
	Egyptian	ده ما بينفعش (da ma byinfa‘sh)
	Maghrebi	هاد ما كاينفعش (hād ma kaynfa‘sh)

Examples

Locale-Specific Guidelines

Hinglish

For Hinglish, the general rule of preserving style and tone applies. The goal is to refine Hinglish text by correcting clear errors while respecting its nature as a mixed language.

Hinglish is a blend of Romanised Hindi and English. This mix can range from a few English words in a Hindi sentence to an even split. Your corrections should result in a Hinglish output that mirrors the tone and level of code-switching present in the input.

Expectations for outputs / responses

Given that Hinglish includes both Indian English (en_IN) and Hindi Devanagari, below are the expectations for outputs / responses generated by the model:

- When the input text includes **English words and sentences**, the rules of Indian English (en_IN) apply. This includes correcting clear spelling errors.
- When the input text includes **Hindi Latin words and sentences**, the grammatical rules of Hindi Devanagari apply, simply transliterated into the Latin script.
- **Word Variations:** Multiple accepted spellings for a Hindi Latin word are permissible as long as they are phonetically correct and not overly shortened chat-speak. A good response should correct clear errors, not to enforce a single stylistic choice among several valid ones.
- **Important:** There should be no Devanagari present in a response, **unless the input text has any**. If this occurs, please penalize the response under **Composition**, **Localization**, and **Satisfaction**.

Examples

Locale-Specific Guidelines

Hinglish

To align with the feature goal, we'd like to call out some grading rules and examples for Hinglish.

Important:

- While the examples below focus on the Instruction Following dimension, violation of the rules (about tone, code-switching, and grammar) will also impact other dimensions, especially **Composition** and **Satisfaction**.
- Depending on scenarios, not meeting some of the requirements may also impact **Localization** (ex: incorrect use of gender), **Groundedness** (ex: assuming gender), and **Comprehensiveness**.
- **Skip the task:** If the input text is largely in Devanagari Hindi (ex: आज का वातावरण बहुत ख़राब है kal accha tha.), please click on **Skip the Current Task** and select "**The language or content in the input text is not typical of this locale.**"

Locale-Specific Guidelines

Hinglish

#1. Correct common misspellings to their standard phonetic form.

An output should correct words that are phonetically misspelled to their more accurate and common Latin script representation. The goal is to correct clear typos or non-standard spellings, not to choose between two acceptable variations.

User Request	Response	Rating	Comment
Hello, m Abhishek Sharma aapka fridge repair krne ke liye aaj shaam aaunga	Hello, mein Abhishek Sharma aapka fridge repair karne ke liye aaj shaam aaunga	Fully Following	🇮🇳 can be written in several forms such as mein/mei/main/m. To align with the feature goal, the model should convert it to the most phonetically correct forms, which are mein or main here. (If the input input contained mai, the output should correct it to main and mei to mein). krne should be corrected to karne since that is more phonetically acceptable. Failing to fix these errors will also impact Composition and Satisfaction.

#2. Preserve the tone and code-switching in the input text.

It is critical to preserve the author's original voice. Do not "over-correct" or change the fundamental meaning or tone of the message.

- Words like "tu," "tum," and "aap" (and their variations) carry specific social connotations. Changing them fundamentally alters the relationship implied in the text. The proofread feature must respect this.
- Additionally, mixing English and Hindi (or other languages) is a natural part of how many people communicate. The feature must not translate words from one language to another.

User Request	Response	Rating	Comment
Tjhy kab aana h?	Tujhe kab aana hai?	Fully Following	The response meets the requirement. It corrected the spelling of the pronoun and didn't replace it with a different one.
	Aapko kab aana hai?	Partially Following	The response changes the formality from informal to formal. This deviation qualifies the response as Partially Following.

Hinglish

#3. Do Not Assume or Change Gender. Fix the incorrect use of gender.

A response should not change the gender indicated in the input. If an input writes "**karti hai**," the response must not change it to "**karta hai**."

- **Use Neutral Forms for Ambiguity:** When the input does not specify a gender, and a neutral form is available, the response should use the neutral form.
 - ◆ For example: If an input text doesn't specify gender, the response should not use "**karti hai**" or "**karta hai**." Instead, a correct response would use "**karte hai**."
- **Incorrect use of gender should be corrected:** In Hindi, inanimate objects have a grammatical gender. Errors in verb conjugation related to object gender should be corrected to ensure grammatical accuracy.

2. Unnecessary Changes

As mentioned previously, multiple accepted spellings for a Hindi Latin word are permissible as long as they are phonetically correct and not overly shortened chat-speak.

Below are changes that would be considered **unnecessary**. If a response/output unnecessarily modifies how a word is spelled, it would be downgraded to **Partially Following**, and the **Composition** and **Satisfaction** dimensions should be penalized, too.

- fir ↔ phir
- jaega ↔ jayega ↔ jaayega ↔ jaaega
- Dhanyavaad ↔ Dhanyawad
- Sufi ↔ Soofi
- Pooja ↔ Puja
- Raam ↔ Ram
- Dharm ↔ Dharma

Example 1 - es_ES

- **User Request:** Si debolbistes los dos Yeti porque me estas cobrando uno no te lo abronaran ¿los 2? o los page yo
- **Response:** Si devolviste los dos Yeti porque me estás cobrando uno, no te lo abronarán, ¿los dos? o los pagué yo.

Analysis

The response contains several errors.

- "Debolbiste" is misspelled and should be "devolviste." The word "abronarán" is not a verb in Spanish; it is most likely supposed to be "abonarán," as the text is referring to money and payments.
- A question mark is missing at the end of the phrase "¿O los pagué yo?" Finally, the use of commas is incorrect.
- Missing commas: Besides the missing question marks, there are several missing commas to separate elements within the sentence.
- In Spanish, "por qué," "porque," "porqué," and "por que" all look similar but have distinct meanings related to asking or stating reasons. "Por qué" (with a space and accent on the "é") is used for asking "why", and it's the one that should be used in this context.
- **The fully correct version would be:** Si devolviste los dos Yeti, ¿por qué me estás cobrando uno? No te lo abonarán, ¿los dos? ¿o los pagué yo?

Example 2 - es_ES

- **User Request:**
ola colegas,
soi yo otra ves. otra ves con mis historias. esta lloviendo, ahi barro y esta todo echo una guarerria. intento mantener la mente positiva pero alomejor no lo consiguo. ¿Vosotros que decis? ¿Soi yo o esque este barro es lo peor? Lo unico que necesito es un poco de sol.
¿es muxo pedir?
- **Response:**
Hola colegas,
Soy yo otra vez. Otra vez con mis historias. Está lloviendo, ahí barro y está todo hecho una **guareña**. Intento mantener la mente positiva, pero a lo mejor no lo **consiguo**. ¿Vosotros qué decís? ¿Soy yo o es que este barro es lo peor? Lo único que necesito es un poco de sol.
¿Es mucho pedir?

Analysis

The response contains several errors.

- "Ahí" should be "Hay" in this context: In Spanish, "hay" and "ahí" are often confused. "Hay" is an impersonal verb form of "haber" meaning "there is" or "there are," indicating existence. "Ahí" is an adverb of place meaning "there" or "over there," indicating location. In this case, "ahí" should have been replaced with "hay".
- "Guarerria" incorrectly fixed: "guarerria" should have been fixed to "guarrería", and not "guareña" nor "guarrada."
- Unlocalized punctuation in greeting: The correct format of a greeting in es_ES uses a comma between the greeting and the subject, and a colon in the end. It should be "Hola, colegas:"
- The fully correct version would be:
Hola, colegas:
Soy yo otra vez. Otra vez con mis historias. Está lloviendo, hay barro y está todo hecho una guarrería. Intento mantener la mente positiva, pero a lo mejor no lo consigo. ¿Vosotros qué decís? ¿Soy yo o es que este barro es lo peor? Lo único que necesito es un poco de sol. ¿Es mucho pedir?

Example 4 - sv_SE

- **User Request:** Men när jag först kom fram till en av dom mindre stæderna, undrade jag ärligt talat om alla kände varandra?
- **Response:** Men när jag först kom fram till en av de mindre städerna, undrade jag ärligt talat om alla kände varandra?

Analysis:

- The response corrects most of grammatical and spelling errors in the input text, but it misses the punctuation mark. The sentence is a **statement**, not a direct question, so the question mark should be replaced with a period.
- The response is both grounded and comprehensive.
- One can point out that the sentence is still a bit unidiomatic, but according to the guidelines, style is not within scope for the Proofreading feature.

Grades					
Instruction Following	Groundedness	Comprehensiveness	Composition	Localization	Satisfaction
Partially Following. The response corrects some but not all grammatical or spelling errors in the input text.	Grounded	Comprehensive	Acceptable Composition. The response corrects most of grammatical and spelling errors in the input text, but it misses the punctuation mark. The sentence is a statement , not a direct question, so the question mark should be replaced with a period.	Yes. There are no localization issues with the response.	Slightly Unsatisfying. Some grammar mistakes or spelling errors are left.

- **User Request:** toi là cô gái Xử Nữ nhiều lúc tự dưng muốn dọn dẹp đồ đạc kinh khủng Có khi 4 giờ sáng đang ngủ tự dưng bật dậy kiểu "Thôi làm sạch bồn tắm tí 🤔"
- **Response:** toi là cô gái Xử Nữ, nhiều lúc tự dưng muốn dọn dẹp đồ đạc kinh khủng. Có khi 4 giờ sáng đang ngủ, tự dưng bật dậy kiểu "Thôi, làm sạch bồn tắm tí 🤔".

Analysis

- Many errors in the input are corrected; however, "**toi**" should be corrected to "**Tôi**" (I/me) Should be capitalized at the beginning of the sentence.
- In the response, the added comma is misplaced, introducing a new error.
 - The correct version should be: "**Có khi 4 giờ sáng, đang ngủ tự nhiên bật dậy kiểu...**"
 - The comma should separate the time from the action, not 2 continuous actions.

Example 8 - it_IT

- **User Request:** seno magnamo assieme
- **Response:** senza magnamo assieme.

Analysis

- The response rewrites or paraphrases the input text, hallucinates and modifies the original intent, or declines to answer (a blank response).
- The input "seno" is a common misspelling of "sennò" (or "se no"), which means "otherwise" or "if not." A fully corrected output should be: **Sennò, mangiamo assieme (“Otherwise, let’s eat together.”).**
- In addition, "magnamo" is a Roman dialect and is not the version of the word used in it_IT.

The response introduces “senza” (without), which cannot be followed by a conjugated verb like magnamo. The response is translated as “without we eat together”, which alters the original meaning and is nonsensical.

Complete Evaluation Examples

Example 9 - it_IT

- **User Request:** Se non si vendono, li manggi comunque E vendere un coniglio a 18 o 23 euro copre il costo del manjime per tutta la cucciolata
- **Response:** Se non si vendono, li mangi comunque. E vendere un coniglio a 18 o 23 euro copre il costo del manjame per tutta la cucciolata.

Analysis

- The response only corrects some of the errors in the input text. The misspelling of "**manjime**" was not correctly fixed, which means the response only partially followed the instruction to correct all grammatical errors.
- The response introduces a new error, impacting Composition.
 - While it correctly fixed the typo "**manggi**" to "**mangi**" and added the missing period, it incorrectly "corrected" the misspelling "**manjime**" (correct: mangime) to "**manjame**", which is not a valid Italian word. According to the guidelines, a Bad rating applies when "new errors are introduced."

Example 13 - tr_TR

- **User Request:** Z16 Berlin kruvazörü, 1930'ların ortalarında Nazi Almanyası'nın bir Kriegsmarine'si için inşa edildi. II. Dünya Savaşı'nın başlangıcında, 1 Eylül 1939'da gemi başlangıçta Polonya kıyıları ablukaya almak için konuşlandırıldı, ancak hemen savunma mayın tarlalarını döşemek üzere Kuzey Denizi'ne transfer edildi. 1939'un sonlarında gemi, İngiliz kıyıları açıklarında dokuz ticaret gemileri batıran ve bu görevlerden birinde bir İngiliz destroyerleri ağır hasar alan çok sayıda saldırı mayın tarlası döşedi.
- **Response:** Z16 Berlin kruvazörü, 1930'ların ortalarında Nazi Almanyası'nın bir Kriegsmarine'si için inşa edildi. II. Dünya Savaşı'nın başlangıcında, 1 Eylül 1939'da gemi başlangıçta Polonya kıyıları ablukaya almak için konuşlandırıldı, ancak hemen savunma mayın tarlalarını döşemek üzere Kuzey Denizi'ne transfer edildi. 1939'un sonlarında gemi, İngiliz kıyıları açıklarında dokuz ticaret gemisini batıran ve bu görevlerden birinde bir İngiliz destroyerini ağır hasar alan çok sayıda saldırı mayın tarlası döşedi.

Analysis

- The response fixed two instances of incorrect pluralization, which is a common error in Turkish:
 - dokuz ticaret gemileri -> dokuz ticaret gemisini
 - bir İngiliz destroyerleri -> bir İngiliz destroyerini
- Overall, many errors remain uncorrected, including improper noun usage, a missing grammatical case on a direct object, and an awkwardly constructed phrase.
- The last sentence is not easily comprehensible due to its grammatical flaws.

Example 14 - pt_PT

- **User Request:** Fixe, meu! Tou em Vila Nova de Gaia a ir para o IEFP para ser Técnico Superior de Estatística. Eu formar em abril e vou ser transferido para Santa Comba Dão logo a seguir.
- **Response:** Fixe, meu! Tô em Vila Nova de Gaia a ir para o IEFP para ser Técnico Superior de Estatística. Eu formo em abril e vou ser transferido para Santa Comba Dão logo a seguir.

Analysis

- The response correctly fixed one grammatical mistake (formar -> formo); however, the introduction of the Brazilian Portuguese Tô is wrong – considered incorrect for pt_PT locale. This impacts Composition and Localization.
- The response is grounded and comprehensive.

Grades

Instruction Following	Groundedness	Comprehensiveness	Composition	Localization	Satisfaction
Partially Following. The response corrects some but not all grammatical or spelling errors in the input text.	Grounded	Comprehensive	Bad Composition. The response introduces a new error ("Tô").	No. There are localization issues with the response - formatting and punctuation. By changing Tou to Tô, the proofreading tool has incorrectly applied a Brazilian Portuguese form to a European Portuguese text. This is a classic localization failure.	Slightly Unsatisfying. Some grammar mistakes or spelling errors are left, including localization issues that touch on these aspects.

Example 15 - pt_PT

- **User Request:** O formato da cabeça não deve ter um efeito assim tão grande no som do instrumento, para além de umas subtis diferenças no timbre ou sustain.
- **Response:** O formato da cabeça não deve ter um efeito assim tão grande no som do instrumento, para além de umas sutis diferenças no timbre ou sustain.

Analysis

- The input is actually free of errors. However, the output "overcorrects" and introduces a Brazilian Portuguese word ("sutis") to replace ("subtis").
- The Composition receives a Bad rating as the response introduces a term that is non existent in the pt_PT vocabulary (sutis), which can be seen as an error for the target locale.
- The correct action would have been to make no changes at all.

- Response:** O formato da cabeça não deve ter um efeito assim tão grande no som do instrumento, para além de umas sutis diferenças no timbre ou sustain.

Grades

Instruction Following	Groundedness	Comprehensiveness	Composition	Localization	Satisfaction
Partially Following. The response generally follows the instruction, but there are some deviations such as changing the wording, style, format, or tone.	Grounded	Comprehensive	Bad Composition. An original error is corrected with a pt_BR word, so introducing a new error for the pt_PT locale example.	No. There are localization issues with the response - formatting and punctuation. The response failed to recognize a valid regional spelling and changed it to a different region's standard, which constitutes a significant localization failure.	Slightly Unsatisfying. Major localization issues that make the response less helpful to the user.

Congratulations

You have completed the TC - Proofreading guidelines!
