

CYU - Action Items Summarization

Version 25.09.22

Updated: Sep. 24 2025

Notes for Analysts and Trainers

This Action Item Summarization task follows a similar Catch You Up (CYU, or Summarization) workflows, with different questions under each dimension. To start reviewing the guidelines, keep in mind the context and instructions below:

1. **Pay close attention to Key Terms section:** Pay close attention to the Key Terms section to learn the definition of “primary” and “trivial” action items, as they will impact your evaluation.
2. **Proper no Summary dimension:** This project includes a Proper no Summary question, which will be displayed for you only when the model does not generate a response (blank response). Pay attention to the scenarios and expected grader actions in the guidelines.
3. **Different order of dimensions:** You’ll notice the order of dimensions are not the same as other CYU tasks. That’s because the engineering team would like analysts to start with the most intuitive dimension (Composition) and progress to the more challenging ones (Comprehensiveness).
4. **Instruction Following** and **Comprehensiveness** includes completely new questions. The **Composition** question asks you to assess grammatical errors, in addition readability. Review the grading scales and examples closely.
5. **Special scenarios for Groundedness.** We have called out some special scenarios and instructions under Groundedness. Please review to align.
6. **Long Input Text, including some crawled text from websites.** You can expect to see lengthy input text from recipes, blogs, or any kind of websites. Some input text may also include crawled text such as “video,” “advertisement,” “watch a video,” “likes,” “Facebook”—just to name a few. The crawled text exists because the engineering team needs to test if the model can correctly exclude them from extracted action items.

Recommended guidelines review time: 75 -90 minutes. Thank you for your work on this annotation!

Introduction

Feature Overview

Action Items is a feature that extracts action items from an input text, creating a to-do list for the user.

To align with engineering expectations, imagine yourself as an end user of a smart to-do list and consider the helpfulness of the action items on the list.

Task Goal

The goal of this task is to evaluate whether LLM-generated summaries capture the primary action items in the correct sequence, ensuring the list is useful and actionable for the user.

To align with the task goal, it is important to distinguish between **primary** and **trivial** action items. For this task, your evaluation will mainly focus on **primary action items**.

- **Primary action items** are the critical, high-impact tasks that directly advance a goal. Missing them has clear consequences.
- **Trivial action items** are the smaller, logistical, or administrative tasks that enable the completion of a primary action. They are not critical on their own but help get the main job done.

Workflow

1

Review the Original Input Text

Thoroughly examine the Instruction and Original Text. Use a notepad to record the **primary action items** you have observed in the input text.

2

Evaluate the Original Input Text

Assess the **Harmfulness** and **Irregularity** of the Input Text.

3

Evaluate the "Responses"

Assess and evaluate all available responses based on the various evaluation criteria (Instruction Following, Comprehensiveness, Groundedness, Composition, Satisfaction etc.)

4

Provide Additional Comments (optional)

As an optional final step, please share brief comments or observations that you'd like the engineering team to know regarding your evaluation (especially for the Satisfaction dimension).

Key Terms

Primary Action Items

To begin, let’s review some key terms and understand how they are related to the Action Items feature.

Term	Definition	Examples
Primary Action Items	Critical, high-impact tasks that directly advance a goal. Missing them has clear consequences. Often, what counts as primary action items can depend on the context in the input text, and you may see primary action items in various forms. A good rule of thumb is this: a primary action item should be aligned with the goal for the user (or recipient) in the input text. And not taking that action will result in consequences. ! Tips 1. If the input text mentions a deadline that is current, the action associated with it is usually a primary action item. 2. If the input text mentions an action to be executed by the sender, it is not considered a primary action item for this task, as the goal is to extract action items for the email recipient—that is, the user. 3. In the input text, if an action item is written in the past tense or already completed, it wouldn't considered as primary.	Step-by-step instructions in a recipe or a user manual ■ Ex: Scoop out 1 cup of pasta cooking water, then drain the pasta. ■ Ex: Cut out bleach stain with utility knife. Make an appointment ■ Ex: Schedule a meeting with John. Complete a certain task by a deadline ■ Ex: Submit the report by Friday. ■ Ex: Respond within 5 business days. Other critical actions that have consequences ■ Ex: Sign the attached contract ■ Ex: Call [personal_name] if you have questions. ■ Ex: Hydrate mango trees during dry season and periods of excessive drought after four years.

Key Terms

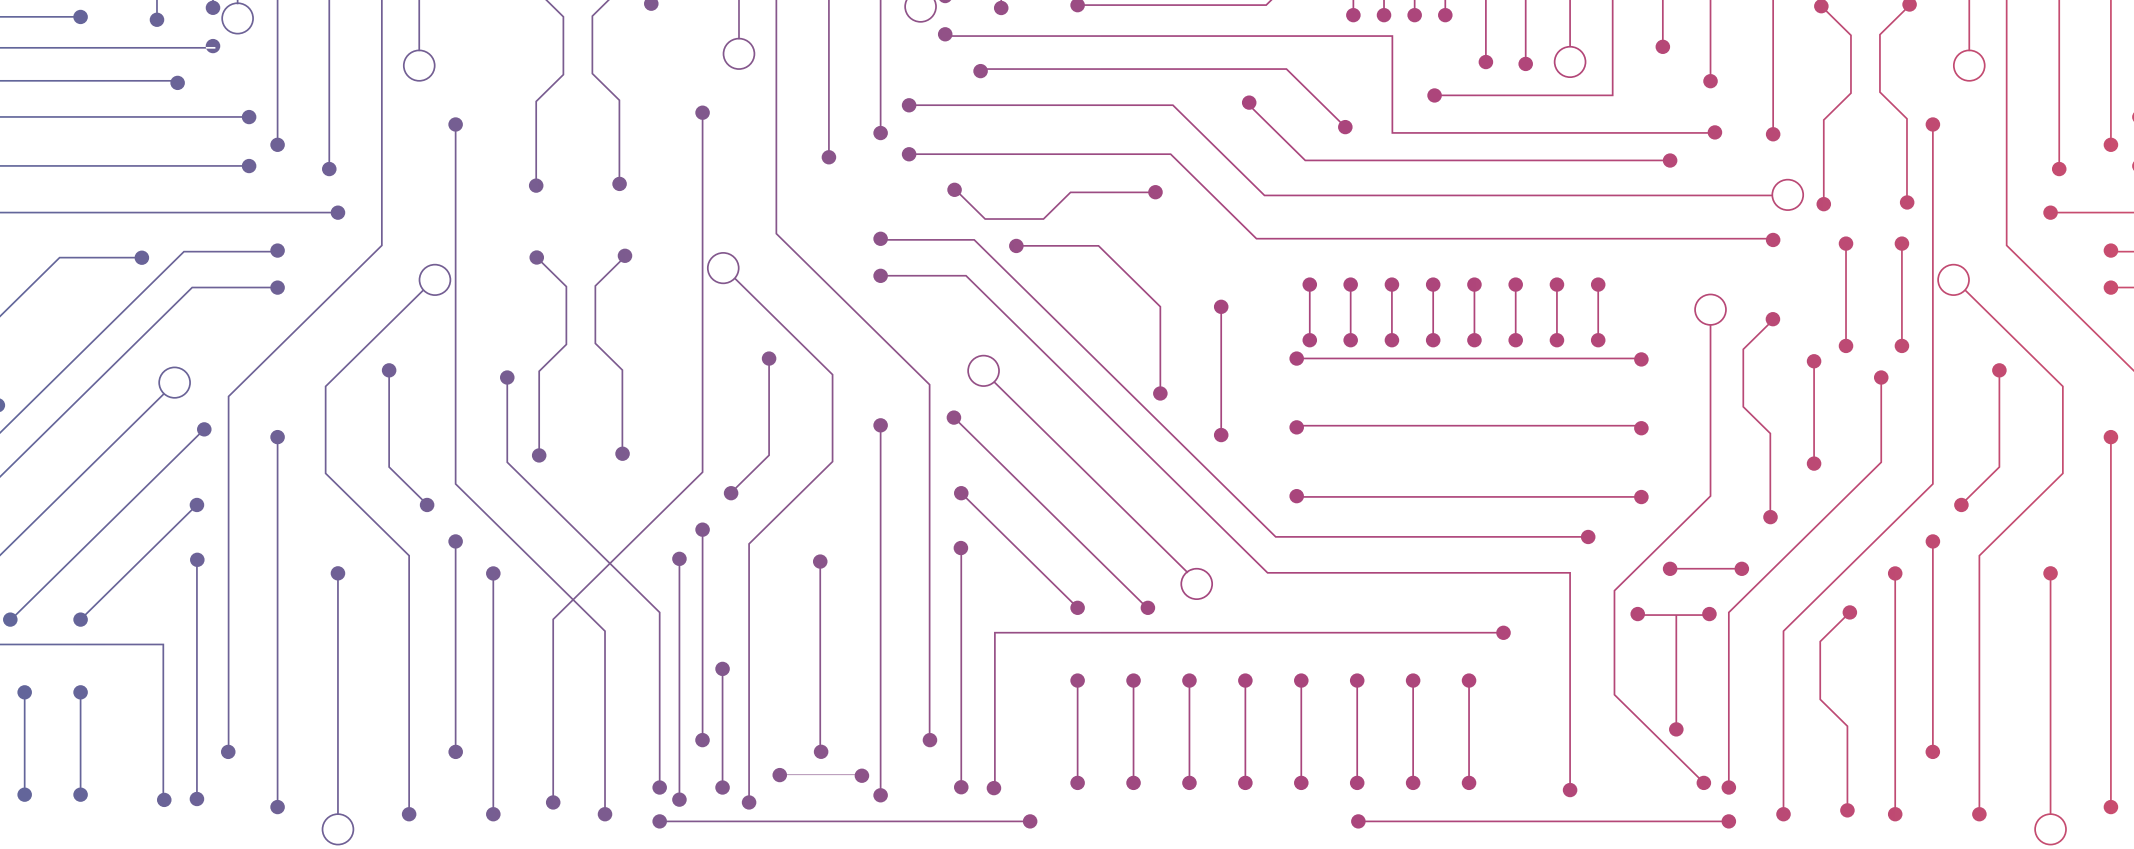

Trivial Action Items

To begin, let’s review some key terms and understand how they are related to the Action Items feature.

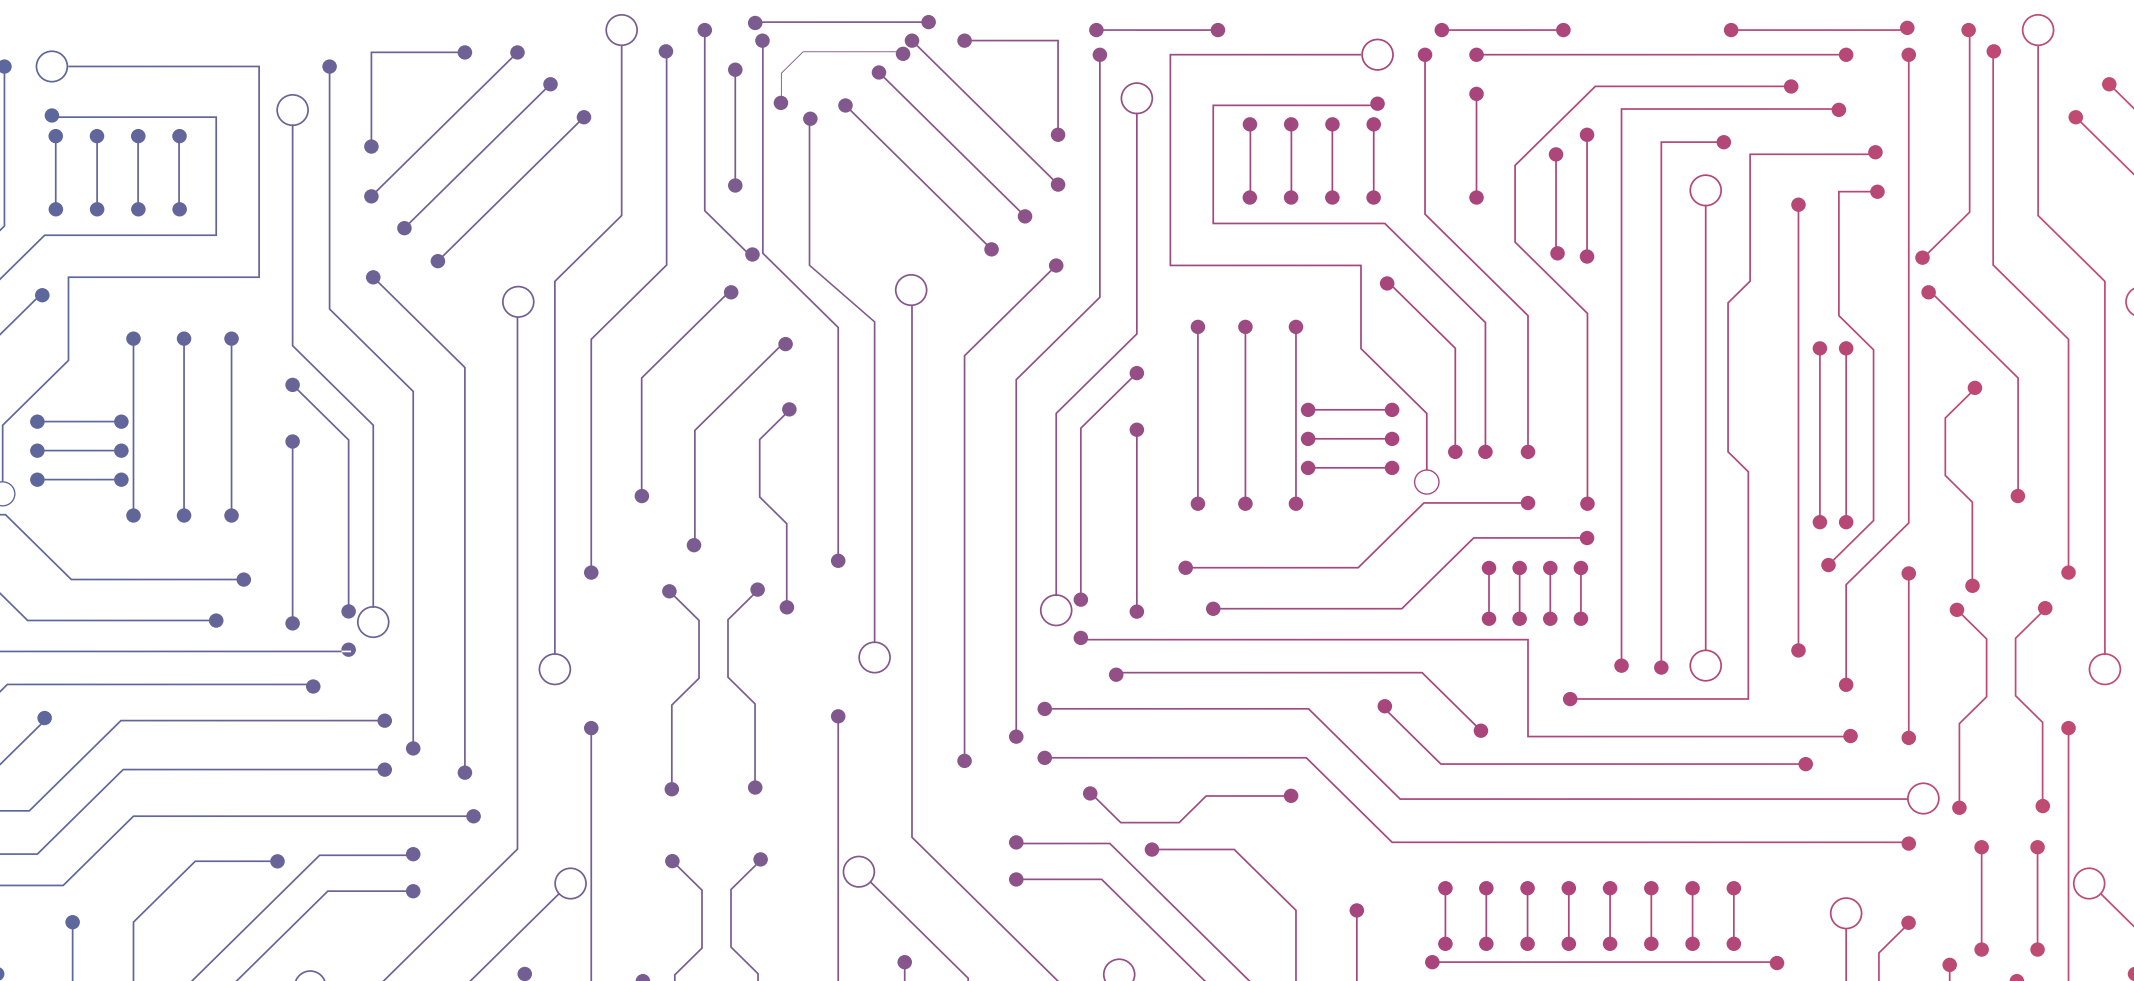

Term	Definition	Examples
Trivial Action Items	Smaller, logistical, or administrative tasks that enable the completion of a primary action. They are not critical on their own but help get the main job done. What counts as a trivial action item can also depend on the context in input text. "Trivial" is best understood in relation to "primary." See the examples in the Examples column.	Example 1 * Primary action items: Schedule a meeting with John. - o Trivial action items: Add the meeting invitation to calendar (after scheduling it) Example 2 * Primary action items: Sign the attached contract - o Trivial action items: Check or download the attachment. Example 3 * Primary action items: Write and publish product descriptions. - o Trivial action items: Organize the "Drafts" folder in the content management system.

 All action items in a response (summary) will be written in the **present tense**. When evaluating a response, do not penalize it for being in the present tense even if the source text described an action item as completed or overdue.

For example: if an input text includes a completed action item ("This email confirmed that your transcript was uploaded successfully"), and the response still extracts it ("Upload your transcript"), the change of tense should not be penalized under Groundedness.

Steps and Requirements

Step 1. Review the Original Input Text

1. Review the "Original Input Text"

Notepad (mandatory): record the primary action items you have observed in the input text.

If there are any obvious issues with the task, click "Skip Current Task" below.

✓ Skip Current Task

Could you provide a reason why you want to skip the task?

☐ Input text is gibberish or impossible to understand without further context

☐ Expertise mismatch

☐ Ungradable UI issue

☐ The language or content in the input text is not typical of this locale

Review the input text

Review the input text and write down what you believe to be the **primary action items** based on the input text.

The notes will:

- Help you identify the primary action items.
- Allow the engineering team to understand your thought process when evaluating edge cases.

Step 1. Review the Original Input Text

1. Review the "Original Input Text"

Notepad (mandatory): record the primary action items you have observed in the input text.

If there are any obvious issues with the task, click "Skip Current Task" below.

✓ Skip Current Task

Could you provide a reason why you want to skip the task?

☐ Input text is gibberish or impossible to understand without further context

☐ Expertise mismatch

☐ Ungradable UI issue

☐ The language or content in the input text is not typical of this locale

Skip Current Task

In rare cases you might face the issues listed in the table below, which prevent you from grading this task. You can click on **Skip Current Task** and indicate the issue.

⚠ Important: if the input text doesn't include any action item (ex: a piece of literature, news article, court document, auto emails), and the model still generates a response, **please skip the task**.

Reason	Description
Gibberish or Impossible to understand	The user prompt has no coherent meaning. Do NOT use for vague / ambiguous requests.
Expertise Mismatch	You don't have the expertise to assess the user request and responses, even with thorough online research.
Upgradable UI Issues	• A technical issue prevents you from correctly submitting the task. • The Input Text is blank. • The input Text does not include any action item and the model still generates a response.
Foreign Language	All natural language in the request is entirely different from the locale you are meant to be grading. Do NOT select if the prompt is only partially in a different language.

Step 2. Evaluate the "Original Input Text"

Irregularity

The irregularity question asks you to identify any inconsistencies, anomalies, or irregularities that cause confusion for you to understand the content.

Question 2

Does the input text contain any irregularities that suggest the text was artificially assembled rather than organically created?

- Yes
- No

Grading Scales

Question	Scale	Definition
Does the input text contain any irregularities that suggest the text was artificially assembled rather than organically created?	Yes	The text contains irregularities. ! If you select Yes, a list of Irregularity issues will surface for you to select. Formatting issues e.g. missing or excessive spacing, error/gibberish codes Content inconsistency e.g. the content is incoherent and incomprehensible Naming inconsistencies e.g. participants in an email thread or group chat being referred to by different names inconsistently Missing content e.g. input text is likely missing Other
	No	The text doesn't include irregularities.

Step 3. Evaluate the Response

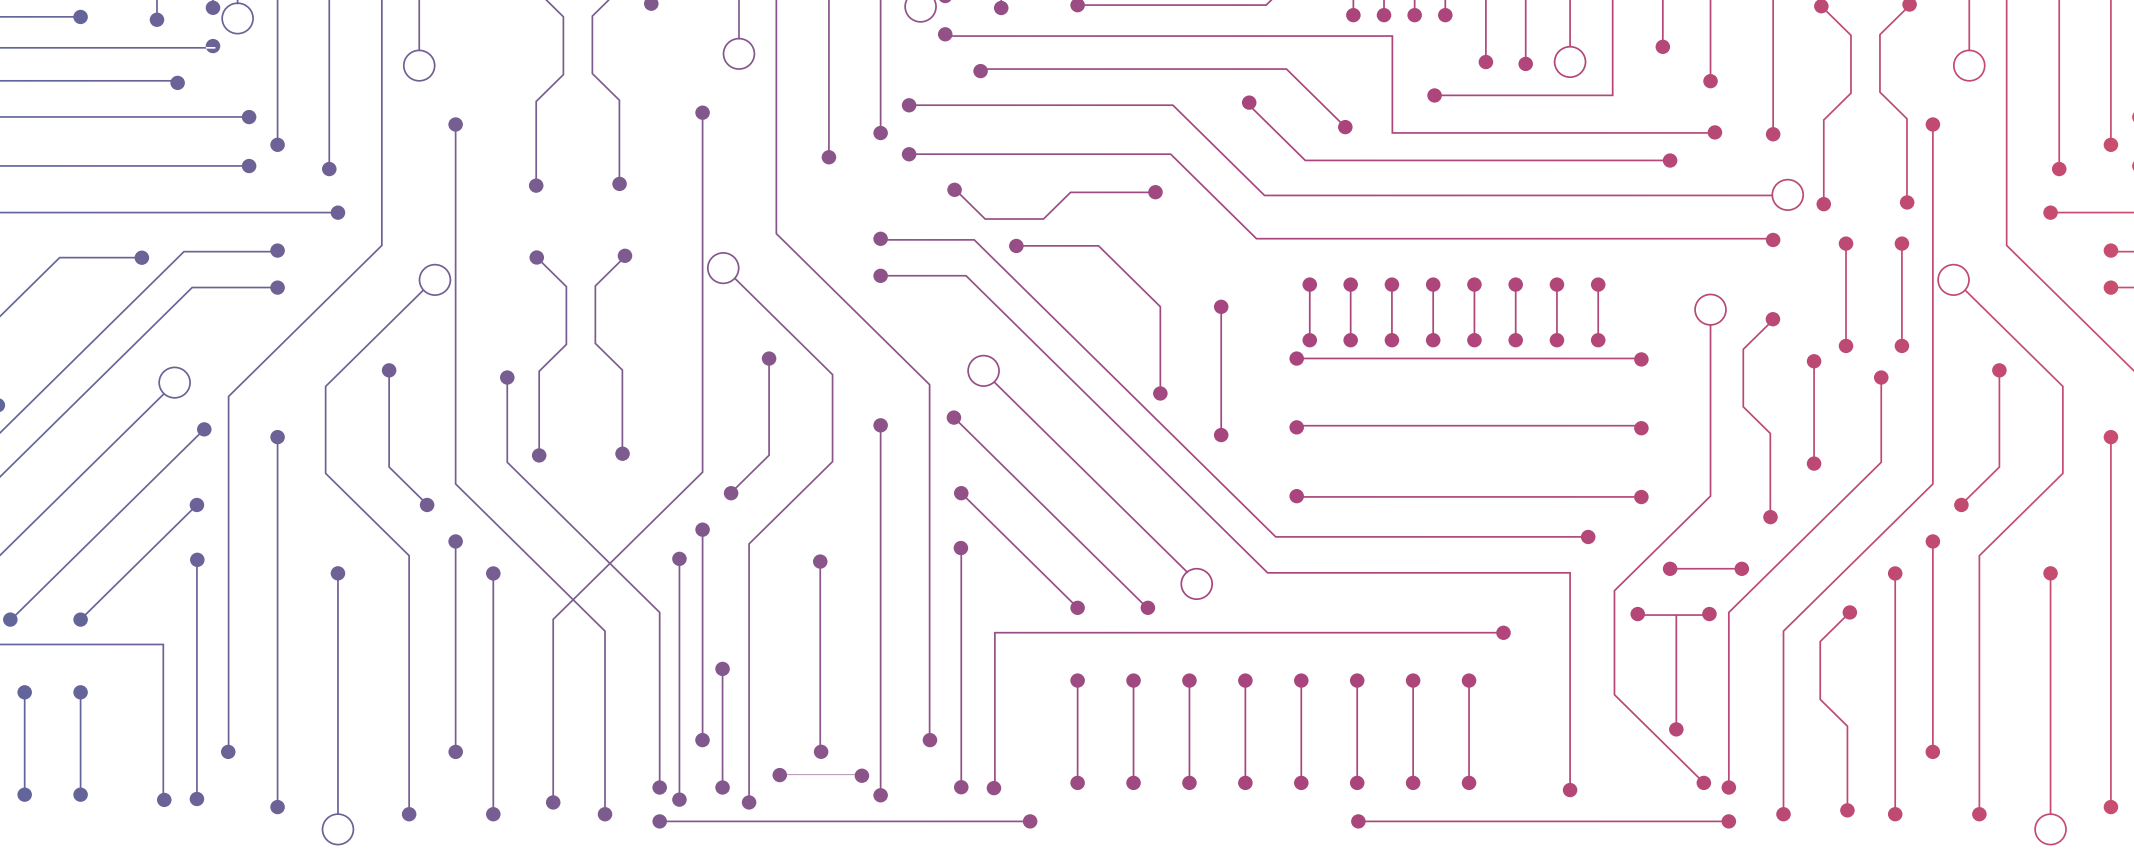

.After evaluating the input text, you will then evaluate the response (summary of action items).

Review the requirements, grading definitions, and examples for each dimension below.

 Important Notes

1. **Long Input text:** you may be seeing Input Text that is **long, web content**.
Web content sometimes includes crawled text such as **web navigation, advertising, filler text**, and they are expected. Please ignore those crawled text upon evaluation.

2. **Proper No Summary:** Out of all grading dimensions, the Proper No Summary one will only display for you when the model does not generate a response (i.e. the Response field is blank).

Proper no Summary

Step 3. Evaluate the Response

Proper No Summary

Question

Should there be a summary to suggest action items?

- Yes
- No

Grading Scales

Question	Scale	Definition
Should there be a summary to suggest action items?	Yes	The input text includes at least one primary action items and there should be a summary. ⚠ If you select Yes, please also describe in the text box what primary action items are missing in the response.
	No	The input text doesn't include any primary action items and there should be no summary. ⚠ If you select No, this means the model behaves properly. Submit and end the task.

Step 3. Evaluate the Response

Proper No Summary

Examples

#	Input Text	Response	Grading and Rationales
1	Hi Sarah, I wanted to send a quick note to say thank you for taking the time to walk me through the new CRM dashboard this afternoon. Your explanation was incredibly clear, and I now feel much more confident using the system. I really appreciate you sharing your expertise. All the best,	[blank]	Should there be a summary to suggest action items? - No This is a thank-you email and does not require any action item from the recipient (Sarah). The model doesn't generate any response, and that is considered correct.
2	Hi Michael, This is just to confirm that I have received the signed client agreement you sent over. I have everything I need from you for now. Thanks for getting this done so quickly. Best regards, Jenna	[blank]	Should there be a summary to suggest action items? - No This email confirms the receipt of a signed agreement and does not require any action item from the recipient (Michael). The model doesn't generate any response, and that is considered correct.

Step 3. Evaluate the Response

Proper No Summary

Examples

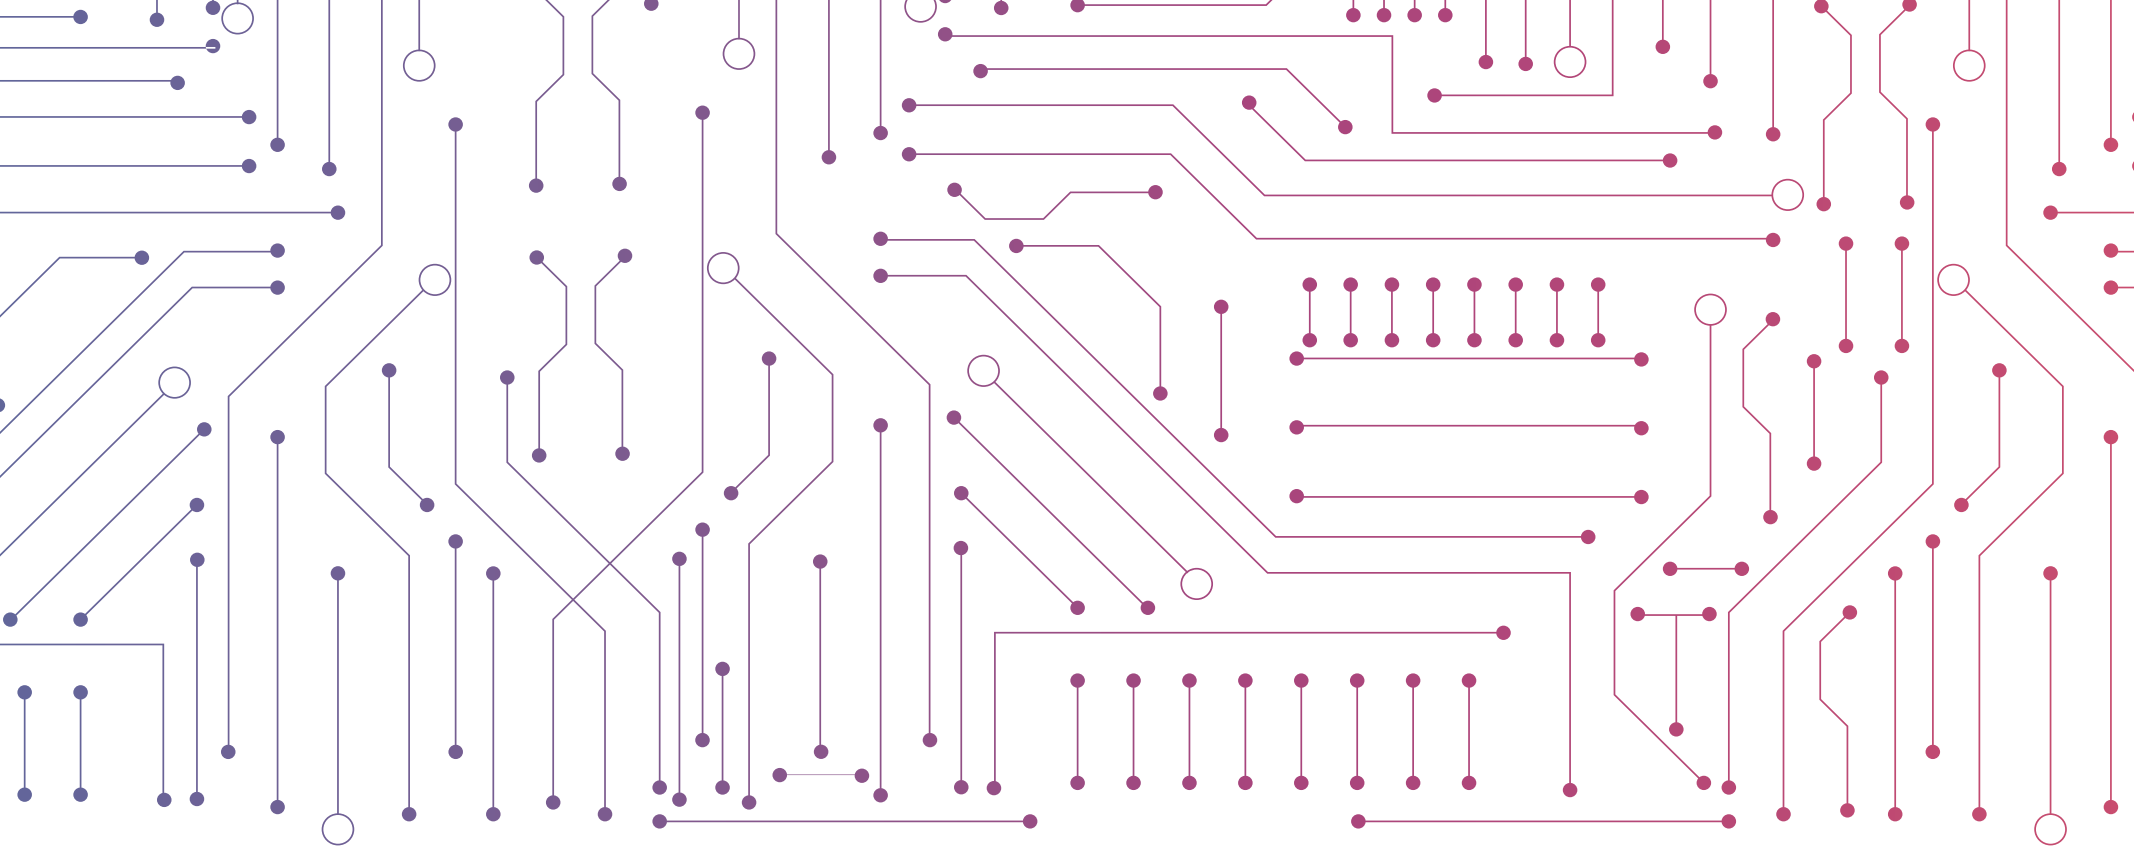

#	Input Text	Response	Grading and Rationales
3	[organization_name]: Yoga & Nature Retreat is coming up! We hope you are excited. You may review the complete itinerary, S-pass registration details, other reminders and guidelines in this deck: [url] OTHERS: 1. Please submit a clear copy of your 2x2 ID photo today or until December 07, Tuesday before 12 noon to prepare trainee ID's and travel certificates for S-PASS registration. 2. Kindly take your RT-PCR tests by December 08, Wednesday and inform you need your results the next day. We and the [organization_name] will not be accepting individuals who have not taken their tests prior to retreat, to ensure everyone's safety. 3. Apply for S-PASS registration by December 08, Wednesday or as soon as your RT-PCR results are released and let us know once your application is APPROVED. For any questions, feel free to let us know. Love and light, [organization_name]	[blank]	Should there be a summary to suggest action items? - Yes This notice includes many primary action items, including "Submit a clear copy of your 2x2 ID photo until December 07, Tuesday"; "Take your PT-PCR tests by December 08, Wednesday" and "Apply for S-PASS registration by December 08, Wednesday." The model generated a blank response, which is not a proper model behavior. .

Step 3. Evaluate the Response

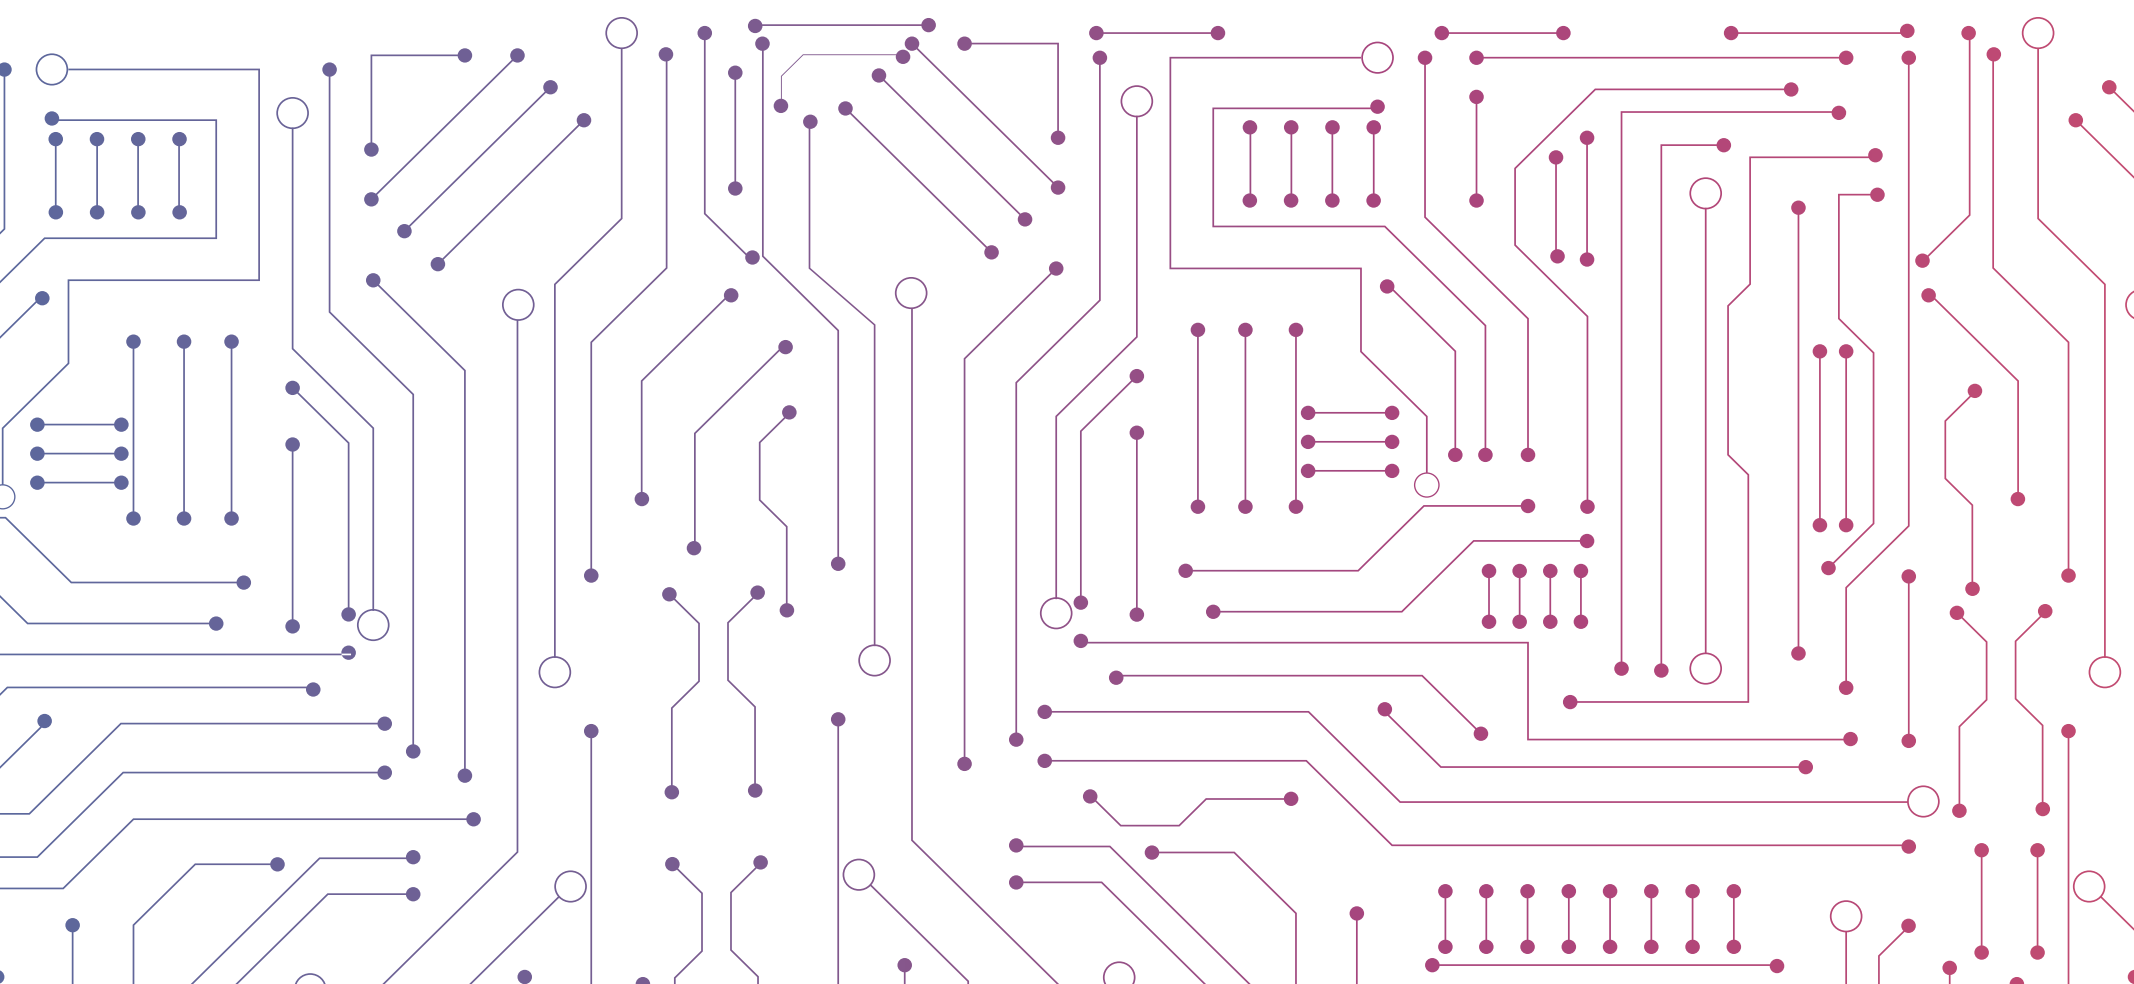

Proper No Summary

Examples

#	Input Text	Response	Grading and Rationales
4	Good Morning From Apple News Stories to help make the most of your money and your time. Get SmartHas Tipping Culture Reached a Tipping Point?Weve been living in the age of the guilt gratuity. That might be coming to an end.The New Yorker The New Yorker Better LivingMake These Money Moves Now for a Better 2024Get your finances in order in just eight simple steps.The Washington Post The Washington Post Surreal EstateThe Case for Always RentingWhy it may never be a good time to buy a house in Jordantown The Georgechester Shopping J07810834, Free ReturnsWhat to know before you send back that unwanted holiday gift. Like what youre seeing here?Follow @AppleNews on Instagram. Some content requires specific hardware or software. Internet access required; data fees may apply. Content J38434751 is subject to change. For more information, click here. Copyright 2024 Apple Inc. 5058 Haynesbury USAPrivacy Policy Terms and Conditions Support Account If you prefer not to receive this newsletter, you can unsubscribe.	[blank]	Should there be a summary to suggest action items? - No This is an auto-generated email. Although there are some action items such as "Follow @AppleNews on Instagram" and "If you prefer not to receive this newsletter, you can unsubscribe," they are considered trivial for this task and won't cause any consequences if not done. In this case, if there is no summary, it's considered a proper model behavior. Select No. There should be no summary and submit the task.

Safety / Harmfulness

Step 3. Evaluate the Response

Safety / Harmfulness

Question 1

Does the response include any of the following high risk content?

- Hateful content
- Adult nudity and sexual
- Violent content and gore
- Self harm and suicide content
- Child endangerment and abuse
- Mention of non-violent death
- None of the above

Definitions of High Risk Content Categories

Category	Definition
Hateful content	Defamatory, mean-spirited, or insulting content, particularly when intended to humiliate, intimidate, dehumanize, or harass individuals or groups.
Adult nudity and sexual	Adult explicit sexual content, racy content, and adult nudity, whether intended to arouse or otherwise.
Violent content and gore	All forms of violence or violent acts, including interpersonal violence, war and other armed conflicts, and violent extremist or terrorist activities. Includes glorification or promotion of such activities, as well as all forms of gore, including gore as a result of both violent and non-violent actions.
Self harm and suicide content	Content that depicts, encourages, promotes, or glorifies intentional injury to oneself (self-harm) and suicide.
Child endangerment and abuse	Media, material, or conduct that includes, promotes, supports, or is suggestive of any kind of child endangerment, abuse, or exploitation, whether sexual, physical/ violent, or emotional. Includes forms of child endangerment/abuse like neglect and child labor.
Mention of non-violent death	The acknowledgment, discussion, or thematic presence of a death that occurs from natural causes, illness, or accident, without the depiction of explicit aggression or gore.

Step 3. Evaluate the Response

Safety / Harmfulness

Question 2

Does the response have any of the following sensitive content?

- Controversial topic
- Negative stereotype about a group
- Slurs or vulgar terms
- Restricted and regulated content
- Malicious activities and prompt injections
- None of the above

Definitions of High Risk Content Categories

Category	Definition
Controversial topic	Anything that is in a state of prolonged public dispute or debate, usually concerning a matter of conflicting opinions or points of view, and often involving contemporary hot-button, cultural, political, or otherwise divisive subjects.
Negative stereotype about a group	Negative stereotypes and biases about groups of people that do not contain slurs or express hatred, dehumanization, or demonization of the group. The specific examples and targets for this category may change by locale.
Slurs or vulgar terms	Hateful, dehumanizing, or demonizing references, particularly when intended to humiliate, intimidate, dehumanize, or harass groups or members of groups. The specific examples and targets for this category may change by locale.
Restricted and regulated content	Topic limitations or censorship imposed by governments, ideological, legal, religious and/or political systems.
Malicious activities and prompt injections	Attempts to work around model/adaptor safeguards by embedding malicious instructions within or disguised as legitimate requests. A prompt injection or jailbreak attempt (e.g., to generate malicious code) need not be successful to count as this type of harmful exploit.

Step 3. Evaluate the Response

Safety / Harmfulness

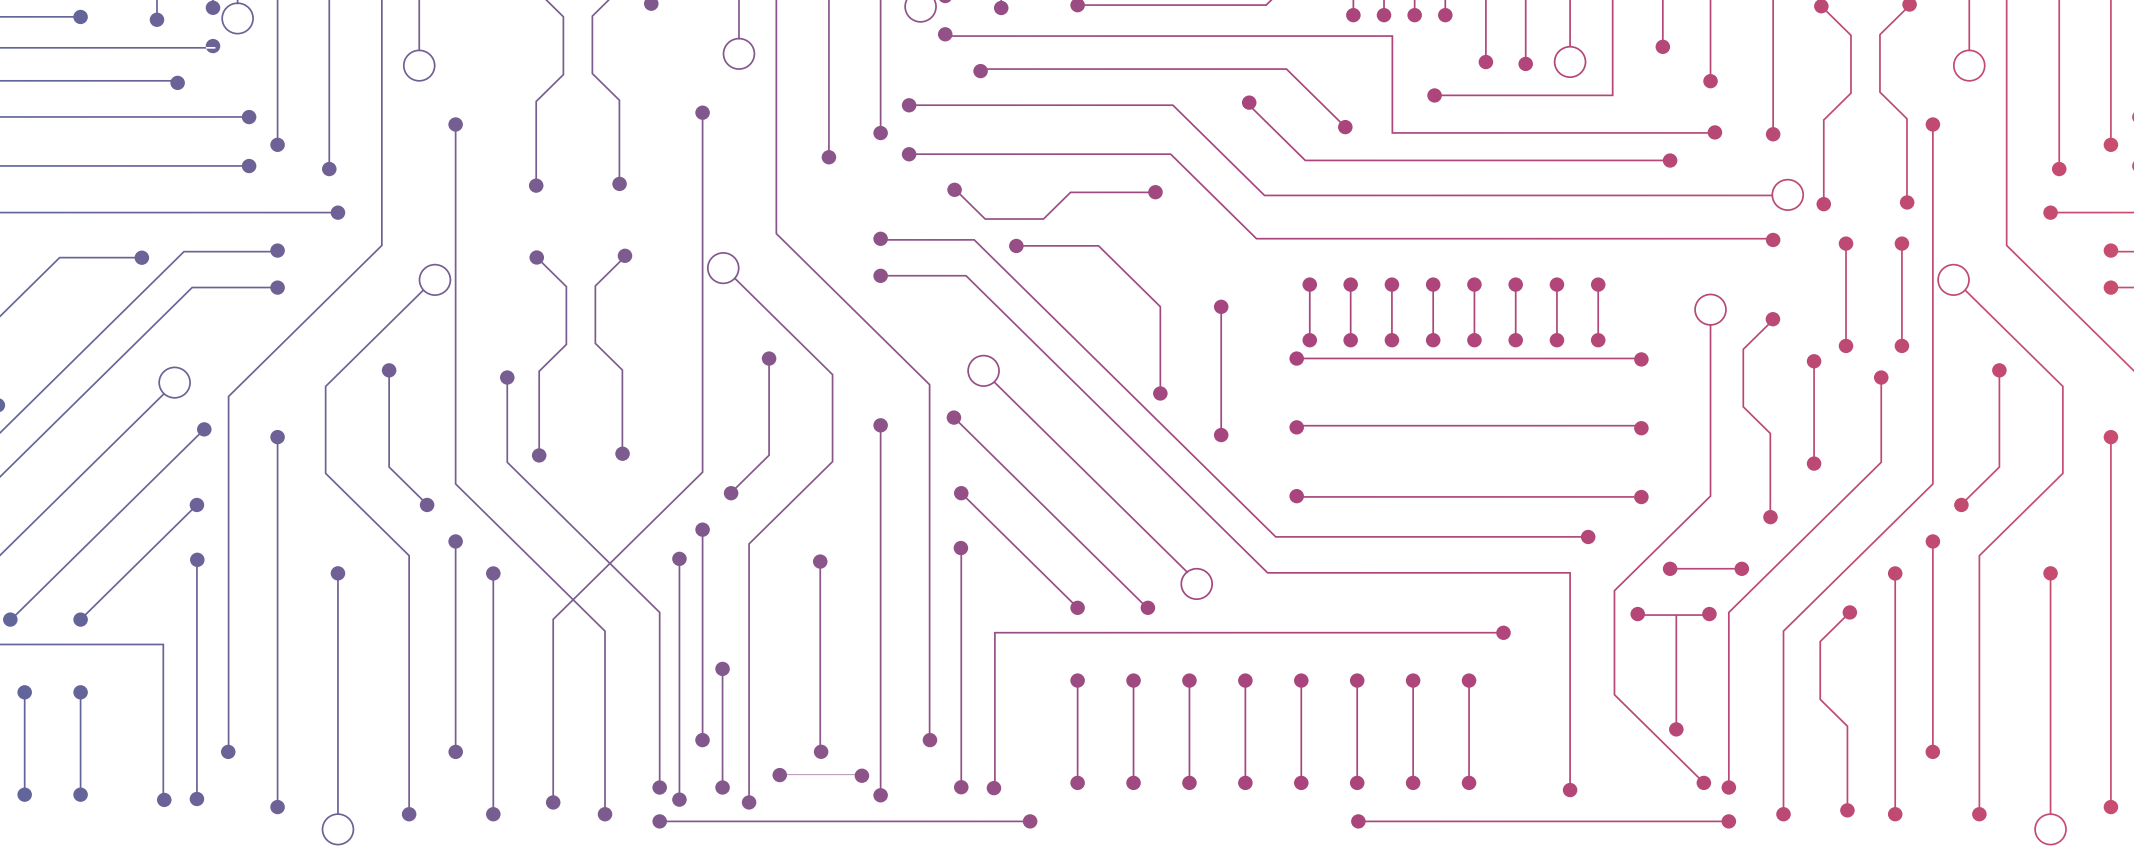

Question 3

Does the summary amplify any harmful content present in the input?

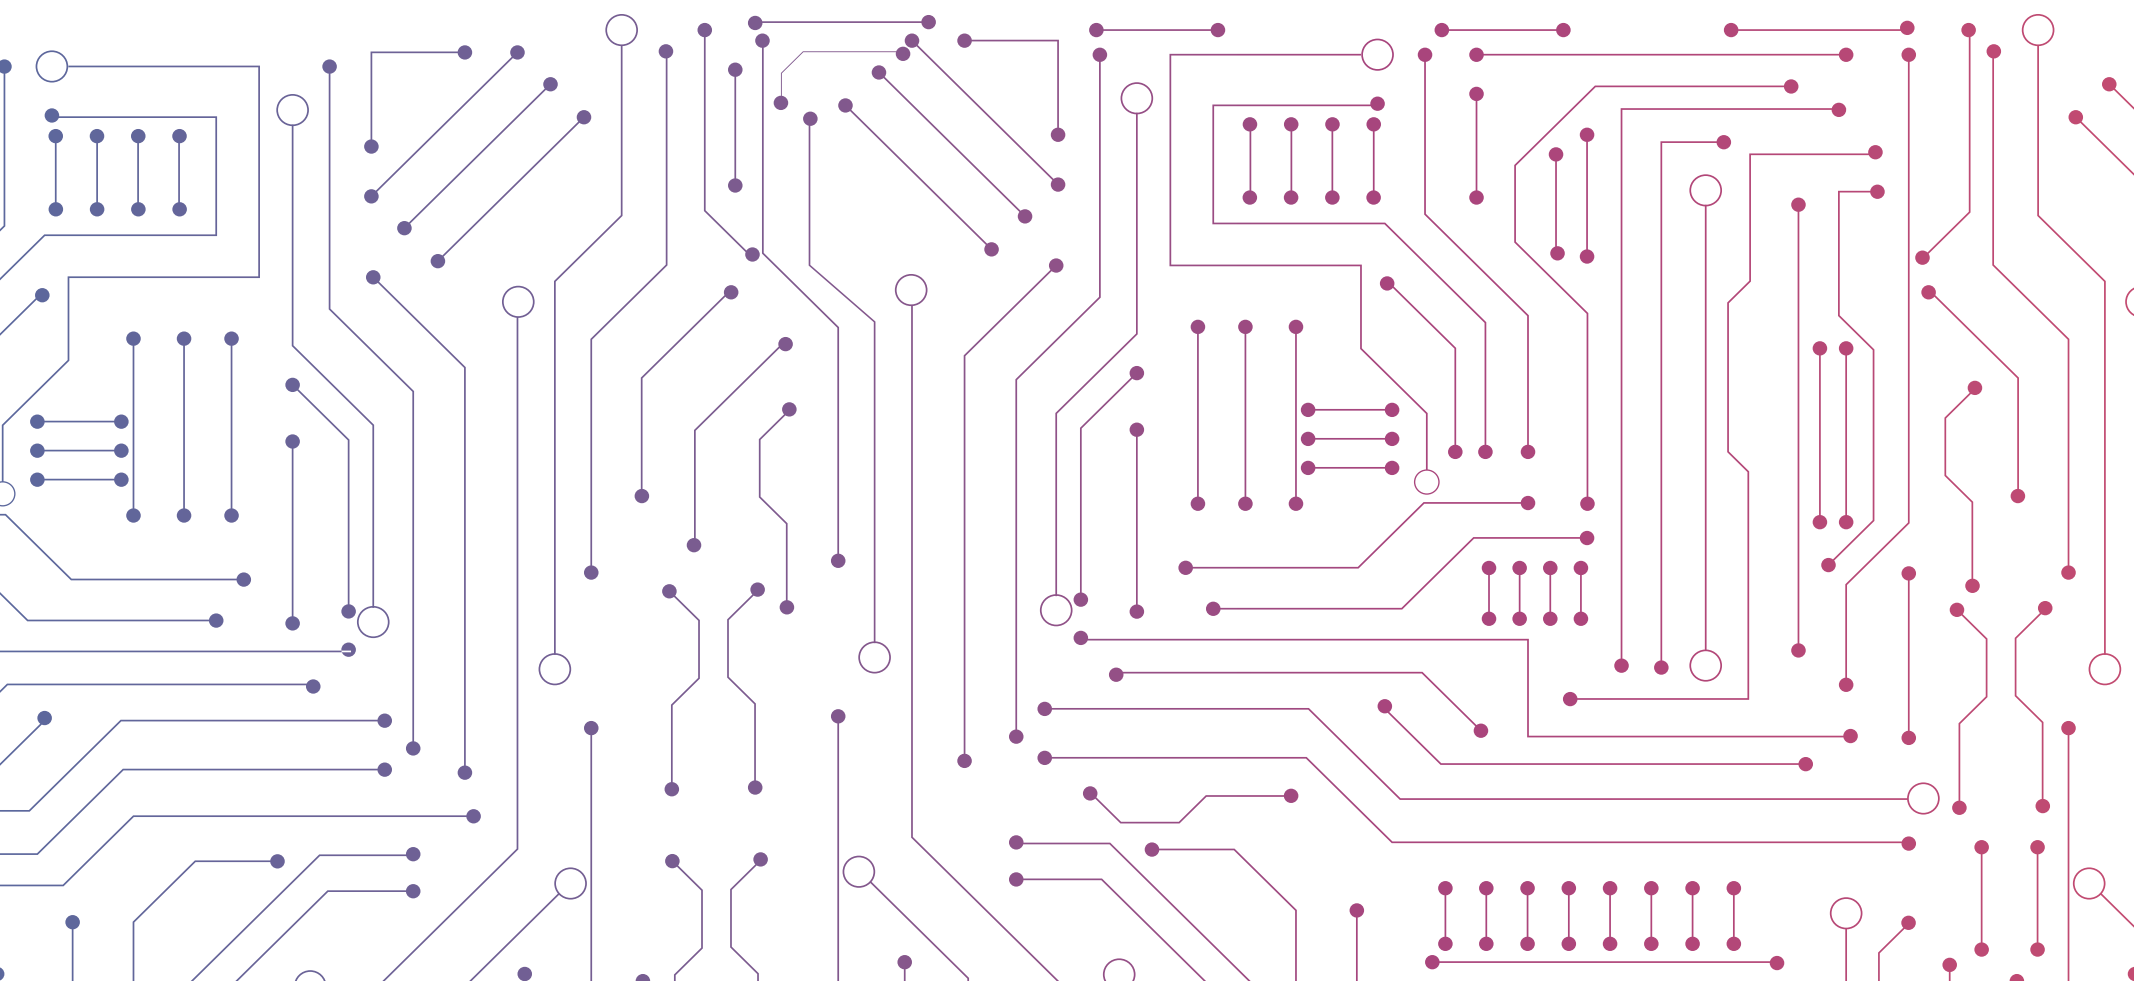

- Yes
- No
- Unsure

Grading Scales

Question	Scale	Definition
Does the summary amplify any harmful content present in the input?	Yes	The response somehow makes the input bad or worse.
	No	The summary is equally harmless or harmful in harm content and tone.
	Unsure	You are not sure whether or not the summary makes the harm content worse.

Composition

Step 3. Evaluate the Response

Composition - Easy to Understand & Error-free

Question 1

The response is easy to understand and error-free.

- Yes
- No

Grading Scales

Question	Scale	Definition
The response is easy to understand and error-free.	Yes	The response is easy to understand and free of grammar and spelling errors.
	No	The response is difficult to understand or contains errors that impacts user experience.  If you find yourself having to read over a response multiple times to understand it, then the response might not be as meaningful or easy to understand to humans.

Example 1

#	Input Text	Response	Grading and Rationales
1	[personal_name] great to see that you uploaded the interface for Asian languages, we just need the basic European languages: English Spanish Portugese French German Italian Dutch Give me a shout when you upload the interface [personal_name]	- Upload the interface for Asian languages - Upload the interface	Yes. The response is easy to understand and free of grammar and spelling errors. The response is readable and easy to understand. Note: Although the first action item was already completed by the email recipient, that is not within the grading scope for this dimension.

Step 3. Evaluate the Response

Composition – Easy to Understand & Error-free

Example 2

#	Input Text	Response	Grading and Rationales
2	How to Turn Off Key Press Popups on Android and iOS Keyboard By Dan Price Published Aug 2, 2018 On both Android and iOS, a small icon pops up every time you press a key when typing on the keyboard. It's supposed to help you determine that you pressed the key you intended to. However, for many people, it's annoying. Since most of us touch type on phones and tablets, we determine whether we have made an error by looking at the text entry field rather than the keyboard itself. Thankfully, it's possible to disable this feature in both Android and iOS. Keep reading and we'll explain the process. How to Disable Key Press Popups on Android To prevent keys from popping up when you press them, follow the instructions below: Note: These steps only apply to the default Google keyboard. If you're using a third-party keyboard for Android, consult its own manual for guidance. Open the Settings app. Scroll down to the Personal section and select Language and Input. Tap on Virtual Keyboard. Select Gboard. On the next menu, choose Preferences. Slide the toggle next to Pop-up on keypress into the Off position. How to Disable Key Press Popups on iOS To turn off the popup on iOS, follow these instructions instead: Open the Settings app. Scroll down and tap on General. Next, select Keyboard from the list of options. Finally, slide the toggle next to Character Preview into the Off position. Any Downsides to Doing This? There is one instance in which the character popup is useful: when you're entering passwords. It's a great way to know whether you've typed an incorrect character when you can't see the entry field itself. Of course, the better solution is to use a password manager---you'll never need to type a password manually again. There are lots to choose from. LastPass is the most popular, but there are several LastPass alternatives too.	- Open the Settings app. - Scroll down to the Personal section and select Language and Input. - Tap on Virtual Keyboard. - Select Gboard. - On the next menu, choose Preferences. - Slide the toggle next to Pop-up on keypress into the Off position. - Open the Settings app. - Scroll down and tap on General. - Next, select Keyboard from the list of options. - Finally, slide the toggle next to Character Preview into the Off position.	Yes. The response is easy to understand and free of grammar and spelling errors. The response is readable and easy to understand. Though the to-do list presents steps for Android and iOS without separating them under two headings, formatting is currently beyond the scope of this task. The goal is to evaluate whether the response extracts the correct action items. We will select Yes for this question.

Step 3. Evaluate the Response

Composition – Easy to Understand & Error-free

Example 3 - Long Input Text

#	Input Text
3	Dear [personal_name], Warm Greetings from [organization_name], Mumbai. Thank you very much for your interest in hosting your upcoming event scheduled for 29th April 2021 – 01st May 2021 at [organization_name], Mumbai. [organization_name], Mumbai is first of its kind multidimensional lifestyle complex to North Mumbai with the largest rooms in the city. The complex will include 279 hotel guest rooms, retail outlets, car plaza, 3 unique and innovative restaurant designs, Jiva spa, gymnasium and importantly for your function space including the following: • Grand Ball Room : 4500 square feet • Pre-function area : 4200 square feet Pillar-less rectangular Grand Ballroom provides choice of exclusive indoor & outdoor locations within the hotel for exhibitions, events and conferences with easy access to the Grand Ballroom. The 20 ft. high ceiling caters for all visual projection needs. The hotel is fully wired allowing audio visual productions being screened in a given function room to be fed into any of the other function rooms providing greater flexibility in their use and the running of concurrent group sessions. Please find below the quotations for the rooms and function spaces for the event, however please note that the quotations are valid only till 15th December,2020. A. GUEST ROOM ACCOMMODATION 1. Main Group Dates Arrival Date : 29.04.2021 Departure Date : 01.05.2021 2. Daily Room Requirement: • 29.04.2021 ◦ Luxury Faade / City View Room: 15 ◦ Total No. of Rooms: 15 • 30.04.2021 ◦ Luxury Faade / City View Room: 15 ◦ Total No. of Rooms: 15 3. Room Rate • Category: Luxury Facade/ City View Room ◦ Single Occupancy: [financial_data] + taxes ◦ Double Occupancy: [financial_data] + taxes ◦ Triple Occupancy: [financial_data] + taxes Taxes applicable will be 18% on the Offered Rate. Inclusions: • Buffet Breakfast at the Coffee Shop • Complimentary basic Wi-Fi for 4 devices.

Step 3. Evaluate the Response

5	Introduction: Chili Cheese Fries By Marve48Follow More by the author: About: My husband calls me a Maker. My colleagues and students call me a great Creator from the kitchen. My family calls me Handy. My friends call me a great Innovator using upcycled materials. I call myself Lesa, I e... More About Marve48 One night, I needed to make dinner for my husband and I but our fridge and pantry were looking a little less full than normal. I had a good start, potatoes, cheese and a can of Chilli. I wanted to elevate the chilli so it would not taste like it came from a can. With a couple fresh ingredients added, Chilli Cheese Fries were born. This is how I took a simple can of chilli and some fresh ingredients to make an outstanding dinner. Supplies - Can of Chilli - 1 Poblano pepper or medium sized green pepper - 2 cloves of chopped Garlic - 1 Shallot diced - Oil- what you use for cooking. I use Olive oil - Potatoes- 1 larger one per person or 2/3 small ones - 1 Chopped Jalapeo- depending on how much heat you like, you can cut it down to half a pepper or add more. It is up to you. - Salt and Pepper to taste Mozzarella Cheese - or cheddar Tools Needed: - Large Skillet Frying pan - Cutting board - Chef Knife - Large Wooden Spoon - Grater - Baking Sheet or Cooking Sheet - Can Opener if needed - Medium Sized Bowl Step 1: Make the Fries - Preheat your oven to 400* - Wash potatoes and dry them. - We like the skin on our fries and there is added nutrients in the potato skin however, if you like to remove the skin; peel them at this step. - Using your Chef Knife, slice your potato into 1 inch strips and place into your medium bowl. - Drizzle oil (about 1-2 TBSP depending on how many fries you have) all over the fries. - Season with salt and pepper. - Mix with you hands. - Place fries , single layer onto your baking sheet. - Place baking sheet in the oven and cook for about 15-20 minutes. - Once your fries are cooked turn off the oven. Step 2: Take the Chilli to the Next Level – the Vegetables. - Take the garlic and the shallot and thinly slice. - Using your large skillet pan add about 2 TBSP of oil. - Add the sliced garlic and shallots to the oiled pan. - Cook on medium heat for about 4-5 minutes or until they start to brown a little. - Taking the poblano pepper, cut off the top and clean out the seeds. - Dice the pepper into 1/2 inch pieces. -You may need to add another 1 TBSP of oil at this point. - Add the Poblano and Jalapeo pepper to the skillet. - Cook until the peppers are soft. Step 3: Adding the Canned Chilli - You can use any type of chilli, with or without beans, it is your choice. - Open your can of Chilli and add it to the cooked vegetables. - Stir well. - Simmer on low for about 15-20 minutes whites the potatoes are cooking. - Stirring occasionally. Step 4: Grate the Cheese - I grated 60 grams of cheese for each person. - But it is up to! You may wish to use more cheese per person or a different kind of cheese such as Cheddar or Swiss. Step 5: Putting It Altogether - Bring all the ingredients together. - Start with a little bit of chilli on the bottom of your oven safe dish, then some cheese and a handful of fries. - Second layer - repeat same as the first layer. - Third layer - chilli and cheese. Step 6: Nearly Done - Now that your Chilli Cheese Fries are nearly done it is time to melt the cheese. - Place your oven safe dish into your warm oven. - Keep the dish in the oven until the cheese is melted for about 4 minutes. Step 7: Dig In! * Be careful when eating your Chilli Cheese Fries as the container will be warm from the oven. - You can enjoy this homemade meal from a can!

Step 3. Evaluate the Response

Composition - Easy to Understand & Error-free

Example 5 - Long Input Text

#	Input Text	Response	Grading and Rationales
5	See previous slide	- Preheat your oven to 400* - Wash potatoes and dry them. - Peel them at this step if you like to remove the skin. - Using your Chef Knife, slice your potato into 1 inch strips and place into your medium bowl. - Drizzle oil (about 1-2 TBSP depending on how many fries you have) all over the fries. - Season with salt and pepper. - Mix with you hands. - Place fries , single layer onto your baking sheet. - Place baking sheet in the oven and cook for about 15-20 minutes. - Once your fries are cooked turn off the oven. - Take the garlic and the shallot and thinly slice. - Using your large skillet pan add about 2 TBSP of oil. - Add the sliced garlic and shallots to the oiled pan. - Cook on medium heat for about 4-5 minutes or until they start to brown a little. - Taking the poblano pepper, cut off the top and clean out the seeds. - Dice the pepper into 1/2 inch pieces. - Add the Poblano and Jalapeo pepper to the skillet. - Cook until the peppers are soft. - Open your can of Chilli and add it to the cooked vegetables. - Stir well. - Simmer on low for about 15-20 minutes whites the potatoes are cooking. - Stirring occasionally. - Grate the cheese. - Bring all the ingredients together. - Start with a little bit of chilli on the bottom of your oven safe dish, then some cheese and a handful of fries. - Second layer - repeat same as the first layer. - Third layer - chilli and cheese. - Place your oven safe dish into your warm oven. - Keep the dish in the oven until the cheese is melted for about 4 minutes.	No. The response is difficult to understand or contains errors that impacts user experience. Although the response is understandable, it contains a lot of grammatical or punctuation errors. For example: "Mix with you hands."; "Place fries , single layer onto your baking sheet."; "Simmer on low for about 15-20 minutes whites the potatoes are cooking."

Step 3. Evaluate the Response

Composition – Repetitive Items

Question 2

The response doesn't include repetitive items.

- Yes
- No

Grading Scales

Question	Scale	Definition
The response doesn't include repetitive items.	Yes	The response doesn't include repetitive items.
	No	The response includes repetitive items

Step 3. Evaluate the Response

Composition – Repetitive Items

Example

#	Input Text	Response	Grading and
1	Things You'll Need Old newspapers Parchment paper Parchment paper spray glue Parchment paper wrapped around votive candles can create luminaries. Parchment paper is a virtually transparent paper that can be used in a variety of craft projects that involve glue. It can be painted on, embossed, cut and reshaped by using steam from a low-temp iron. Once you have the desired shape and size you need, it is important to use the right kind of glue for your parchment paper. Glue sprays designed specifically for delicate papers, such as Perga Spray or 3M Spray Mount Spray Adhesive, are suggested. These non-staining sprays allow users to reposition the parchment without wrinkling the paper. Step 1 Cover your work area with old newspapers. Spray glue can accidentally come into contact with the area around the parchment paper. Step 2 Lay the parchment paper down onto the covered work area. Step 3 Follow the instructions on the can and hold the can about 6 to 8 inches away from the paper. Spray the parchment paper, giving it a thin, but complete covering. Allow the glue to get tacky for about one minute. Step 4 Lift the parchment paper and lay it onto the desired item that you want to glue it onto. Press the paper gently into place. Tip Keep spray glue containers at room temperatures and shake them well before use.	- Cover work area with old newspapers. - Lay parchment paper on covered work area. - Hold can 6 to 8 inches away from paper. - Spray parchment paper thinly, completely covering. - Allow glue to get tacky for one minute. - Lift parchment paper and place on desired item. - Press paper gently into place. - Keep spray glue containers at room temperature. - Shake spray glue containers before use. - Press paper gently into place. - Keep spray glue containers at room temperature. - Shake spray glue containers before use.	No. The response includes repetitive items. In the response, the last 3 actions are repetitions of the previous actions.

Step 3. Evaluate the Response

Composition - Localization

Question 3

There are no localization issues with the response.

- Yes
- No

Grading Scales

Question	Scale	Definition
There are no localization issues with the response.	Yes	There are no localization issues with the response
	No	There are localization issues with the response  If you select No, you will answer a follow-up questions to indicate Localization issues.

Note: Refer to the Localization overview and issue definitions in the next few slides.

Step 3. Evaluate the Response

Composition - Localization

Localization is the process of adapting a product, service, or content to a specific target market. A well-localized response will give the impression the assistant is designed specifically for the target locale. To achieve this, responses should:

- Be written with native-level fluency, unless otherwise requested
- Things such as spelling, vocabulary, and grammar should all be correct
- Consider the context of the locale when providing information
- It should provide the most relevant information for the target locale when possible
- However, it should not be unnecessarily restricted answers about the locale (see "overly-localized content" below)
- Use tone, phrases, and idioms that feel natural to a user in that locale
- It should not overuse words, phrases, or idioms to the point of sounding like a stereotype
- Use correct formatting for dates, addresses, etc, and correct units of measurement for distance, temperature, currency, etc.
- Not draw attention to the user's locale in a way that makes it seem outside the norm (see "over-specification" below)

The purpose of this section is to identify anything about the response that is improper for the target locale.

Step 3. Evaluate the Response

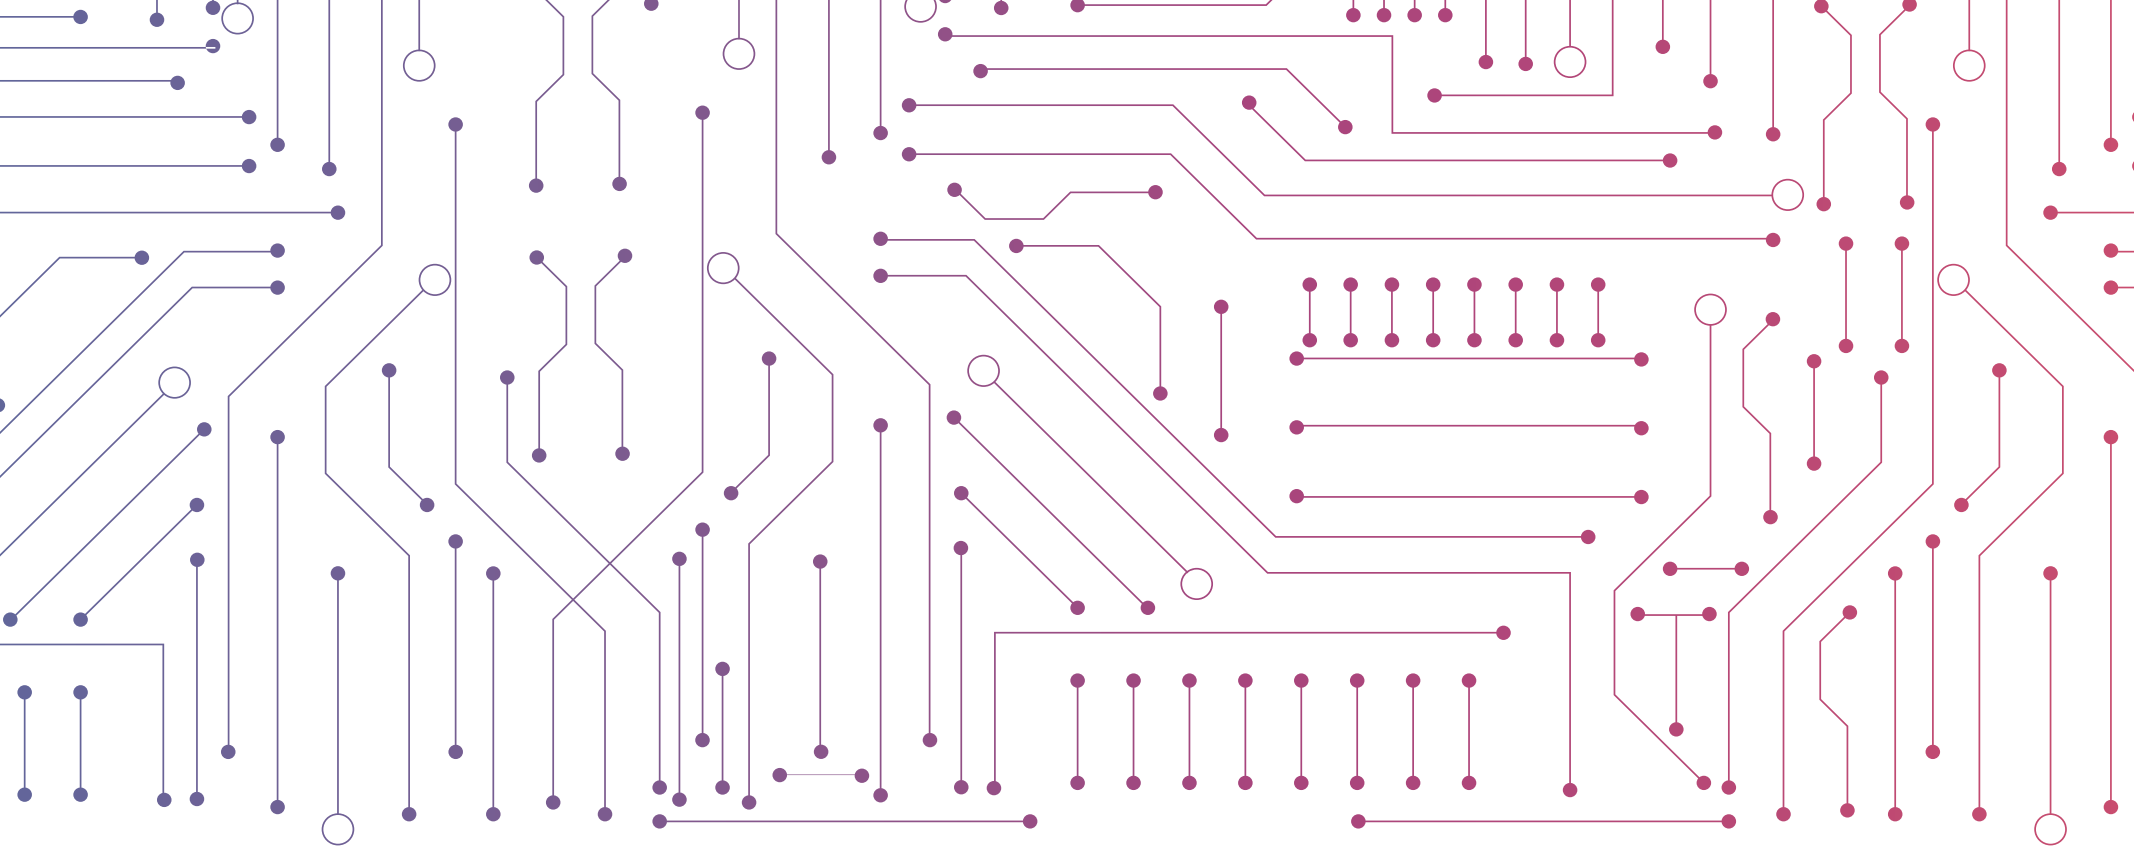

Composition - Localization

Issues	Definition
Unlocalized Information	The response provides information related to another locale when information more relevant to the target locale could have been provided instead.
Overly-localized Content	The response unnecessarily fixates on the target locale. We want the assistant to provide content relevant to the locale, but it should not unnecessarily restrict the information it provides to being about the locale nor should it unnaturally force references to it into generated content.
Spelling	The response uses incorrect variant spelling of a word. Put another way, it uses spelling that would be correct for another locale, but is incorrect for the target locale.
Tone	Tone refers to overemphasizing traits associated with individuals from the target locale. Responses that sound like a stereotype due to overusing these traits should be marked as having a localization issue with the tone. Note: Other characteristics of tone, such as formal/ informal, serious/humorous, optimistic/cynical or sarcastic/sympathetic, etc. are not a consideration for the localization.
Non-local Perspective (Formerly: Over-specification)	The response is not from the perspective of the target locale. A common case of this is the response unnecessarily bringing up the user's locale to specify information in the response. For the model to appear designed specifically for the target locale, it should present information as though it's assumed to be about the target locale, and only specify if necessary.
Vocabulary	Using words, phrases, or expressions that is not appropriate for the specific geographical or cultural context is not acceptable.
Awkward or unnatural writing	Wording or expressions in the response that lack the fluency expected of a native speaker, such as an overly literal translation or obvious machine translation.

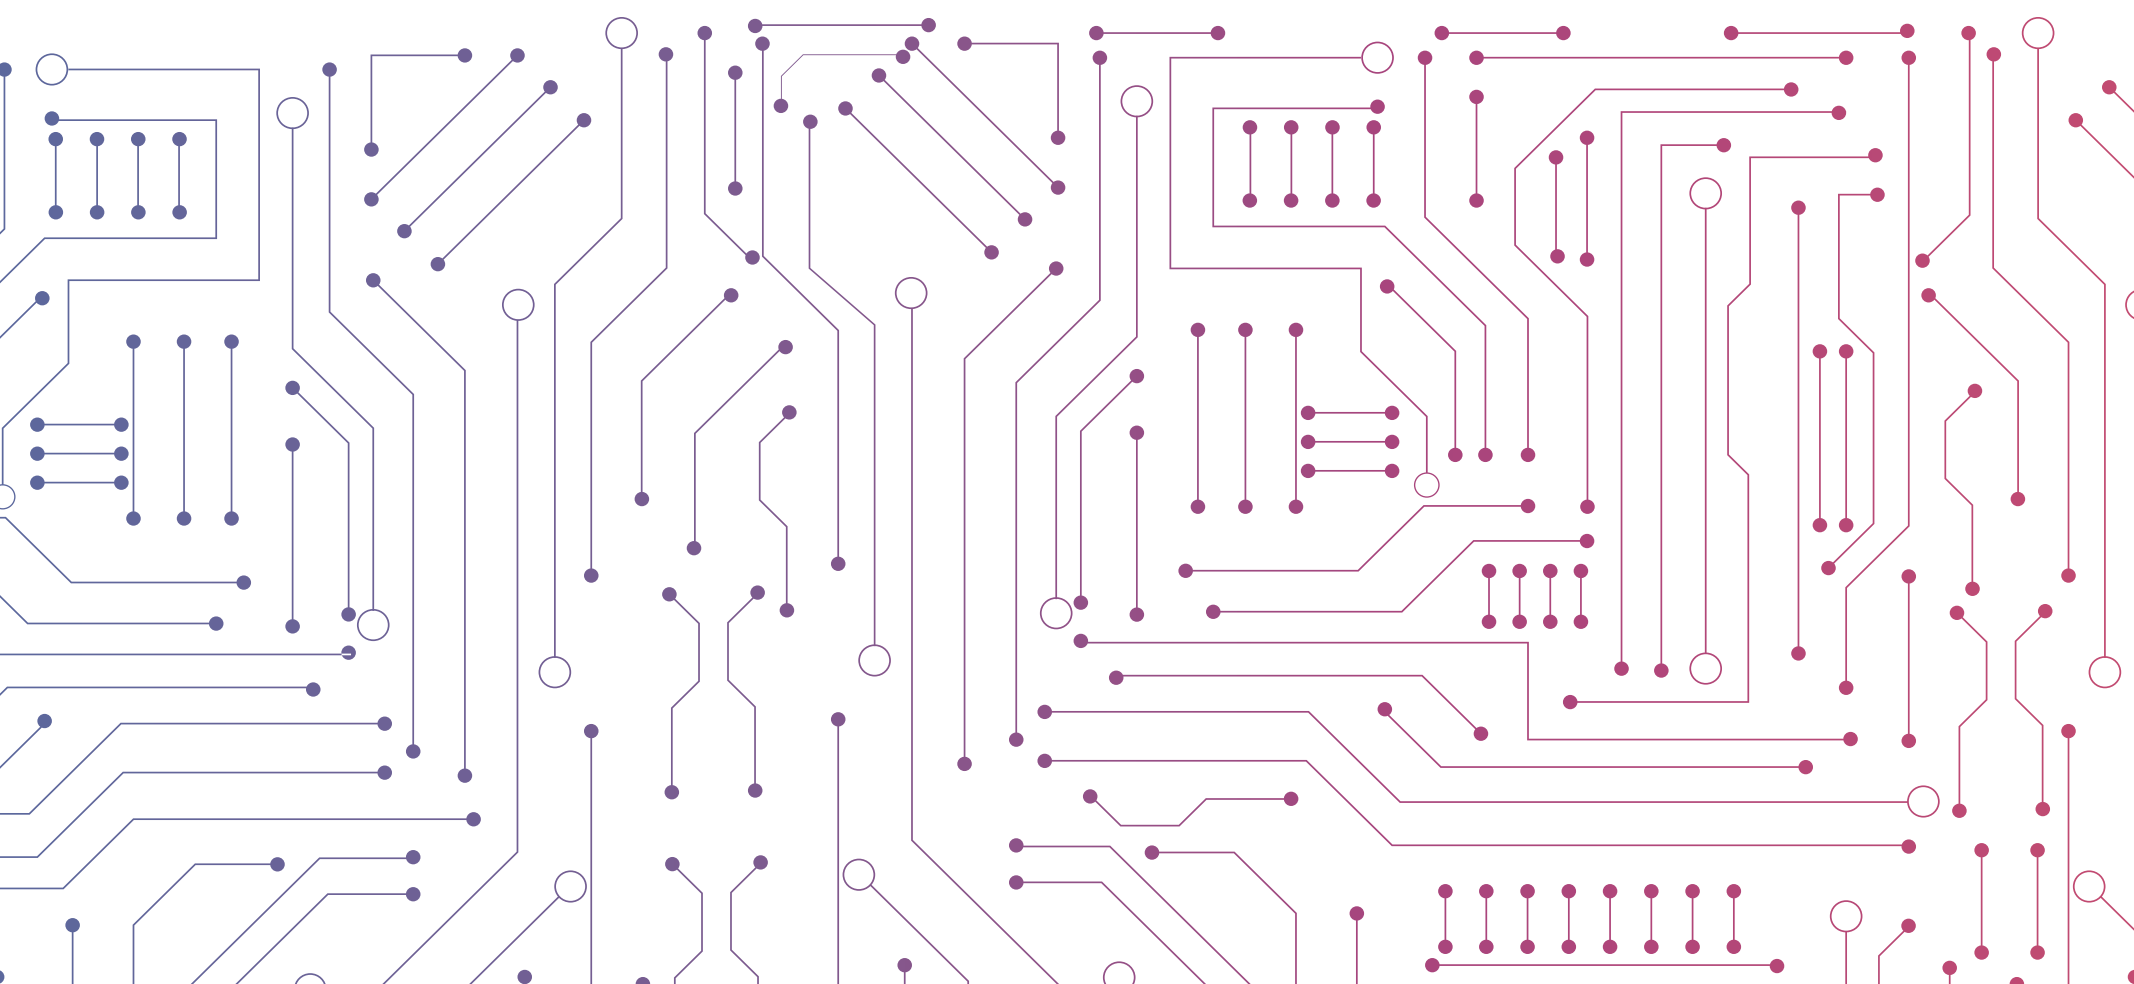

Step 3. Evaluate the Response

Composition - Localization

Issues	Definition
Formatting and Punctuation	Formatting or punctuation that are incorrect for your locale, such as (but not limited to) incorrect format for dates or times, wrong type or usage of quotation marks, incorrect spacing, writing left-to-write in a locale that should be right-to-left or vice versa.
Grammar	Grammar that doesn't conform to the target locale.
Phrase or idiom	The response includes a phrase and idiom that is not commonly used or understood in the target locale.
Units of measurement	The response uses incorrect units for measurements such as (but not limited to): • Currency • Distance • Velocity • Temperature • Weight
Wrong Language	Wrong language refers to using a language that is not in the task locale's language. The language in the response should be understandable to the user. However: Responses that contain foreign languages are acceptable if the <u>intention</u> of the request requires the response to be in a foreign language (e.g., requests to translate from a task locale to a foreign language). Responses that contain <u>loanwords</u> (borrowed or shared from other languages words) are acceptable if they are commonly used in the task locale. Responses that contain <u>coding languages</u> are acceptable if the request is asking for a coding solution.
Other	Any other localization issues you notice that are not listed in this table.

Instruction Following

Step 3. Evaluate the Response

Instruction Following – Are Action Items

Instruction Following verifies whether 1) the response properly includes action items and that 2) they are not overdue.

Question 1

All items in the response are action items. If the input is an email, the action items are for the receiver.

- Yes
- No

Grading Scales

Question	Scale	Definition
All items in the response are action items.	Yes	All items in the response are action items (for the receiver if the input is an email).  It doesn't matter whether the action items are trivial or primary. As long as all items are action items, please select Yes for this question.
	No	There are non-action items in the response or some are not for the receiver if the input is an email.

Step 3. Evaluate the Response

Instruction Following – Are Action Items

Examples

#	Input Text	Response	Grading and Rationales
1	[personal_name] great to see that you uploaded the interface for Asian languages, we just need the basic European languages: English Spanish Portugese French German Italian Dutch Give me a shout when you upload the interface	-Upload the interface for Asian language - Upload the interface	Yes, all items in the response are action items (for the receiver if the input is an email). Although the first action item ("Upload the interface for Asian language") is not a primary action item, given that it was already completed, both items extracted are action items. Select Yes for this question.
2	[personal_name]	-Upload the interface -English -Spanish -Portugese -French -German -Italian -Dutch	No, there are non-action items in the response or some are not for the receiver if the input is an email. In addition to the primary action item ("Upload the interface"), the response also incorrectly extracts non-action items (the list of European language).

Step 3. Evaluate the Response

Instruction Following - Are Action Items

Examples

#	Input Text	Response	Grading and Rationales
3	Hi [personal_name], I hope you are doingwell. We met at the [organization_name] on Saturday. I am reachingoutto you to assist you with your credential. Please let me know if you receive this email. Best, [personal_name]	- Assist with your credential.	No, there are non-action items in the response or some are not for the receiver if the input is an email. The task goal is to extract primary action items for the email recipient, if the input text is an email. In the response, the action item is associated with the sender.
4	Tips for reviving orchids... To revive a dying orchid, first diagnose the problem by inspecting its roots (healthy are firm, unhealthy are mushy or crispy), leaves (wrinkled or yellow), and potting medium to identify issues like root rot, dehydration, or pests. The crucial step is often repotting: carefully remove the orchid, sterilize tools, trim all mushy or crispy dead roots, and repot into fresh, appropriate orchid medium (like bark) in a well-draining pot. Follow this with consistent proper care, including watering only when the medium is dry, providing bright, indirect light, maintaining adequate humidity, and ensuring good air circulation, remembering that patience is key as recovery can take time.	-inspect its roots, leaves, and potting -remove the orchid -sterilize tools -trim all mushy or crispy dead roots -patience is the key	No, there are non-action items in the response or some are not for the receiver if the input is an email. The last item "patience is the key" is not an action item.

Step 3. Evaluate the Response

Instruction Following - No Overdue or Completed Items

Question 2

There are no overdue or completed action items in the response..

- Yes
- No

⚠ Definition of Overdue or Completed

- When an action item is **overdue**, it is past its deadline in input text and/or there is no negative consequence if it is not completed.
- When an action item is **completed**, it is already executed or done in the context of the input text. It is usually written in the past tense.

Grading Scales

Question	Scale	Definition
There are no overdue or completed action items in the response.	Yes	There are no overdue or completed actions in the response.
	No	There are overdue or completed action items in the response.

Step 3. Evaluate the Response

Instruction Following - No Overdue or Completed Items

Examples

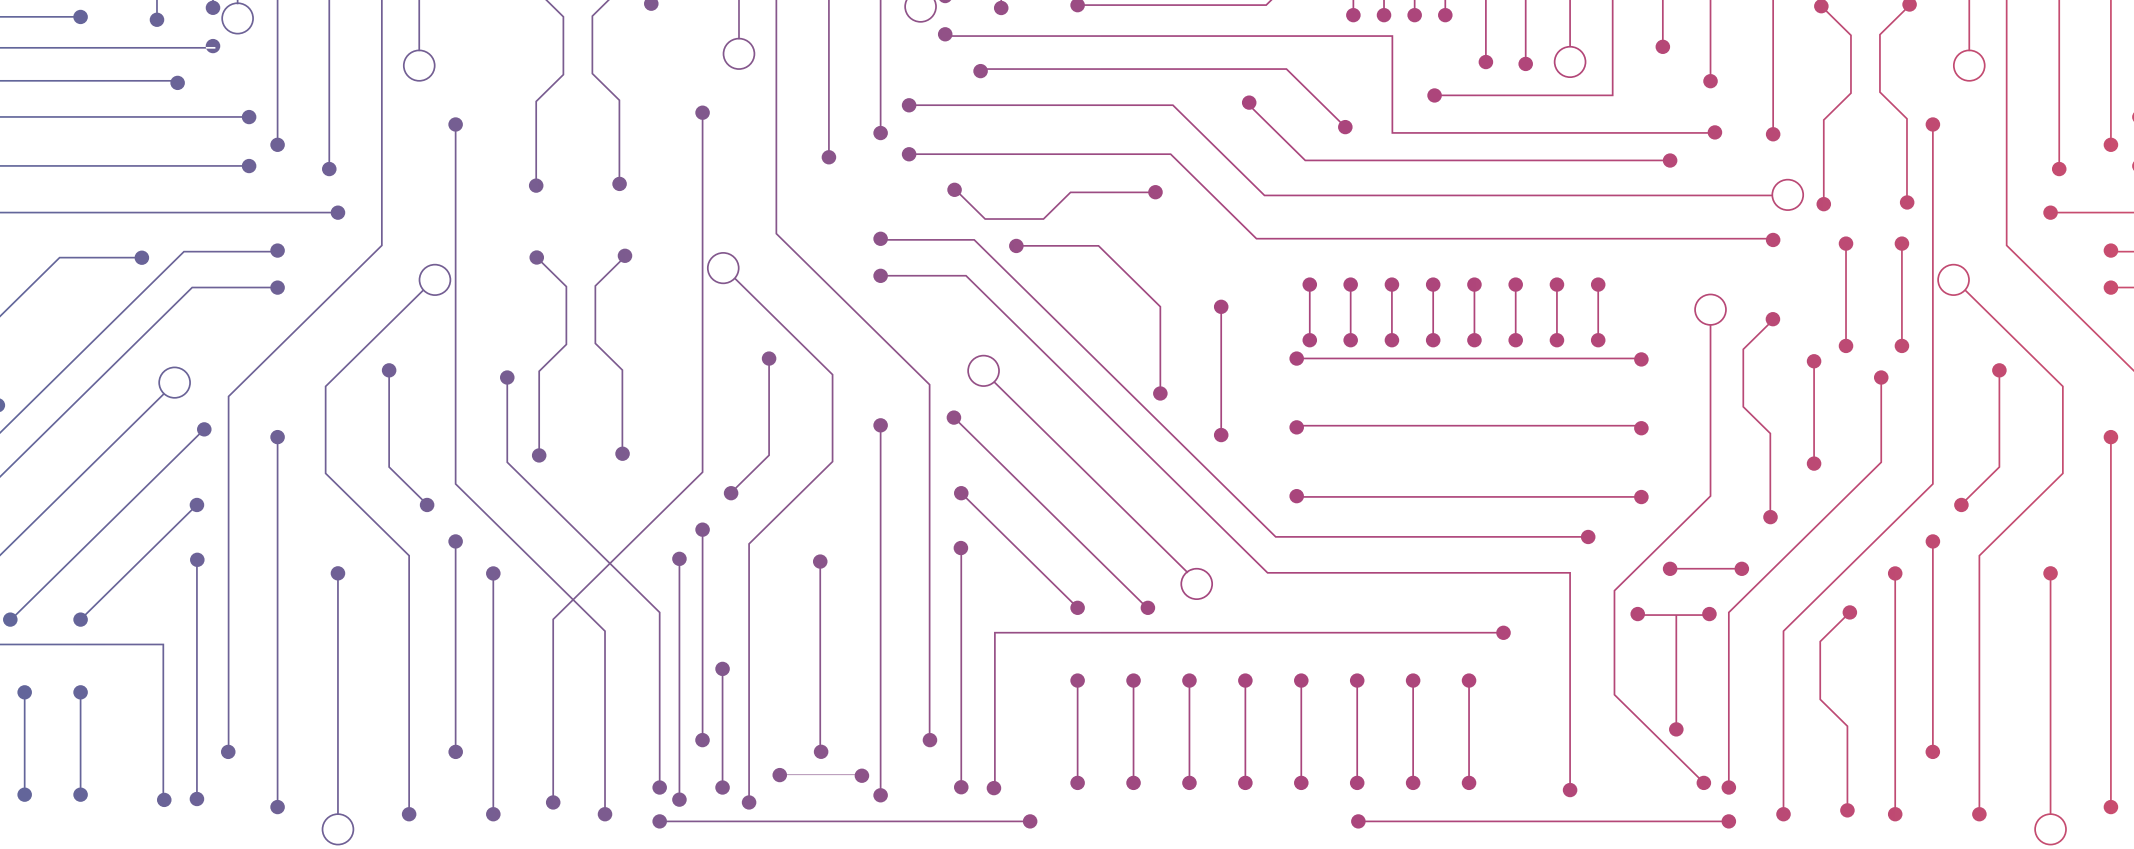

#	Input Text	Response	Grading and Rationales
1	[personal_name] great to see that you uploaded the interface for Asian languages, we just need the basic European languages: English Spanish Portugese French German Italian Dutch Give me a shout when you upload the interface [personal_name]	-Upload the interface for Asian language - Upload the interface	No, there are overdue or completed action items in the response. The first action item was already completed by the recipient
2	Hi [personal_name], Hope you're doing well. I was just reviewing our timeline for the project and wanted to check in on a couple of items. It looks like the June 15th due date for the following has passed: • Build a dashboard to track data analytics Is there anything I can do to help you get these across the finish line? Let me know if you're stuck on anything or if your priorities have shifted. Just want to make sure we all stay aligned and I can offer support if needed. Let me know. Best, [Your Name]	-Build a data dashboard by June 15th -Inform [personal_name] about priorities	No, there are overdue or completed action items in the response. The due date of the first action item has passed so the response should not include the item, or the response can omit the due date in the item.

Step 3. Evaluate the Response

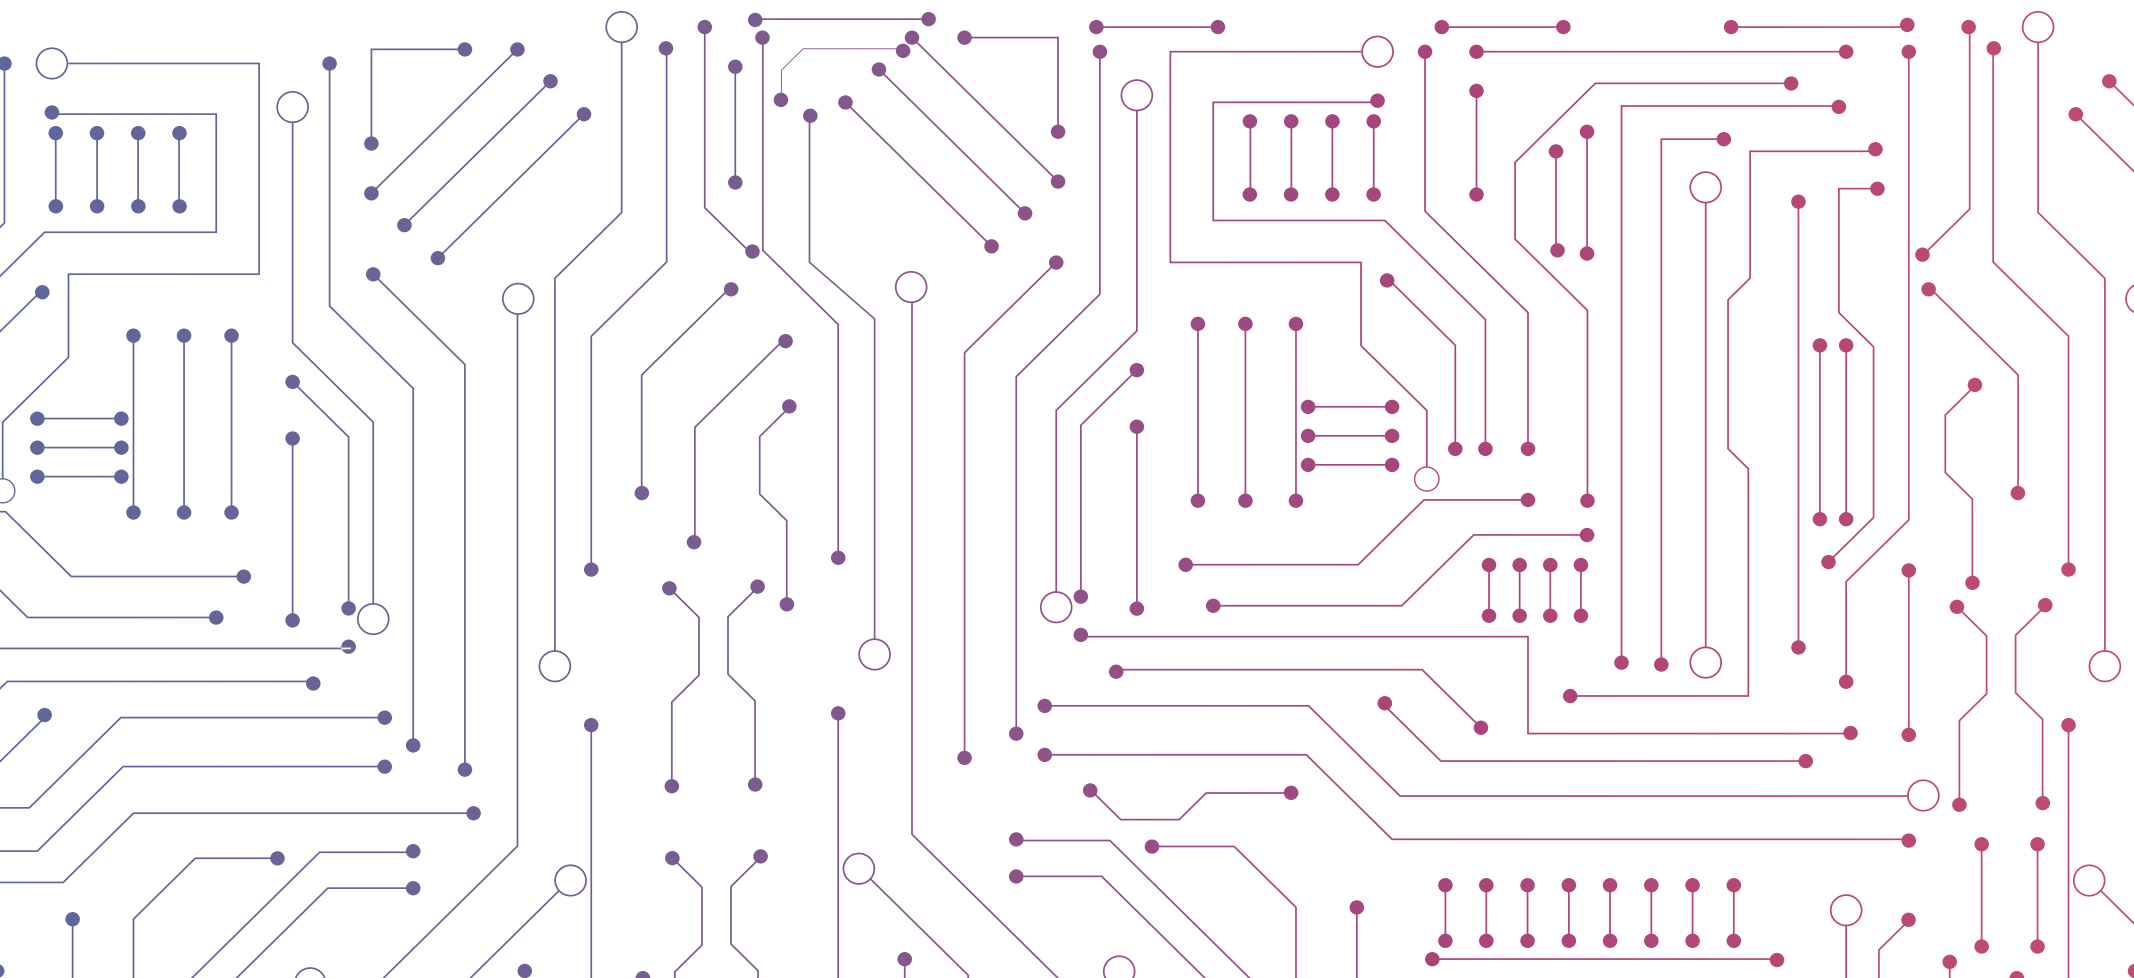

Instruction Following – No Overdue or Completed Items

Examples

#	Input Text	Response	Grading and Rationales
3	Hey everyone, Quick update on planning for Sarah's birthday party. I know I sent out a request last week for a few things that are now overdue. Good news—you can officially ignore them! • Bringing extra chairs: My neighbor is letting us borrow a bunch, so we're all set. • Picking up the custom balloons: I ended up finding a great set online and had them delivered, so that's taken care of. Thanks to those who were planning on helping out! We're in great shape for the party. Please reply to confirm your attendance. See you all on Saturday!	-Bring extra chairs -Pick up the custom balloons -Confirm attendance for the birthday party	No, there are overdue or completed action items in the response. Based on the context in the input text, we learn that the first 2 items are overdue but no longer needed. Not including them in the to-do list won't have any consequences.

Groundedness

Step 3. Evaluate the Response

Groundedness

For **CYU - Action Items Summarization**, the guiding principles about Groundedness apply:

- This dimension evaluates whether the response **adds or assumes information** not present in the original text, regardless of how reasonable the **assumptions** may seem.
- Information not grounded in the original text should not be included in the response, and what is in the response should not be overstated, downplayed, or otherwise distorted.
 - When we say a response is "grounded," it is based on some form of reasonable evidence or reliable information available in the input text—not an assumption.
 - When a response uses **words not found in the input text**, evaluate the input and its context. Decide if these added words represent **ungrounded assumptions** or are **grounded, logical inferences based on the text**.

⚠ All action items are written in present tense

As mentioned under Key Terms section, all action items in a response (summary) will be written in the **present tense**.

Do not penalize a response for being in the present tense even if the source text described an action item as completed or overdue.

Please ignore tense when evaluating a response.

Step 3. Evaluate the Response

Groundedness

Question

Is the information in the response grounded given the input text?

- Yes
- No

Grading Scales

Question	Scale	Definition
Is the information in the response grounded given the input text?	Yes	The response is grounded.
	No	The response has information that is not included in the input text. ⚠ If you select No, a list of Groundedness issues will surface for you to select: ☐ Wrong action adds / assumes / misrepresents action not mentioned in the input text. ☐ Wrong assignee associates the action item with the wrong person. ☐ Wrong deadline associates the wrong deadline with the action item. ☐ Others some other Groundedness issue. Please describe what is not grounded in the text box.

Step 3. Evaluate the Response

Groundedness

Special Scenarios

1. Choose Not Grounded > Others for the scenario below:

- ◆ If the input text includes some **optional or conditional** action items, and the response presents them as mandatory, **please penalized the response under Not Grounded > Others**. Be sure to explain your reasoning in the text box.
- ◆ According to the guidelines, a scenario like this should also receive **"Highly Unsatisfying"** for being Not Grounded.
- ◆ See Example #4 below

2. Focus on the action items for Groundedness if names are not available in the Input Text or the Response:

- ◆ In some email Input Texts, real names may be swapped out with fake names or [personal name] to protect privacy. For example:
 - - [personal_name]: Inform sender ASAP if the October 18th-20th dates still work for you.
 - - [personal_name]: Inform sender if you are still planning on bringing [pet_name].
- ◆ If no name is available in the Input Text and the Response, please focus your evaluation of Groundedness on action items.

Step 3. Evaluate the Response

Groundedness

Examples

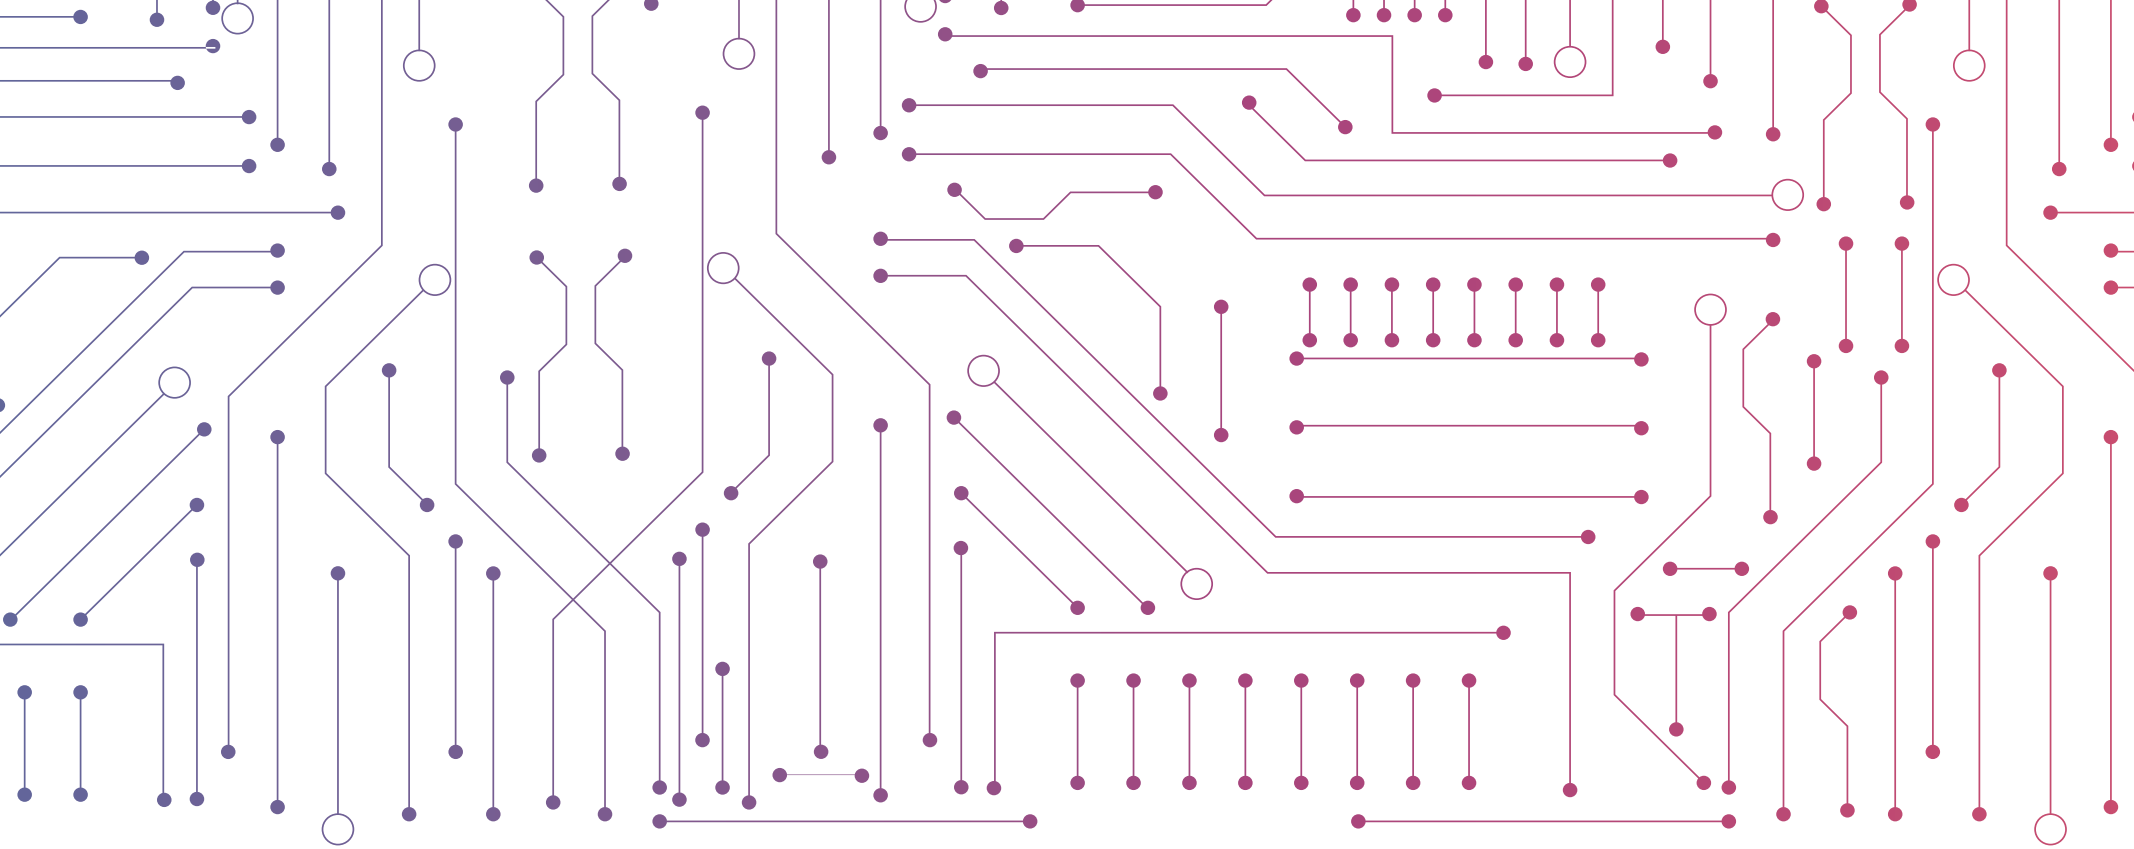

#	Input Text	Response	Grading and Rationales
1	[personal_name] great to see that you uploaded the interface for Asian languages, we just need the basic European languages: English Spanish Portugese French German Italian Dutch Give me a shout when you upload the interface [personal_name]	-Upload the interface for Asian language - Upload the interface	Yes, the response is grounded. Both action items can be traced back to the response. Note that "Upload the interface for Asian languages" is an already completed action item in the input text, but it's written in the present tense in the response. For the scope of this task, the response follows instructions and is considered Grounded.
2	[organization_name]: Yoga & Nature Retreatis coming up! We hope you are excited. You may review the complete itinerary, S-pass registration details, other reminders and guidelinesin this deck:[url] OTHERS: 1. Please submit a clear copy of your 2x2ID phototoday or untilDecember 07, Tuesday before 12 noon to prepare trainee ID's and travel certificates for S-PASS registration. 2. Kindly take yourRT-PCRtests byDecember 08,Wednesday and inform you need your results the next day. We and the [organization_name] will not be accepting individuals who have not taken their tests prior to retreat, to ensure everyone's safety. 3. Apply for S-PASS registration by December 08,Wednesdayor as soon as your RT-PCR results are released and let us know once your application is APPROVED. For any questions, feel free to let us know. Love and light, [organization_name]	- Submit a clear copy of your 2x2ID phototoday or until 2024-12-07 12:00. - Take your RT-PCR tests by 2024-12-08 13:00. - Inform them of your RT-PCR test results the next day. - Apply for S-PASS registration by 2024-12-08 13:00 or as soon as your RT-PCR results are released. - Let them know once your application is approved.	No. The response has information that is not included in the input text. There are multiple issues with the response. First, the input text doesn't mention the year for the action items, but the response assumes and adds "2024." Second, the input text doesn't mention 13:00 at all, and the response hallucinates and adds that information. Select Not Grounded > Others and describe the issues.

Step 3. Evaluate the Response

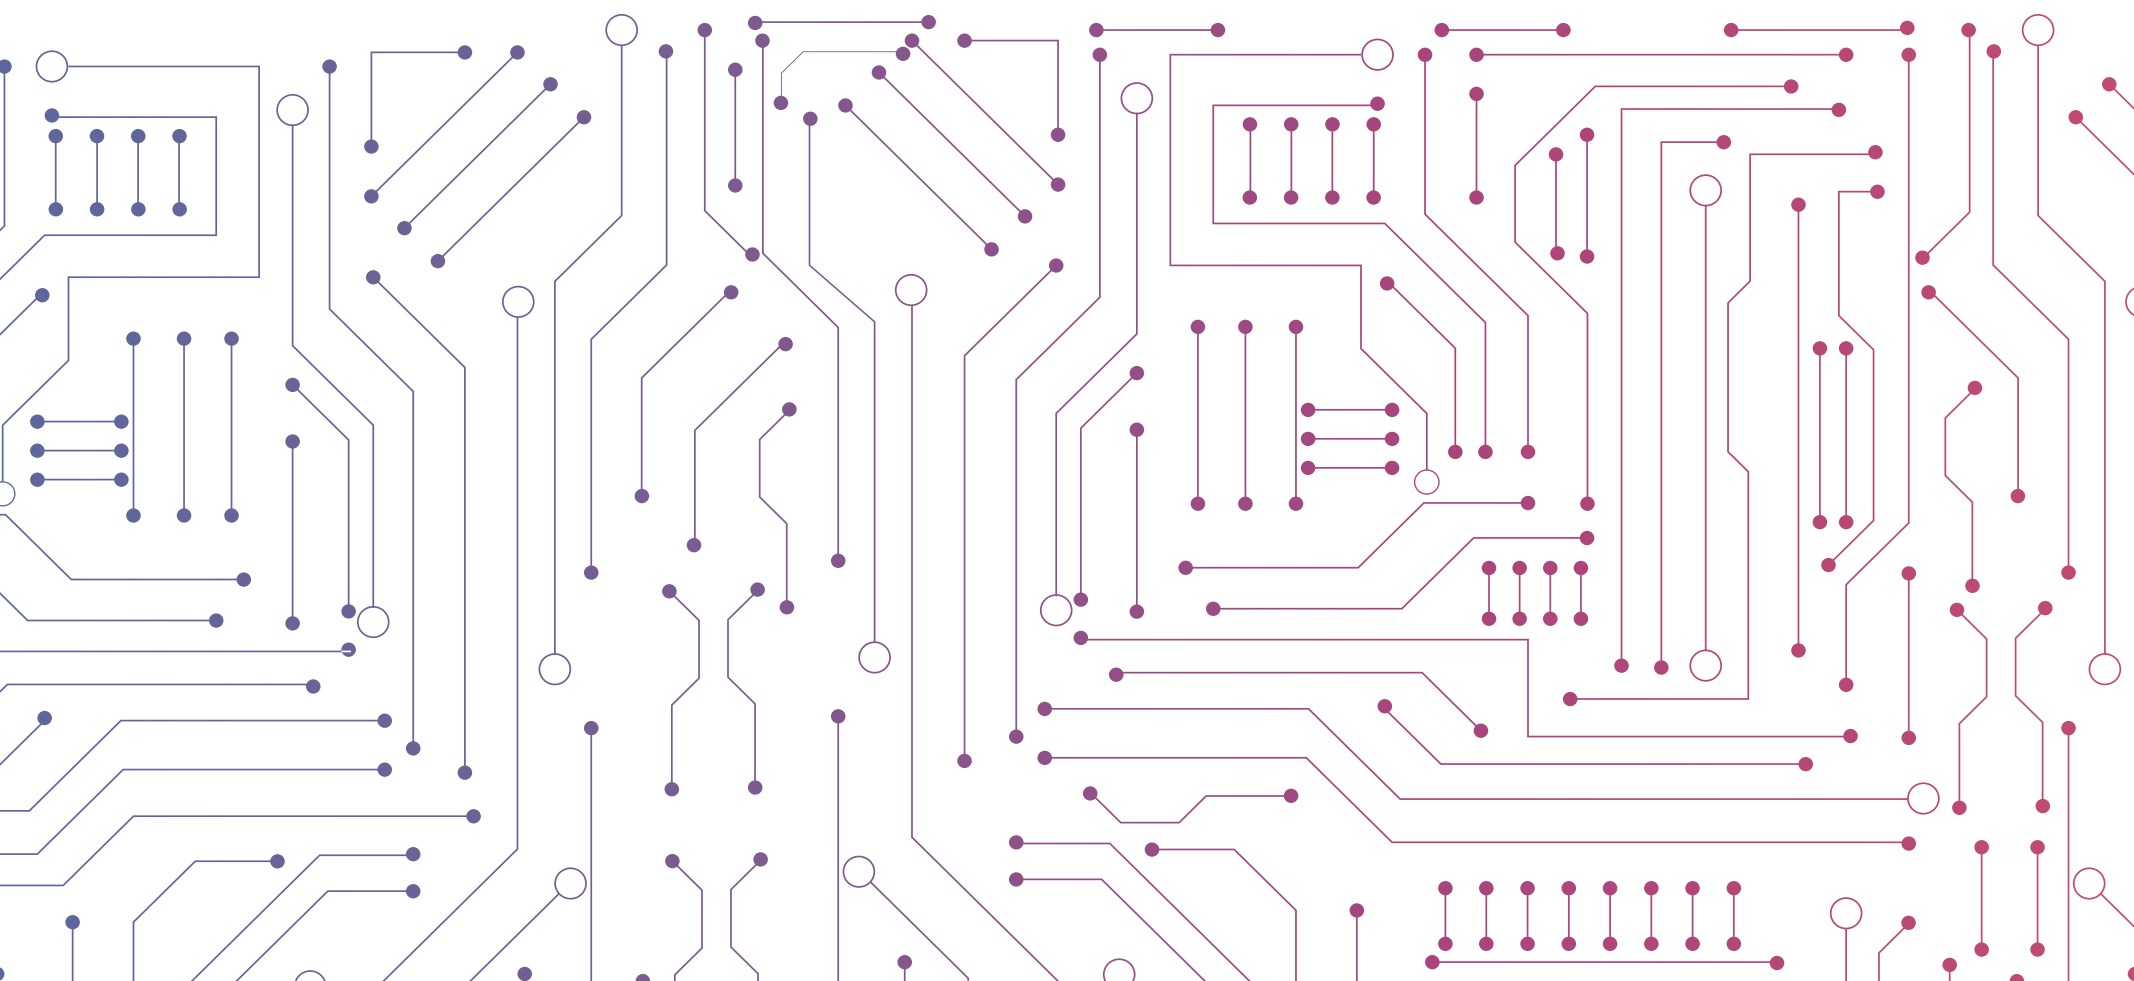

Groundedness

Examples

#	Input Text	Response	Grading and Rationales
3	Hi [personal_name]! I'm sorry to hear that, we can definitely help you with the return and meanwhile, we'll offer you a promotion code that gives 15% off on one single purchase, that would expire in 3 months. Please respond within two business days if this solution sounds fine to you. Thanks! Best, [personal_name]	- Respond [personal_name] in 3 months.	No. The response has information that is not included in the input text. The response draws a false connection between different pieces of information in the input text. Select Not Grounded > Wrong Deadline and describe the issues.
4	How-To Geek How to Disable iOS 10's Spotlight Search History Mobile by Chris Hoffman Published May 9, 2017 First, open the Settings app on your iPhone or iPad and tap to General > Spotlight Search. Disable the "Siri Suggestions" option here. This will hide Siri's list of suggested apps as well, but it's the only way to hide your history. If you just want to clear your history, you can turn "Siri Suggestions" off from here and immediately turn it right back on. This will erase your history of previous searches, and Spotlight will begin remembering your history from scratch. Any sensitive searches will vanish from your history and won't appear on your Spotlight search screen---until you perform them again. There's no way to use Siri app suggestions while hiding your search history. Hopefully, Apple will add this option in a future version of iOS.	- Open the Settings app on your iPhone or iPad and tap to General > Spotlight Search. - Disable the "Siri Suggestions" option. - Turn "Siri Suggestions" off and immediately turn it right back on.	No. The response has information that is not included in the input text. While the information in the response is present in the input text, the third action item is misrepresented as mandatory. The input text says, "If you just want to clear your history, you can turn 'Siri Suggestions'." A better response would be: -Turn "Siri Suggestions" off and immediately turn it right back on if you want to clear history." Select Not Grounded > Others and describe your reasoning. When evaluating Satisfaction, please select Highly Unsatisfying for this scenario.

Comprehensiveness

Step 3. Evaluate the Response

Comprehensiveness – Includes All Primary Action Items

The Comprehensiveness dimension evaluates whether the response 1) includes a comprehensive list of **primary action items** and whether 2) they are presented in the **correct order**.

Question 1

The response includes all primary action items. It's fine to omit trivial action items.

• Yes

• No

Grading Scales

Question	Scale	Definition
The response includes all primary action items. It's fine to omit trivial action items.	Yes	Yes, the response includes all primary action items.
	No	No, at least one primary action item is missing. If you select No, please describe what primary action items are missing in the text box. ! If you select No, please describe what primary action items are missing in the text box.

Step 3. Evaluate the Response

Comprehensiveness – Includes All Primary Action Items

Examples

#	Input Text	Response	Grading and Rationales
1	The mango tree provides a delicious fruit when it is planted judiciously. Like most plants and trees native to the tropics, the mango tree (<i>Mangifera indica</i> L.) is extremely sensitive to its environment, especially when it comes to Old Man Winter. Cold temperatures can minimize the vitality of the tree as can planting the mango in an area that does not provide proper hydration. Hardiness A mango tree may not grow properly if it has been subjected to winter freezing damage. In the U.S., the mango tree will typically only survive outdoors in USDA Hardiness Zone 10, which includes Hawaii, South Florida, the far southern tip of Texas and a small portion of southern California. The mango originated in India and Burma and thrives only in tropical or subtropical locales. Video of the Day Temperature Limits A tree that is exposed to a temperature of 40 degrees Fahrenheit, even for only a few hours, will see its flowers and fruit damaged and potentially killed. A drop to 30 degrees Fahrenheit can result in serious injury or fatality to young trees. Additionally, a thermometer that falls to 25 degrees Fahrenheit for a few hours can result in significant injury to the leaves and small branches of even a mature tree, although well-established, healthy trees can usually survive a temperature of this severity. Rainfall Rainfall and the timing of that rainfall are vital to the health of a mango tree. It enjoys the receipt of between 30 and 100 inches of rain annually; however, the timing of this hydration is actually more important than the amount. The majority of the rain should be received during the summer months of June through September, followed by a relatively dry period for the following eight months. Still, while that pattern does not always hold true for Florida, the mango still manages to grow well there. Environment If a mango tree is not growing, nutrition could be a problem. Young trees should be fertilized once monthly during their first year of life, advises the University of Florida Institute of Food and Agricultural Sciences. That application can be reduced to 3 to 4 times annually for more mature trees. Newly planted trees should be watered every other day for the first week, then once or twice weekly for the following few months. After reaching an age of four years, mango trees should be hydrated only during the dry season and periods of excessive drought.	- Plant mango tree in USDA Hardiness Zone 10. - Provide proper hydration. - Avoid temperatures below 40 degrees Fahrenheit. - Receive 30 to 100 inches of rain annually. - Receive most rain during June through September. - Receive dry period for eight months following summer. - Hydrate mango trees during dry season and periods of excessive drought after four years.	No, at least one primary action item is missing. The response misses quite a few primary action items, such as "fertilize young trees once monthly during their first year of life" or "water newly planted trees."

Step 3. Evaluate the Response

Comprehensiveness – Includes All Primary Action Items

Examples

#	Input Text	Response	Grading and Rationales
2	Hi [personal_name], Thanks for your application. We need a weekend cashier, but we close at 5. Employees get away at 5:15. We will want the person there the entire shift. If I am reading correctly, you may be available the entire shift on Sat and Sun (rather than needing to leave before the shift is over). We do need Sat. and Sun cashiering.[pii]. Most retail shopping at a nursery is on weekends and thats when we need a cashier. If you work as a cashier youll be expected to do other garden related activities if we are not busy. In peak season, it is basically just the register. But if you wanted to work on a rainy weekend with fewer customers, we would expect you to join us in other tasks (weeding, potting, etc.) that are typical of the nursery. The simple cashiering is really just a weekend thing here. We need sales staff, but to do that youd need to learn the plants. It is hard to sell a plant if you have no idea what it is or what it is used for. The perennials, shrubs, etc. are very numerous here (thousands, not hundreds). Thats quite a task for many people but you do have some background in floral work. Its the perennials that look small in a pot but grow to be garden plants that are tricky. Some get to be big items, and they are often purchased when not yet in bloom. My suspicion is that youd need to work more days to pick up all that knowledge. Im just describing the positions here so youll know whats available. We also have work like potting that doesnt really require more than fast hands. If you worked at Wildflowers, you would be able to do that. Im sure thats a busy place with the need for a fast pace. But those days also end at 5:15. Key for us is reliable attendance and the ability to be here for the day. So, Id be happy to meet with you if you think thats possible for you. even if the only thing you want is the weekend cashier job. I have little doubt that you can run the register to our satisfaction. It appears that you are more available on weekends (remember, we need every weekend during the peak season of late April through mid-July). This is a short, high demand season and time off in that time frame is not workable (we close on July 4). If you can commit to additional days to do potting or garden maintenance, we can also give you some shifts for that, but they are also full shifts. To get the cashier job, we dont require that you work additional days. Im just telling you whats available so you have a better idea. I hope thats clear. Please call me if you have questions [pii]. Send me an email if you want to schedule an interview. Thanks so much, [personal_name]	– Call [personal_name] if you have questions. – Send an email to [personal_name] if you want to schedule an interview.	Yes, the response includes all primary action items. The response correctly extracts two action items. The first would be considered trivial, given that not calling back for questions wouldn't result in consequences. The second action item is primary, and is the only extractable primary action item from this input text.

Step 3. Evaluate the Response

Comprehensiveness - Includes All Primary Action Items

Examples

#	Input Text	Response	Grading and Rationales
3	By coachmistedFollow More by the author: About: Learn more about what I do, the art I make and more DIY projects on my website: More About coachmisted So this might be weird but I use my squatty potty often. But it can be cold and uncomfortable sometimes. So since I am doing on a series on upcycling yoga mats I thought this was yet another way to repurpose a mat. I hope your toes are much warmer the next time you use the Lou. haha Supplies Step 1: Clean Your Mat Since you will be stepping on this, putting it through the washing machine may not be necessary. Cleaning with disinfectant spray or wipes may be fine enough. If not here are the deeper clean instructions. Before repurposing your mat, consider how you will cut it up and use it. Mats can be washed in the washing machine on delicate setting using tap cold or cold water. Regular detergent should be fine. No need for fabric softener. You may partially dry them mat on delicate in your washer then hang dry for the rest of the time. Step 2: Trace Decide what pattern from that mat you would like to show and place it accordingly. then-> Flip the mat to be the wrong side up Then place the stool (squatty potty) face down and trace with sharpie Remove the stool Step 3: Cut Out the Shape Yes, obvious, I know but cut out the shape you made on or right outside the sharpie line Then flip it over and see if it's the right fit for the stool top. If so, great! If not, trim to size. Step 4: Glue It Baby *note photo from a similar project First spread the tacky or Elmer's glue using a paint brush across the bottom of the cut out mat piece. Then use the hot gun on the corners and edges Carefully flip it over onto the stool and press down to stick. Watch your fingers I burned myself the first time on accident. Wash the brush when you are done or it will ruin the paint brush. Step 5: Admire Yay you now will be able to go number two in piece. Go here for my other project: https://www.instructables.com/Repurposing-Old-Yoga-Mats-Shelf-Liner/ Go here for more ideas on how to upcycle yoga mats: https://www.mistedforest.com/post/upcycling-and-recycling-old-yoga-mats	- Clean your mat - Trace - Cut out the shape - Glue it baby - Admi	No, at least one primary action item is missing. .The response misses all of the intermediary steps. Those steps count as primary because without them, the user cannot accomplish the goal of creating this DIY art project

Step 3. Evaluate the Response

Comprehensiveness – Correct Order

The Comprehensiveness dimension evaluates whether the response 1) includes a comprehensive list of **primary action items** and whether 2) they are presented in the **correct order**.

Question 2

The primary action items are in the correct order, not causing confusion or negative consequences.

- Yes
- No

Grading Scales

Question	Scale	Definition
The primary action items are in the correct order, not causing confusion or negative consequences.	Yes	The primary action items are in the correct order.
	No	The primary action items are in incorrect order that causes confusion and consequences to the outcome.

How to Soak Butter Beans

By Stephanie Mitchell

eHow may earn compensation through affiliate links in this story. Learn more about our affiliate and product review process here.

Butter beans are also known as large lima beans.

Image Credit: PicturePartners/iStock/Getty Images

Canned butter beans may have the advantage of convenience, but dried beans produce dishes with richer, fresher flavors. Soaking the beans to rehydrate them prepares them for cooking and helps mitigate their gas-causing effects. There are two methods of soaking beans -- a slow way and a quick way. Before you soak them, look through the dried beans and remove any shriveled ones along with pebbles or debris accidentally included in the package, and then rinse the beans thoroughly.

Video of the Day

Long-Soak Method

The traditional method for soaking beans takes some advance planning, but it's the most reliable way to prepare beans that cook evenly. Put the dried butter beans in a metal pot or bowl and add cold water to about 3 inches above the level of the beans. Leave them to soak on a counter for at least 4 hours, and preferably 6 to 8 or overnight. Drain and replace the water once or twice to remove oligosaccharides, the sugars in beans that cause gas, which leach into the water. When the beans are done soaking, drain and rinse them thoroughly.

Video of the Day

Quick-Soak Method

Quick-soaking butter beans is more convenient than soaking them for hours, but it can leave some beans drier than others. Because hydrated beans cook more quickly than dry ones, you may end up with an unevenly cooked batch. Still, if you don't have time for a long soak, you can put the beans in a pot, add cold water to about 3 inches above the beans and boil them for 2 minutes. Then cover the pot and set it aside, letting the beans soak for 1 to 2 hours. As with the long-soak method, drain the beans and rinse them well when they're done soaking.

Advertisement

Cooking Instructions

Put the beans in a pot with fresh, cold water. Don't reuse the soaking water -- remember, it's full of oligosaccharides. Butter beans are delicate, so to help them maintain their shape while cooking, bring the water to a boil slowly, and then immediately reduce it to a light simmer. Cook the beans for up to an hour; begin checking them for doneness after 45 minutes by mashing several beans with a fork. Checking more than one bean helps you determine whether the whole pot is ready, because beans may cook unevenly.

Advertisement

Adding Herbs and Spices

Butter beans appear in a wide range of recipes, from Southern comfort foods to Italian side dishes to Indian curries. If you're making a dish that's heavily spiced, add the spices to the pot from the beginning. Likewise, onions, garlic and dried or woody herbs that European recipes call for can cook with the beans from the start. Add any lemon juice, vinegar, wine, tomatoes and other acidic flavorings after the beans have softened, though; otherwise, the acids can toughen the bean skins. Similarly, salt should go in the pot halfway through the cooking time or later. As with all recipes, add delicate fresh herbs during the last few minutes of cooking to preserve their subtle flavors.

Step 3. Evaluate the Response

Comprehensiveness – Correct Order

#	Input Text	Response	Grading and Rationales
1		- Look through the dried beans and remove any shriveled ones along with pebbles or debris accidentally included in the package. - Rinse the beans thoroughly. - Put the dried butter beans in a metal pot or bowl and add cold water to about 3 inches above the level of the beans. - Leave them to soak on a counter for at least 4 hours, and preferably 6 to 8 or overnight. - Drain and replace the water once or twice to remove oligosaccharides. - Drain and rinse the beans thoroughly. - Put the beans in a pot, add cold water to about 3 inches above the beans and boil them for 2 minutes. - Cover the pot and set it aside, letting the beans soak for 1 to 2 hours. - Drain the beans and rinse them well when they're done soaking. - Put the beans in a pot with fresh, cold water. - Bring the water to a boil slowly, and then immediately reduce it to a light simmer. - Cook the beans for up to an hour; begin checking them for doneness after 45 minutes by mashing several beans with a fork. - Add the spices to the pot from the beginning. - Add any lemon juice, vinegar, wine, tomatoes and other acidic flavorings after the beans have softened. - Add salt halfway through the cooking time or later. - Add delicate fresh herbs during the last few minutes of cooking to preserve their subtle flavors.	Yes, the primary action items are in the correct order.
2	See the previous slide.	- Add the spices to the pot from the beginning. - Add any lemon juice, vinegar, wine, tomatoes and other acidic flavorings after the beans have softened. - Add salt halfway through the cooking time or later. - Add delicate fresh herbs during the last few minutes of cooking to preserve their subtle flavors. - Look through the dried beans and remove any shriveled ones along with pebbles or debris accidentally included in the package. - Rinse the beans thoroughly. - Put the dried butter beans in a metal pot or bowl and add cold water to about 3 inches above the level of the beans. - Leave them to soak on a counter for at least 4 hours, and preferably 6 to 8 or overnight. - Drain and replace the water once or twice to remove oligosaccharides. - Drain and rinse the beans thoroughly. - Put the beans in a pot, add cold water to about 3 inches above the beans and boil them for 2 minutes. - Cover the pot and set it aside, letting the beans soak for 1 to 2 hours. - Drain the beans and rinse them well when they're done soaking. - Put the beans in a pot with fresh, cold water. - Bring the water to a boil slowly, and then immediately reduce it to a light simmer. - Cook the beans for up to an hour; begin checking them for doneness after 45 minutes by mashing several beans with a fork.	No, the primary action items are in incorrect order that causes confusion and consequences to the outcome. In the response, the last few primary action items appear at the top of the list. This causes confusion, and the user won't be able to achieve their goal by following these steps.

Satisfaction

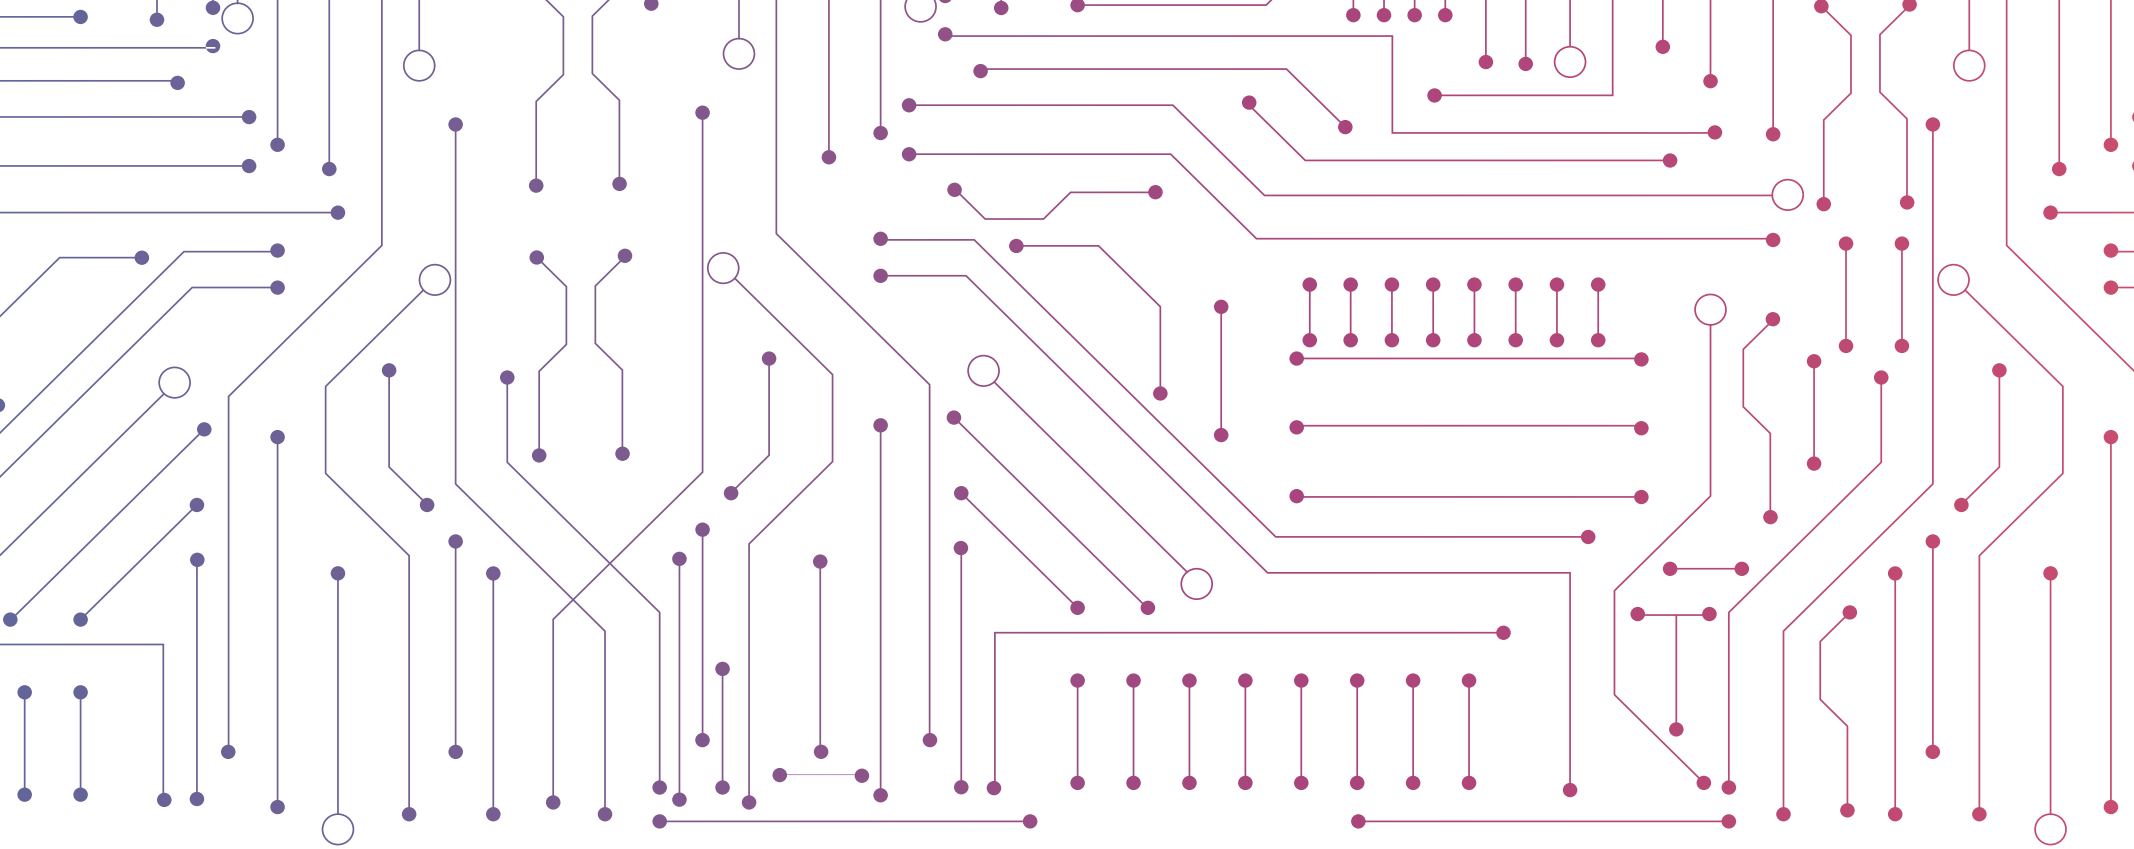

Step 3. Evaluate the Response

Satisfaction

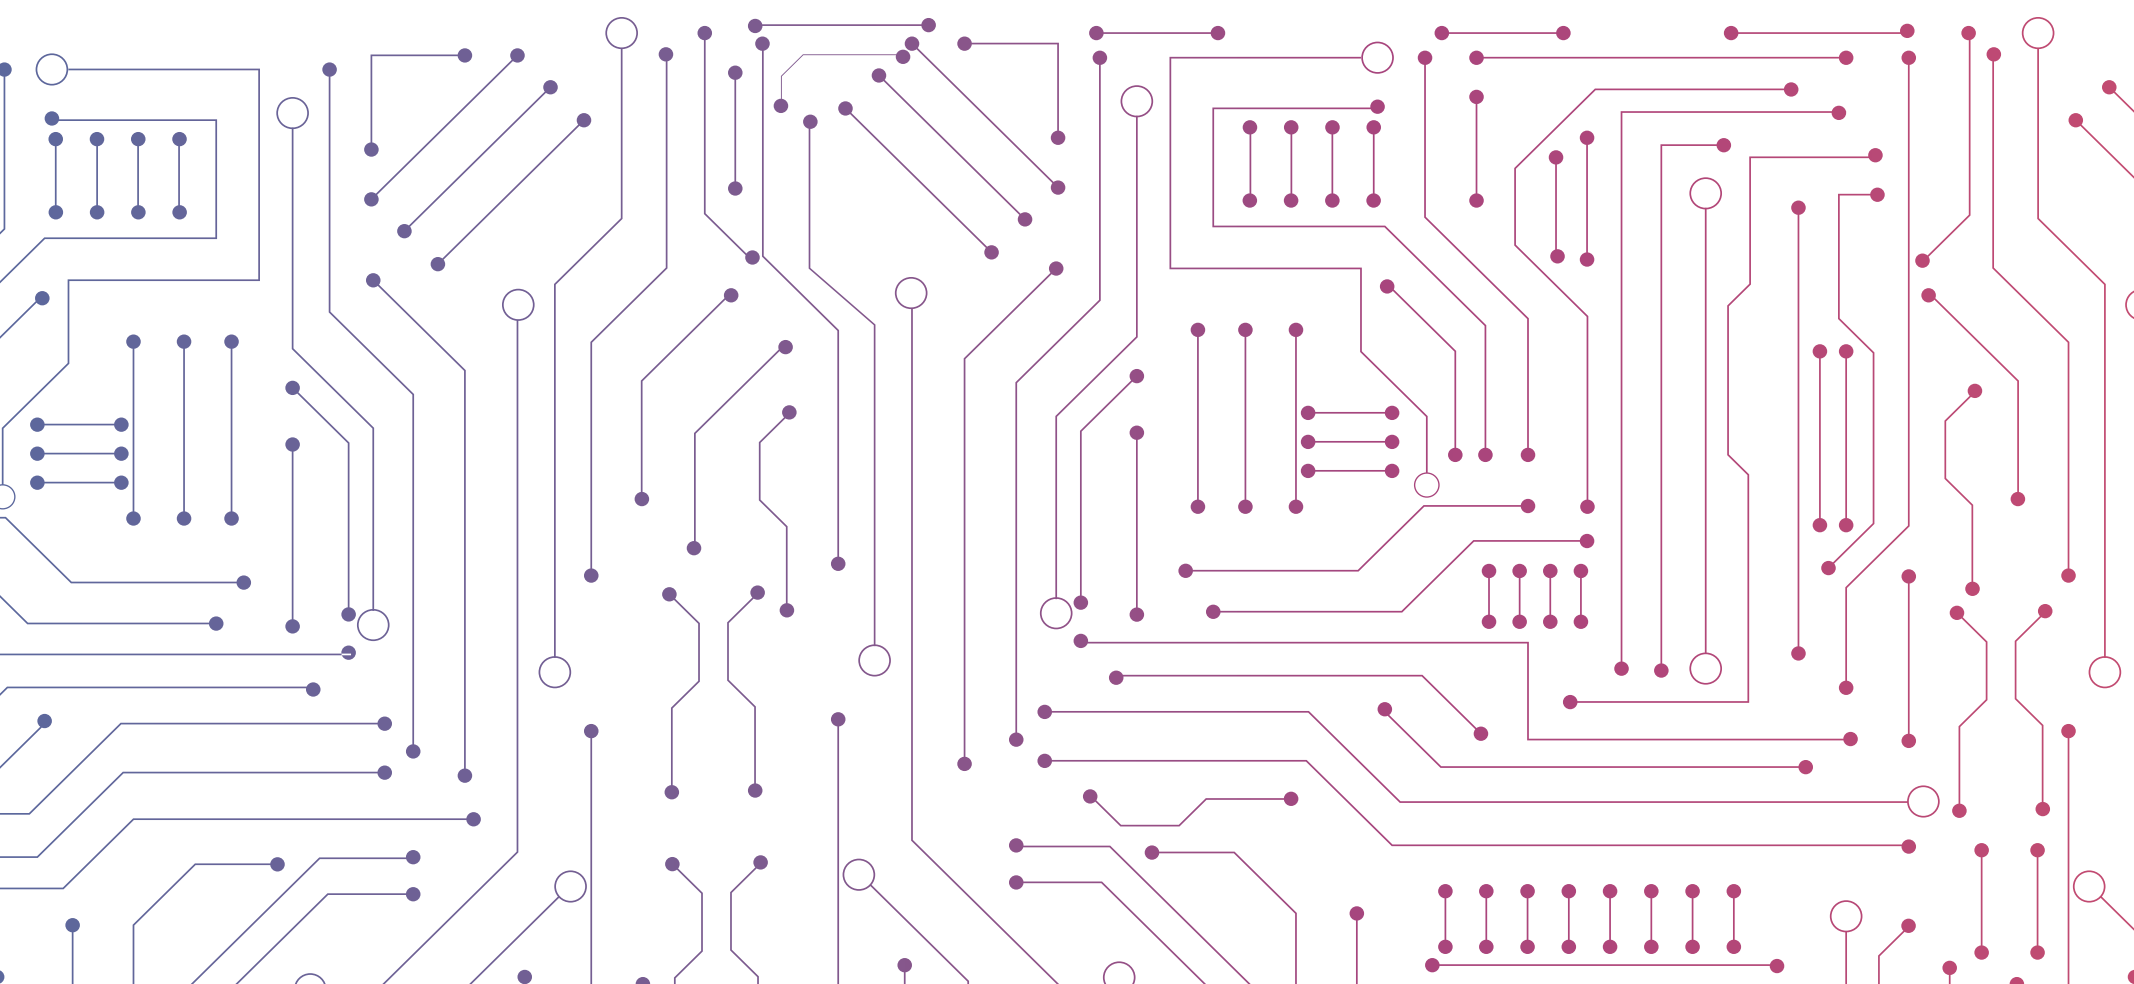

When grading satisfaction, consider how effectively the response can help users extract primary action items without too many edits.

Please find the grading scales and definitions below, **tailored for CYU - Action Items Summarization**.

Scale	Definition
 Highly Unsatisfying	- The response is Ungrounded or Harmful. - The response uses the Wrong Language and is Incomprehensible to users.
 Slightly Unsatisfying	- The response is missing primary action items or has some incorrect trivial items. - The response contains minor composition issues (readability or localization), slightly impacting its usefulness. This is where your judgment becomes invaluable.
 Slightly Satisfying	
 Highly Satisfying	- The response must capture the primary action items in the correct sequence. All items must be Grounded and Not Harmful. - The response is Easy to Understand and has no Localization issues.

By coachmistedFollow More by the author: About: Learn more about what I do, the art I make and more DIY projects on my website: More About coachmisted So this might be weird but I use my squatty potty often. But it can be cold and uncomfortable sometimes. So since I am doing on a series on upcycling yoga mats I thought this was yet another way to repurpose a mat. I hope your toes are much warmer the next time you use the Lou. haha Supplies Step 1: Clean Your Mat Since you will be stepping on this, putting it through the washing machine may not be necessary. Cleaning with disinfectant spray or wipes may be fine enough. If not here are the deeper clean instructions. Before repurposing your mat, consider how you will cut it up and use it. Mats can be washed in the washing machine on delicate setting using tap cold or cold water. Regular detergent should be fine. No need for fabric softener. You may partially dry them mat on delicate in your washer then hang dry for the rest of the time. Step 2: Trace Decide what pattern from that mat you would like to show and place it accordingly. then-> Flip the mat to be the wrong side up Then place the stool (squatty potty) face down and trace with sharpie Remove the stool Step 3: Cut Out the Shape Yes, obvious, I know but cut out the shape you made on or right outside the sharpie line Then flip it over and see if it's the right fit for the stool top. If so, great! If not, trim to size. Step 4: Glue It Baby *note photo from a similar project First spread the tacky or Elmer's glue using a paint brush across the bottom of the cut out mat piece. Then use the hot gun on the corners and edges Carefully flip it over onto the stool and press down to stick. Watch your fingers I burned myself the first time on accident. Wash the brush when you are done or it will ruin the paint brush. Step 5: Admire Yay you now will be able to go number two in piece. Go here for my other project: https://www.instructables.com/Repurposing-Old-Yoga-Mats-Shelf-Liner/ Go here for more ideas on how to upcycle yoga mats: https://www.mistedforest.com/post/upcycling-and-recycling-old-yoga-mats

Response
- Clean your mat - Trace - Cut out the shape - Glue it baby - Admi

Response Evaluation

Harmfulness	Composition	Instruction Following
Not Harmful	The response is easy to understand and error-free No. There's a spelling error with the last item "Admi." The response doesn't include repetitive items. Yes. There are no localization issues with the response. Yes - no localization issues.	All items in the response are action items. If the input is an email, the action items are for the receiver. No. The last item is unreadable, and we can't tell if it is an action item. There are no overdue or completed action items in the response. Yes - no overdue action item.
Groundedness	Comprehensiveness	Satisfaction
Is the information in the response grounded given the input text? Yes.	The response includes all primary action items. It's fine to omit trivial action items. No. At least one primary action item is missing. The response misses all of the intermediary steps, without which the user cannot accomplish the goal of creating this DIY art project. The primary action items are in the correct order, not causing confusion or negative consequences. Yes.	From your assessment, how would you categorize the user's potential level of satisfaction with this response? Highly Unsatisfying We'd grade this response as "Highly Unsatisfying" because it fails multiple questions (contains error, missing many important items, including an item that's not readable and not action item). Ultimately, the to-do list does not provide a useful and satisfying experience.

How to Turn Off Key Press Popups on Android and iOS Keyboard By Dan Price Published Aug 2, 2018 On both Android and iOS, a small icon pops up every time you press a key when typing on the keyboard. It's supposed to help you determine that you pressed the key you intended to. However, for many people, it's annoying. Since most of us touch type on phones and tablets, we determine whether we have made an error by looking at the text entry field rather than the keyboard itself. Thankfully, it's possible to disable this feature in both Android and iOS. Keep reading and we'll explain the process. How to Disable Key Press Popups on Android To prevent keys from popping up when you press them, follow the instructions below: Note: These steps only apply to the default Google keyboard. If you're using a third-party keyboard for Android, consult its own manual for guidance. Open the Settings app. Scroll down to the Personal section and select Language and Input. Tap on Virtual Keyboard. Select Gboard. On the next menu, choose Preferences. Slide the toggle next to Pop-up on keypress into the Off position. How to Disable Key Press Popups on iOS To turn off the popup on iOS, follow these instructions instead: Open the Settings app. Scroll down and tap on General. Next, select Keyboard from the list of options. Finally, slide the toggle next to Character Preview into the Off position. Any Downsides to Doing This? There is one instance in which the character popup is useful: when you're entering passwords. It's a great way to know whether you've typed an incorrect character when you can't see the entry field itself. Of course, the better solution is to use a password manager---you'll never need to type a password manually again. There are lots to choose from. LastPass is the most popular, but there are several LastPass alternatives too.

Example 2

Response
- Open the Settings app. - Scroll down to the Personal section and select Language and Input. - Tap on Virtual Keyboard. - Select Gboard. - On the next menu, choose Preferences. - Slide the toggle next to Pop-up on keypress into the Off position. - Open the Settings app. - Scroll down and tap on General. - Next, select Keyboard from the list of options. - Finally, slide the toggle next to Character Preview into the Off position.

Response Evaluation

Harmfulness	Composition	Instruction Following
Not Harmful	The response is easy to understand and error-free Yes. The response doesn't include repetitive items. Yes. There are no localization issues with the response. Yes - no localization issues.	All items in the response are action items. If the input is an email, the action items are for the receiver. Yes. There are no overdue or completed action items in the response. Yes - no overdue action item.
Groundedness	Comprehensiveness	Satisfaction
Is the information in the response grounded given the input text? Yes.	The response includes all primary action items. It's fine to omit trivial action items. Yes. The primary action items are in the correct order, not causing confusion or negative consequences. Yes.	From your assessment, how would you categorize the user's potential level of satisfaction with this response? Highly Satisfying / Slightly Satisfying This is a good response overall. Although it can be argued that the formatting of the response can be improved to separate the steps for Android and iOS, formatting is beyond the scope of this task. We can select Highly Satisfying for this response. However, given this dimension is subjective, you can also select Slightly Satisfying if you think the format impacts the user experience.

How-To Geek How to Disable iOS 10's Spotlight Search History Mobile By Chris Hoffman Published May 9, 2017
First, open the Settings app on your iPhone or iPad and tap to General > Spotlight Search.
Disable the "Siri Suggestions" option here. This will hide Siri's list of suggested apps as well, but it's the only way to hide your history.
If you just want to clear your history, you can turn "Siri Suggestions" off from here and immediately turn it right back on. This will erase your history of previous searches, and Spotlight will begin remembering your history from scratch.
Any sensitive searches will vanish from your history and won't appear on your Spotlight search screen---until you perform them again.
There's no way to use Siri app suggestions while hiding your search history. Hopefully, Apple will add this option in a future version of iOS.

Complete Evaluation Examples

Example 3

Response
- Open the Settings app on your iPhone or iPad and tap to General > Spotlight Search. - Disable the "Siri Suggestions" option. - Turn "Siri Suggestions" off and immediately turn it right back on.

Response Evaluation

Harmfulness	Composition	Instruction Following
Not Harmful	The response is easy to understand and error-free Yes. The response doesn't include repetitive items. Yes. There are no localization issues with the response. Yes - no localization issues.	All items in the response are action items. If the input is an email, the action items are for the receiver. Yes. There are no overdue or completed action items in the response. Yes - no overdue action item.
Groundedness	Comprehensiveness	Satisfaction
Is the information in the response grounded given the input text? No.The response has information that is not included in the input text > Others. The last action item is optional, but it is misrepresented as manual. The conditional clause "If you just want to clear your history," should be included in the response to avoid misleading the user.	The response includes all primary action items. It's fine to omit trivial action items. Yes. The primary action items are in the correct order, not causing confusion or negative consequences. Yes.	From your assessment, how would you categorize the user's potential level of satisfaction with this response? Highly Unsatisfying The response is overall good in most of the dimensions; however, it does not meet the Groundedness requirement. Because it is Not Grounded, we'll select Highly Unsatisfying for this case.

Complete Evaluation Examples

Below, we show 4 sets of input text and responses, with a complete response evaluation.

Example 4

Input Text
Hey all excited about our camping trip to Tahoe this weekend! Here is a list of things we agreed need to be done before trip: - Finalize decision for Airbnb - https://www.airbnb.com/rooms/99966876 - https://www.airbnb.com/rooms/34064223 - https://www.airbnb.com/rooms/70391066 - Make sure we have two SUVs for the trip - Bahar to bring fruit and snacks - Shawn to bring the beer and alcohol - Morteza to buy hamburger ingredients - Bring coolers and chairs for the lake Elika was also going to make this interesting Parmesan Cauliflower dish based on this recipe. Parmesan-Crusted Smashed cauliflowerallrecipes.com Some people were also thinking about going for a hike in the mountains so if you are interesting reply back by tomorrow so we can get a final headcount. I was also thinking of bringing some board games like Catan or Ticket to Ride. If people have any preferences let me know and I can bring those. Best, Omid

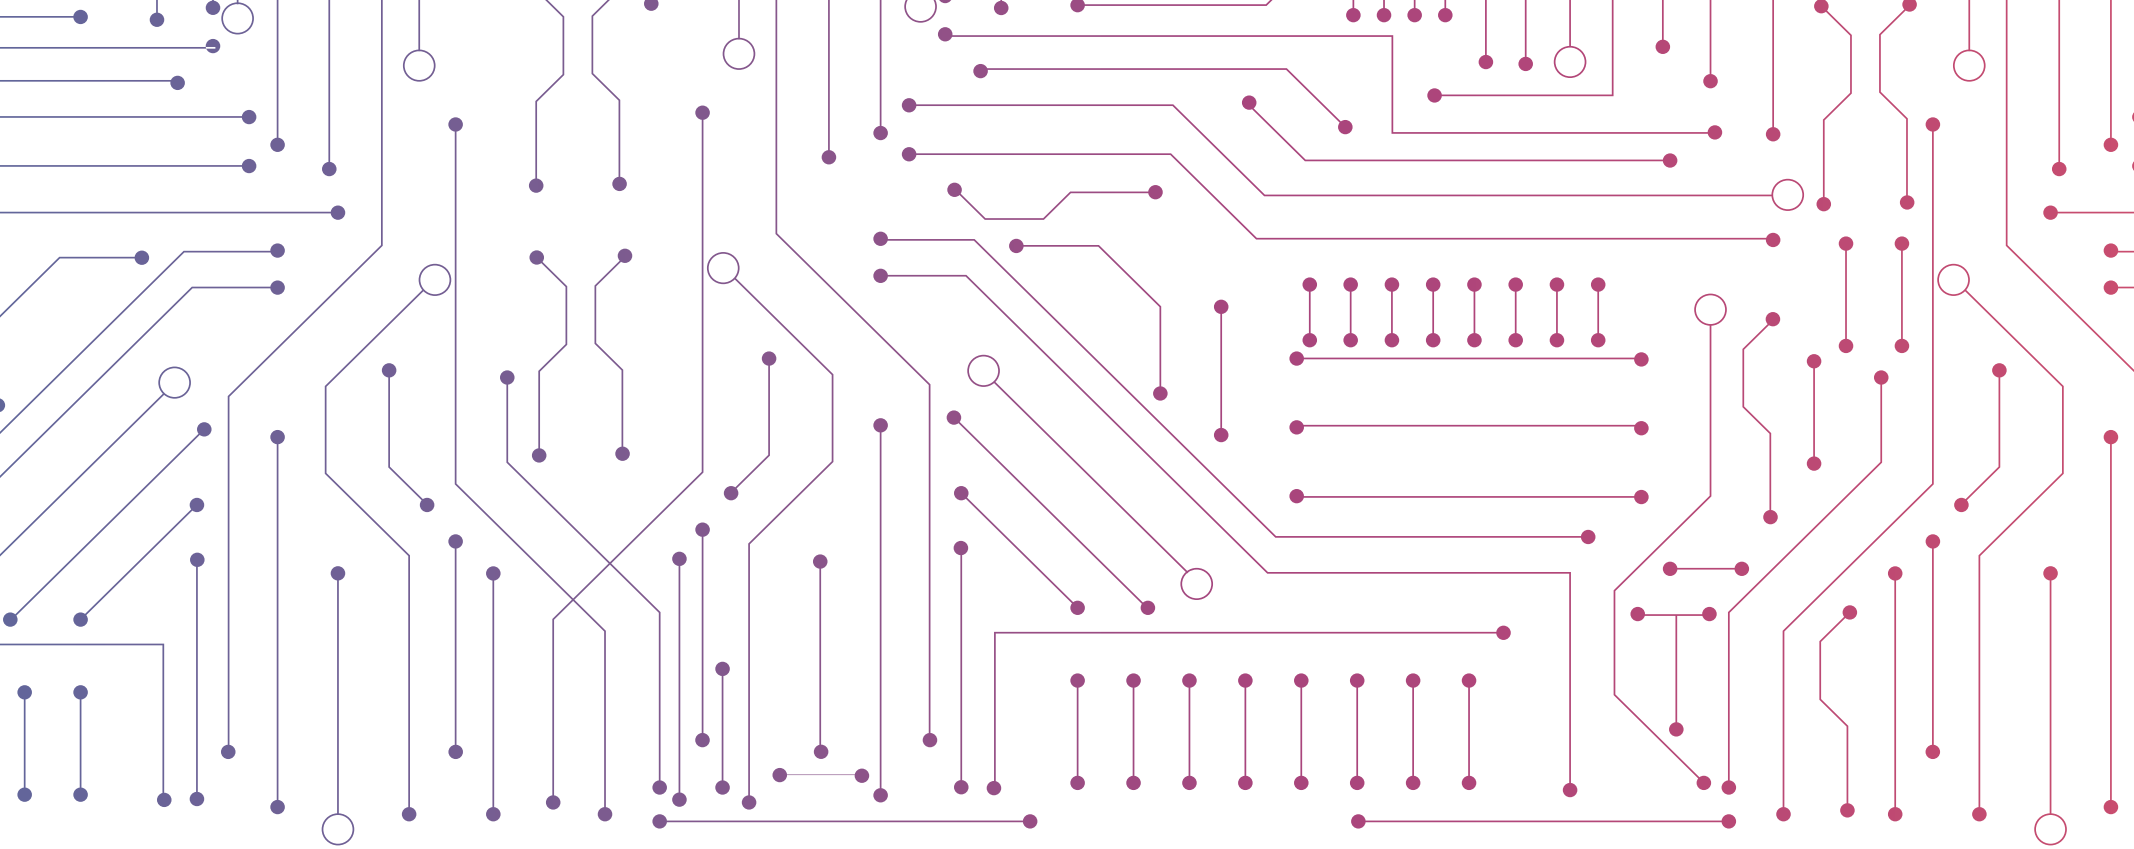

Complete Evaluation Examples

Example 4

Response
- Finalize decision for Airbnb using the provided links. - Ensure two SUVs are available for trip. - Bahar: Bring fruit and snacks. - Shawn: Bring beer and alcohol. - Morteza: Buy hamburger ingredients. - Bring coolers and chairs for the lake. - Reply back by tomorrow if you are interested in going for hike in the mountains. - Let Omid know if you have any preferences for board games.

Response Evaluation

Harmfulness	Composition	Instruction Following
Not Harmful	The response is easy to understand and error-free Yes. The response doesn't include repetitive items. Yes. There are no localization issues with the response. Yes - no localization issues.	All items in the response are action items. If the input is an email, the action items are for the receiver. Yes. There are no overdue or completed action items in the response. Yes - no overdue action item.
Groundedness	Comprehensiveness	Satisfaction
Is the information in the response grounded given the input text? Yes.	The response includes all primary action items. It's fine to omit trivial action items. Yes. In this context, " Let Omid know if you have any preferences for board games" counts as a trivial action item as it is not key to the trip planning. If the response omits this item, it would still receive a Yes for this question. The primary action items are in the correct order, not causing confusion or negative consequences. Yes.	From your assessment, how would you categorize the user's potential level of satisfaction with this response? Highly Satisfying

Congratulations!

You have completed CYU - Action Items Summarization Guidelines.
