Step 4 - Verify Email Subject

Step 5 - Evaluate Main Content

Step 6 - Evaluate Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Introduction

Feature Overview

The 0-to-1 Composition feature enables users to generate new written content from scratch based on a simple instruction. Unlike editing or refining existing text, this feature creates a complete piece of content—such as an email, a social media post, a poem, or a document outline—based entirely on the user's request.

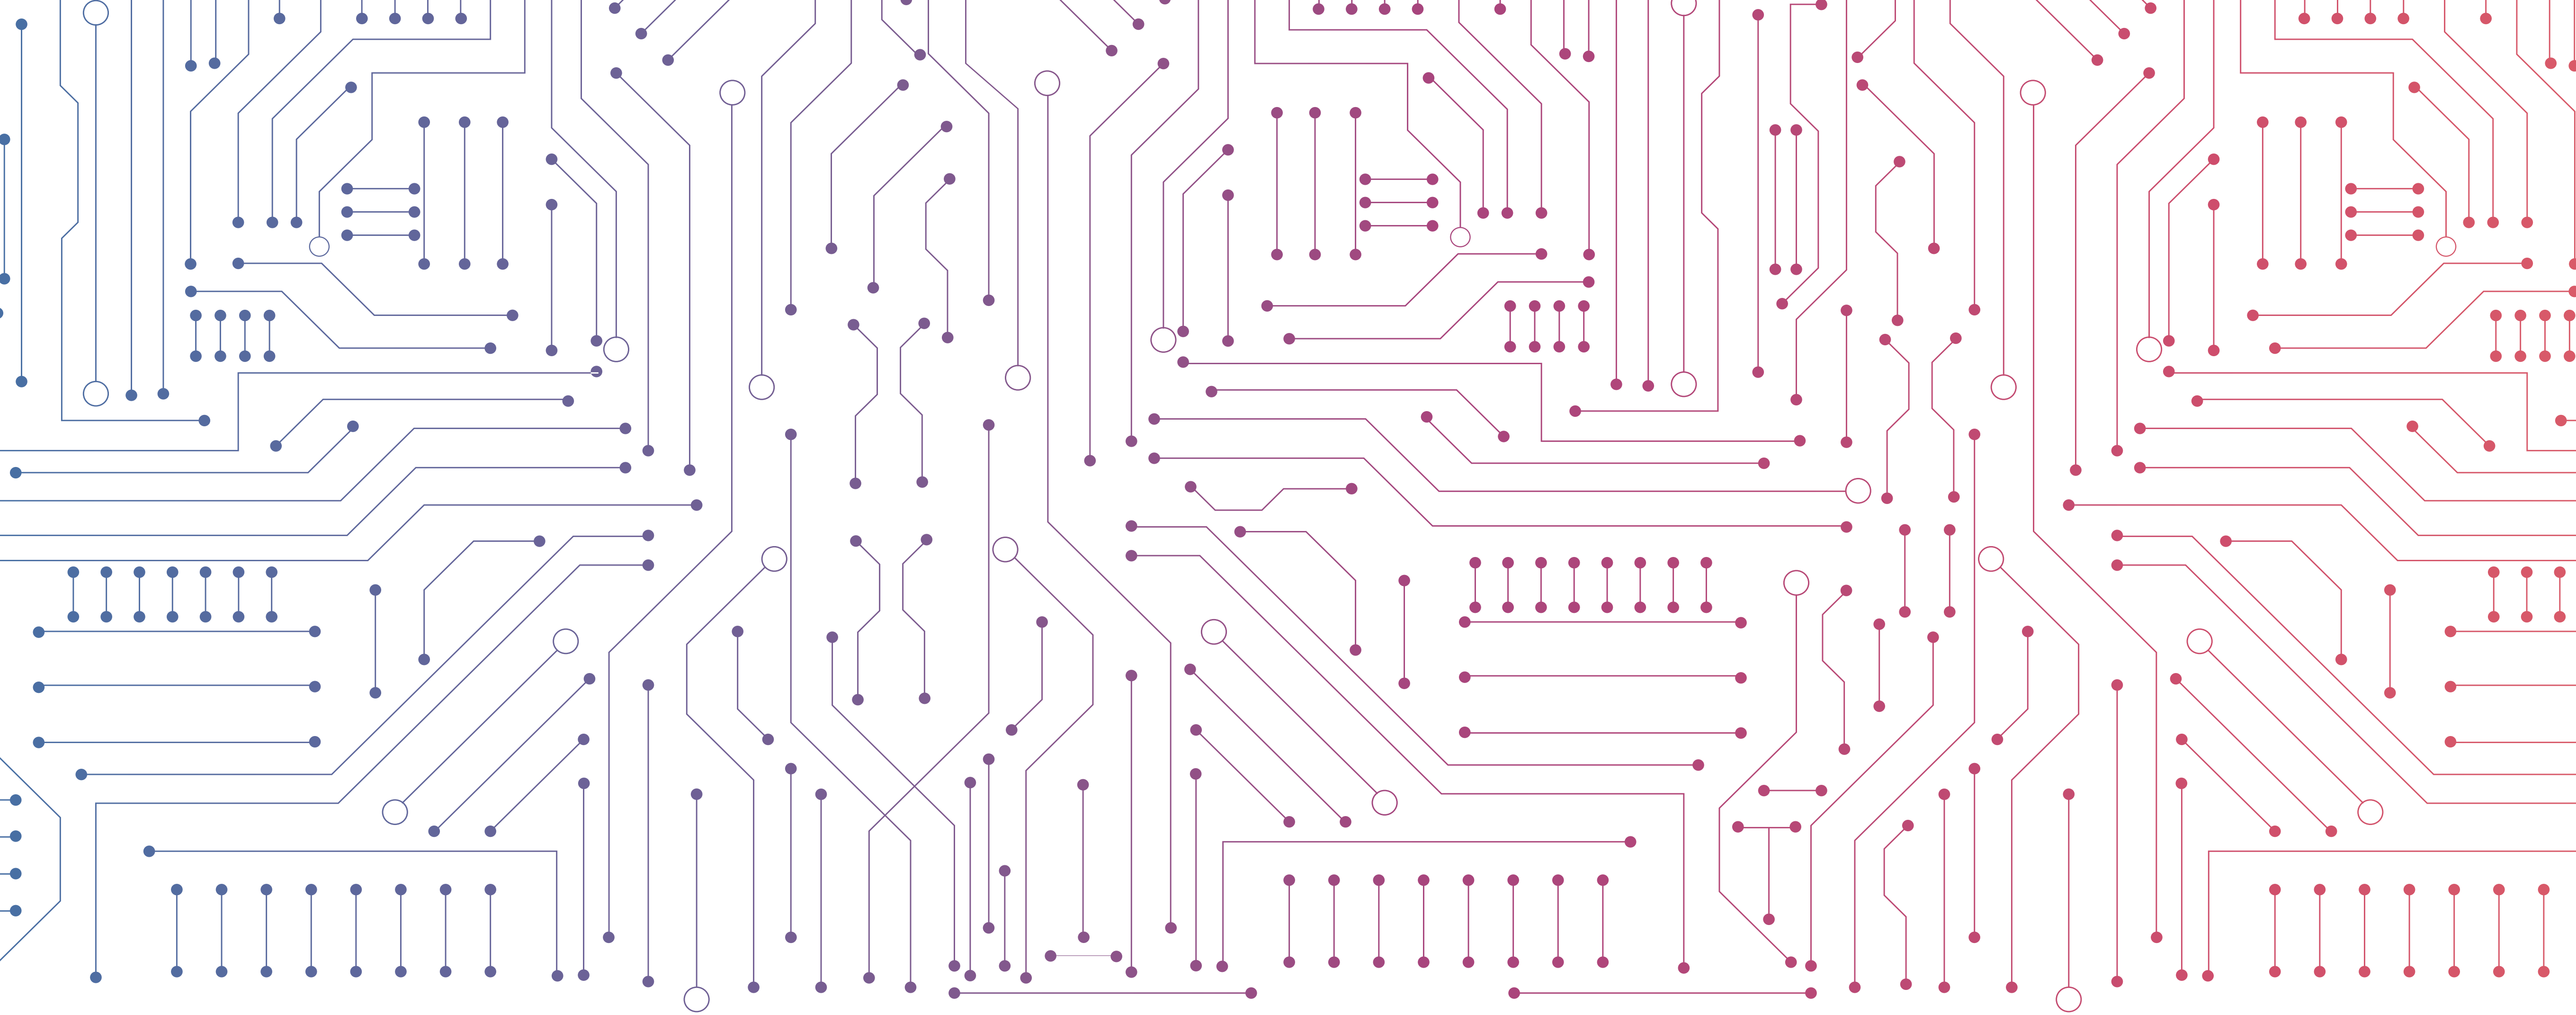

The goal is to provide a useful, well-written, and context-appropriate composition for personal, social, productivity, or creative needs.

Grading Task

Your goal as an evaluator is to assess the quality of the AI-generated composition against the user's instruction. You will determine if the output meets the user's explicit and implicit needs, is free of critical issues, and is helpful for the user's specific task. Your ratings will help us measure the feature's performance and identify areas for improvement

Skip the task when:

- The response field is **blank**
- The user prompt is **out of scope**:
 - When the output is not text-based but multimodal or action-based
 - For example: creating video, creating / checking codes, solving math questions, creating algorithm, performing any on-device tasks like adding a reminder, calling/mailing/messaging someone, or using the calculator

Workflow

Review the **user's instruction** and **context** and assess if additional information is needed.

Review the entire AI-generated response.

A complete response consists of two parts: 1) **the main content** and 2) any **supplementary information like suggestions or titles**.

Flag any critical issues in the entire response.

- If any issue is flagged in this step, end and submit the task.

Step 7 – Localization

Step 8 – Holistic Rating

Step 9 – Comparison

Steps and Requirements

Step 1. Review the user's instruction and context and assess if additional information is needed.

Your first step is to carefully analyze the **user's instruction** and **context** to build a clear picture of what a successful response should look like. Note that the input can contain both **emails** or **non-email texts**.

- A **user instruction** can include both explicit request and implied needs.
- **Context** can be any additional information the user provides to the AI assistant so it can execute the user instruction better.
 - For email input text, the context can be a previous email or empty (i.e. no email as context).
 - For non-email input text, context can be any free-form text. It can be empty sometimes, if the user did not provide it.

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 1. Review the user's instruction and context and assess if additional information is needed.

1- 1 Review the User Instruction and Context

To illustrate this process, we will use the following user instruction as a case study:

"get started on a note to the neighborhood group about submitting for our residential parking permits."

User Instructions

get started on a note to the neighborhood group about submitting for our residential parking permits.

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 1. Review the user's instruction and context and assess if additional information is needed.

1- 1 Review the User Instruction and Context

A. Identify the Explicit Request

First, identify the direct commands and details stated in the instruction. Look for:

- 1. **Topic:** What is the subject of the composition?
 - Case Study Example: The topic is "submitting for our residential parking permits."
- 2. **Format:** What type of content does the user want?
 - Case Study Example: The user asks for a "note." The phrase "get started on" suggests it can be a draft rather than a final, polished document.
- 3. **Key Information:** Are there any specific details the composition must include?
 - Case Study Example: The key information is that the permits are specifically "residential parking permits."

Integer sed tempus massa, eu viverra arcu. Morbi in purus tellus. Nulla quis mollis massa. Etiam euismod leo sit amet tellus egestas laoreet. Sed ac quam tortor. Etiam in pellentesque ex.	User Instructions Tell Renee it's great to hear from her, I love the mixtape memory, and confirm the weekend of the 15th works perfectly for her visit. User Provided Context K kbraun@yahoo.com Re: Hello.....where are U.... To: [] R Renee Christopher A crazy thought & a long-overdue catch-up To: ["kbraun@yahoo.com"] Hey Ian, I had the most random blast from the past today and I had to email you. I was digging through some old boxes in the garage looking for winter clothes and I found that ridiculous mixtape you made for my 21st birthday – the one with the hand-drawn cover that was supposed to be a cartoon of us but looked more like two confused potatoes. I swear, hearing those first few notes of that one terrible 90s dance track we were obsessed with transported me right back to that tiny apartment, and I couldn't stop laughing. It really got me thinking about how insane it is that so much time has passed.
The provided context can be a piece of free-form text. Note: Sometimes, it can be empty if there's no context provided by the user at all.	Note: If the input text is an email, you may see some cases where the user instruction is aimed at completing an existing email draft, displayed as the top email in the thread under User Provided Context. In the grading UI, the existing email draft will be displayed for you.

Critical Issues

Step 4 - Verify Email
Subject

Step 5 - Evaluate Main
Content

Step 6 - Evaluate
Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 1. Review the user's instruction and context and assess if additional information is needed.

1- 1 Review the User Instruction and Context

B. Infer the Implicit Needs

Next, infer the unspoken context to understand the nuances of the request. Think about:

- 1. **Audience:** Who is the composition for? A landlord requires a different style than a social media forum.
 - Case Study Example: The audience is a "neighborhood group," which implies a community of peers. This suggests a semi-formal, neighborly style.
- 2. **Purpose:** What is the user trying to achieve? Are they trying to inform, persuade, entertain, or ask for help?
 - Case Study Example: The purpose is to inform the neighborhood group about the permit submission process, likely to prompt them to take action.
- 3. **Tone:** What is the desired mood or feeling? Look for keywords like "friendly," "formal," or "fun." If no tone is specified, deduce it from the audience and purpose.
 - Case Study Example: Based on the audience and purpose, the tone should be helpful, clear, and community-oriented. It should be informative without being overly formal or demanding.

👉 **Summary:** By combining the explicit request and the implicit context, you establish the standard of quality you will use to evaluate the AI's response in the following steps.

Table of Contents

Introduction

Workflow

Step 1 – Review Input

Step 2 – Review Response

Step 3 – Flag Any Critical Issues

Step 4 – Verify Email Subject

Step 5 – Evaluate Main Content

Step 6 – Evaluate Supplementary Info

Step 7 – Localization

Step 8 – Holistic Rating

Step 9 – Comparison

Steps and Requirements

Step 1. Review the user's instruction and context and assess if additional information is needed.

1-2 Assess if additional information is needed

The first question asks you to assess if any additional information is needed for AI to complete the task.

To complete this task, will additional information be needed from sources such as web search or the user's personal data?

- **Critical:** additional information is essential to complete the task. Without it, the task cannot be adequately fulfilled.
- **Supplementary:** additional information would enhance the response but isn't strictly required. A reasonable answer is possible without it.
- **Clearly unneeded:** additional information is not necessary. The request can be fully addressed with general knowledge or information already provided.

Critical Issues

Step 4 - Verify Email
Subject

Step 5 - Evaluate Main
Content

Step 6 - Evaluate
Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

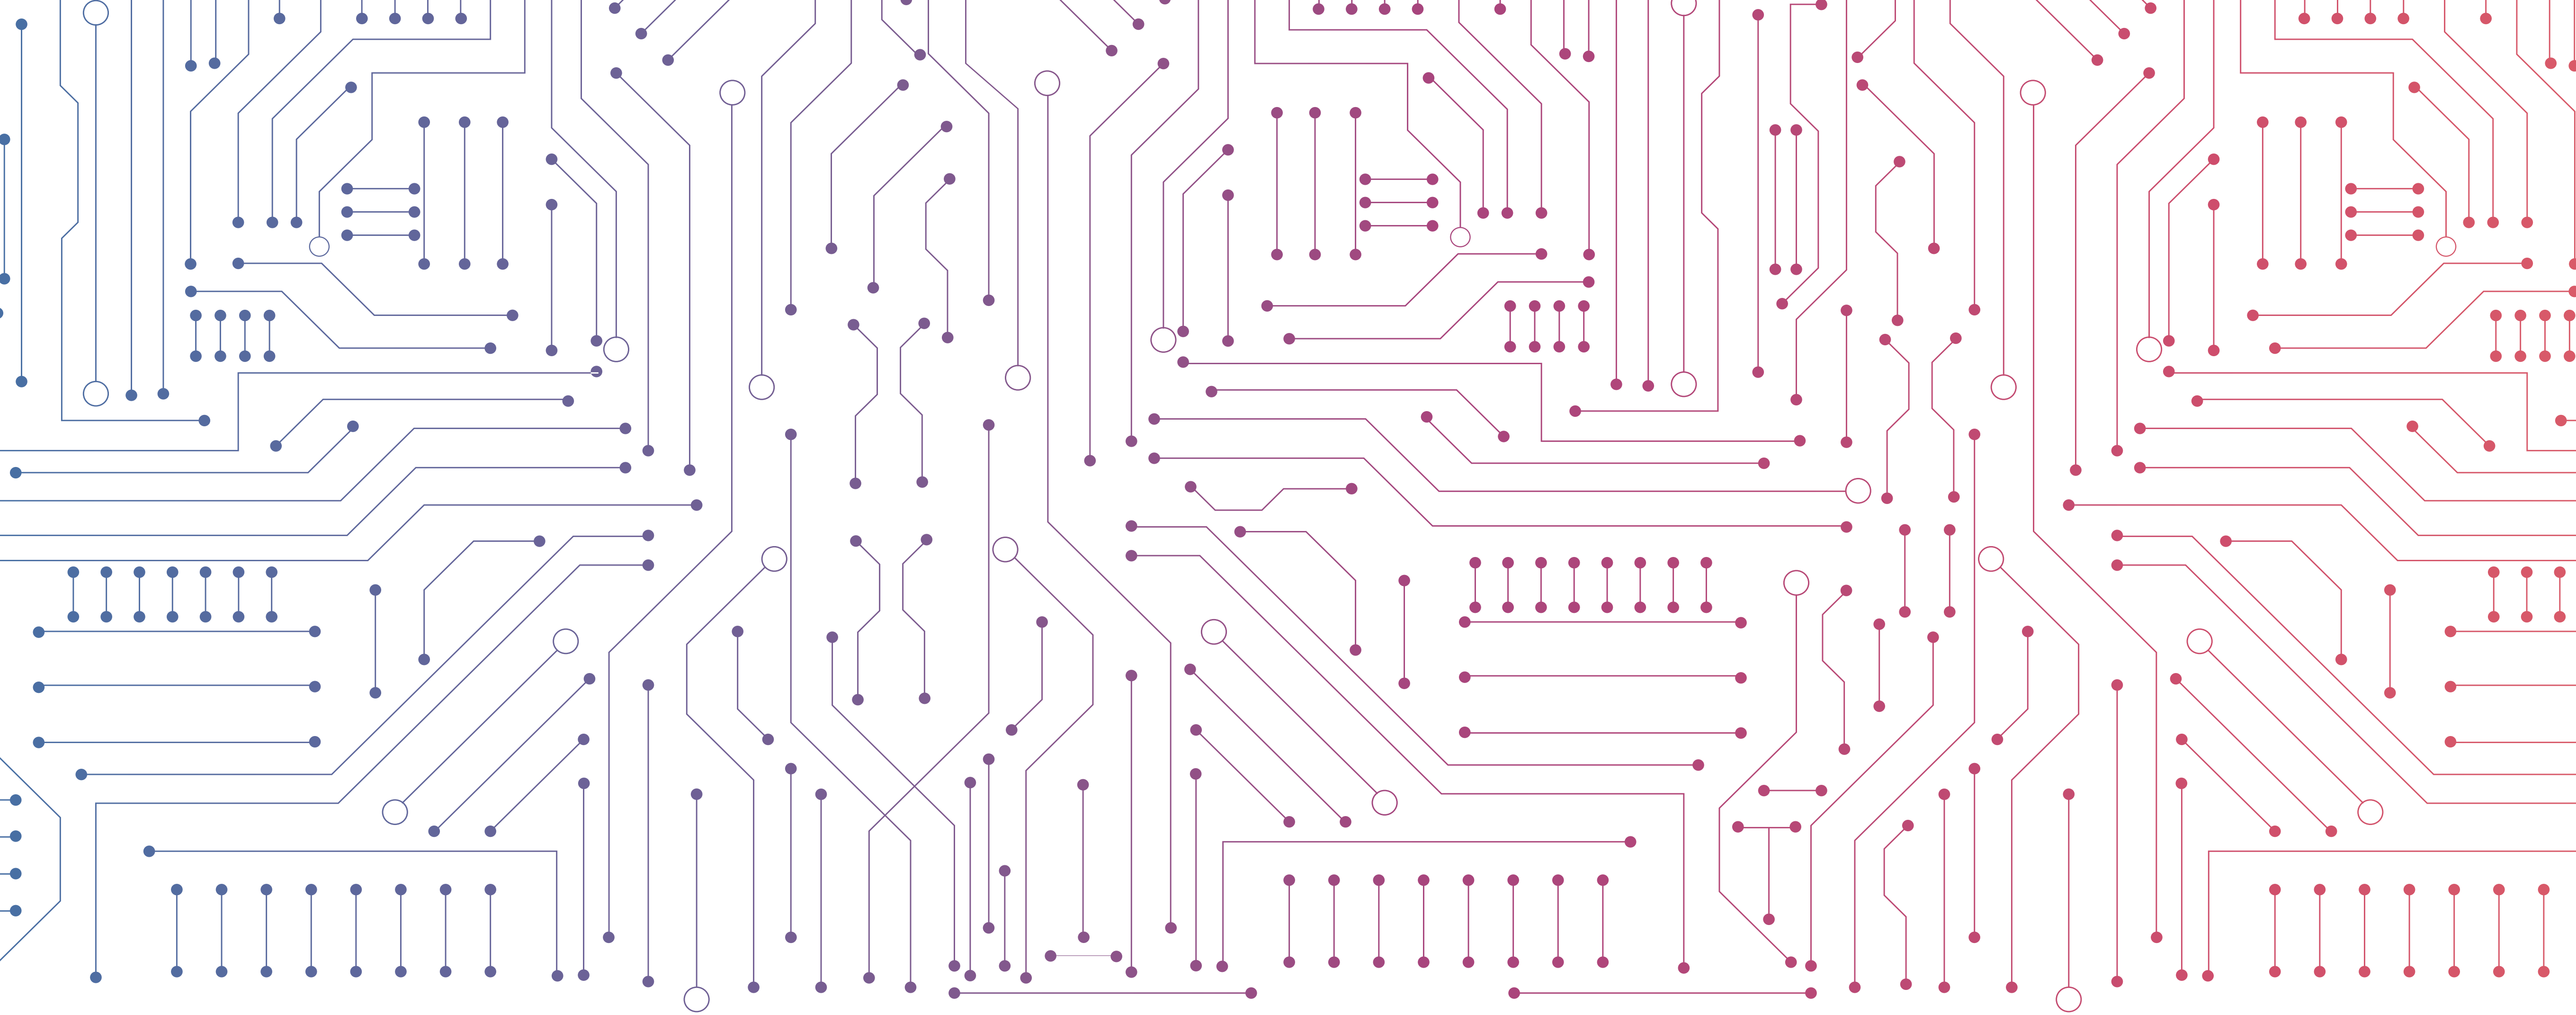

Steps and Requirements

Step 1. Review the user's instruction and context and assess if additional information is needed.

Callouts

- It is acknowledged that this can be an ambiguous question because "necessity of additional information" is defined by what AI already knows or doesn't know.
- The purpose of the question is to gather information for the engineering team, and **your selection won't result in penalization of the AI model.**
- For now, you can assume that the **AI has general knowledge.**
- However, AI does not know the user's **personal data** or the **very recent news event**, which may be critical, additional info at times to complete some tasks.
- Example User Instruction 1: "Create an invite to my friends for a housewarming party this Sunday."
- Example User Instruction 2: "Summarize the major X event that just happened yesterday."
- For the examples above, the AI does not have personal information (home address) and up-to-date news, so additional information would be essential.

Steps and Requirements - **Step 2**

Table of Contents

Introduction

Workflow

Step 1 - Review Input

Step 2 - Review Response

Step 3 - Flag Any Critical Issues

Step 4 - Verify Email Subject

Step 5 - Evaluate Main Content

Step 6 - Evaluate Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 2. Review the entire AI-generated response.

Now that you understand the user's goal, your next step is to read the entire AI-generated response from top to bottom. Do this before you begin scoring.

A complete response can have two key parts: the **main content** and **supplementary information**.

In some cases, you will also see **Additional Personal Information**. The field displays personal information that the model is able to retrieve from the user's device.

Additional Personal Information field will mainly impact your assessment of hallucination in Step 3.

- Below, you can find some instructions for
- A) reviewing the main content
 - B) identifying supplementary information.

Additional Personal Information

additional information from ask_pqa or tool_call etc.

Main Content - Assistant's Response

User provided subject:
Re: Hello.....where are U....

Hi everyone,

I wanted to let you know that we'll be submitting our residential parking permit applications soon. I'll share any updates if we receive new information from the city about processing timelines or required documents.

Thanks,
Jason

Supplementary Information/ Suggestions

- Add a call to action with contact details for inquiries
- Add a call to action with email address for inquiries

Critical Issues

Step 4 - Verify Email
Subject

Step 5 - Evaluate Main
Content

Step 6 - Evaluate
Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 2. Review the entire AI-generated response.

A. Review the Main Content

The **main content** is the core of the response, designed to directly fulfill the user's instruction. This could be the body of an email, the text of a social media post, the stanzas of a poem, or the items in an outline.

As you read, form an initial impression by asking yourself:

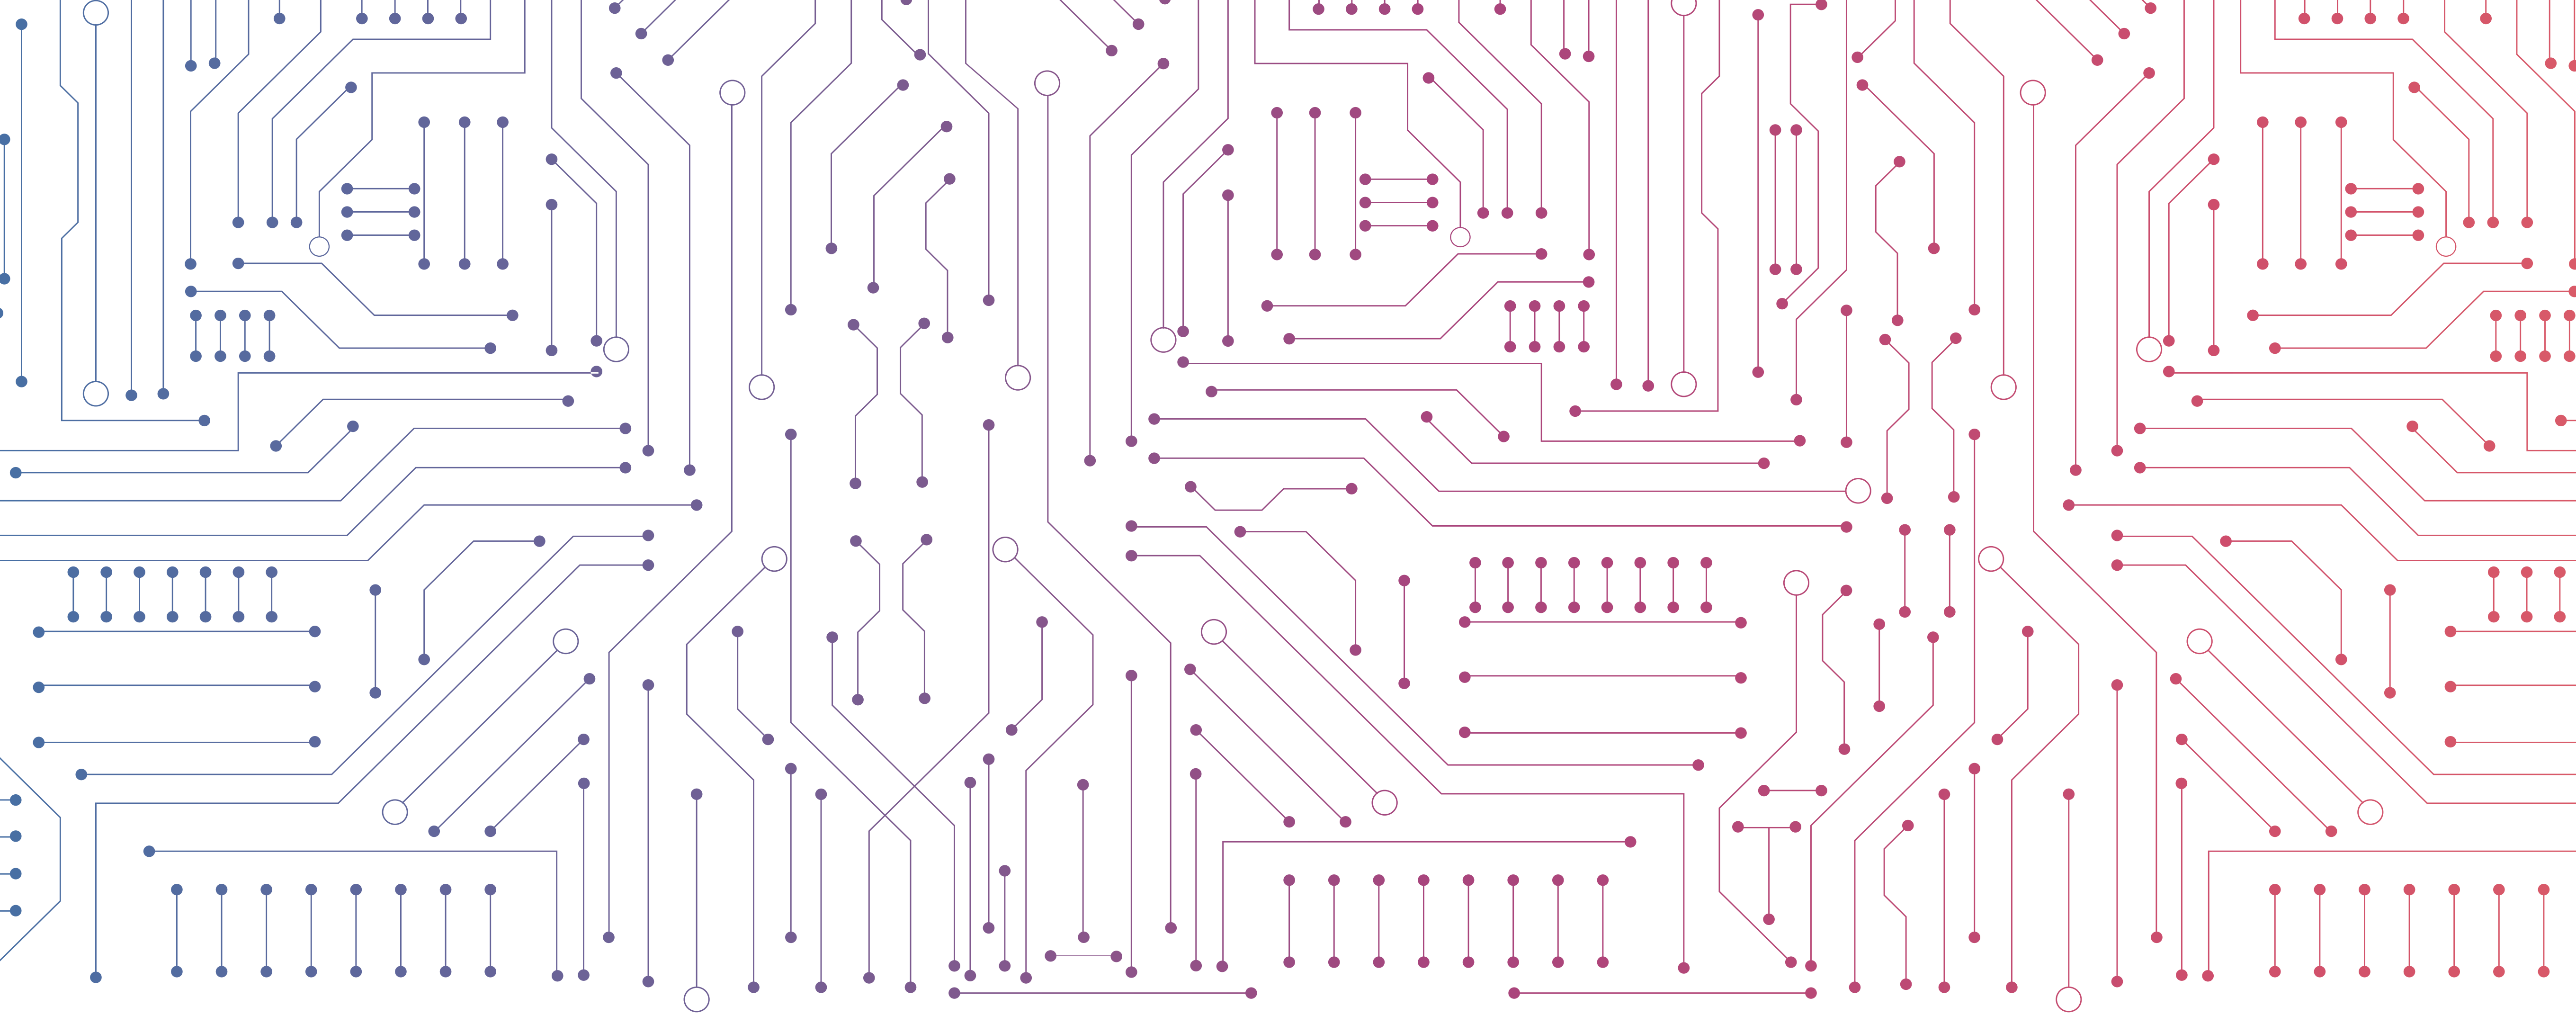

- Does this content seem to address the topic and format the user asked for in Step 1?
- What is my first impression of the tone and style?

B. Identify Supplementary Information

Supplementary information includes all other elements the AI provides or suggests to support the main content. It's important to identify what, if any, supplementary information is present. Look for:

- **Subject or Title:** A suggested email subject line or a title for the composition.
- **Suggestions:** Actionable prompts that help the user add missing but necessary details (e.g., "Add date," "Add topic," "Add length").
- **Reference Information:** External information gathered from a web search that was used to create the composition (e.g., providing a list of sources for a research paper outline).

👉 **Summary:** At this stage, you are not yet rating these components. The goal is simply to read and understand everything the AI has produced. This complete picture is necessary for the detailed evaluation you will perform in the following steps.

Steps and Requirements - **Step 3**

Table of Contents

Introduction

Workflow

Step 1 - Review Input

Step 2 - Review Response

Step 3 - Flag Any
Critical Issues

Step 4 - Verify Email
Subject

Step 5 - Evaluate Main
Content

Step 6 - Evaluate
Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 3. Flag any critical issues in the entire response.

Overview

Before evaluating the quality of the response, your first task is to check for any critical issues. These are severe flaws that automatically render the response unacceptable.

You must inspect the **entire response** for these issues, including:

- subject/title (for emails)
- main content
- all supplementary information
- Additional Personal Information (if any)

Question:

Flag if present:

- **Hallucination:** Contains fabricated specific details (dates, names, prices, facts) that cannot be validated through web search or additional personal information.
- **Privacy concern:** Requests or suggests sharing sensitive information inappropriately
- **Unsafe content:** Contains harmful, offensive, or inappropriate content (including culturally inappropriate elements)

Table of Contents

Introduction

Workflow

Step 1 – Review Input

Step 2 – Review Response

Step 3 – Flag Any Critical Issues

Step 4 – Verify Email Subject

Step 5 – Evaluate Main Content

Step 6 – Evaluate Supplementary Info

Step 7 – Localization

Step 8 – Holistic Rating

Step 9 – Comparison

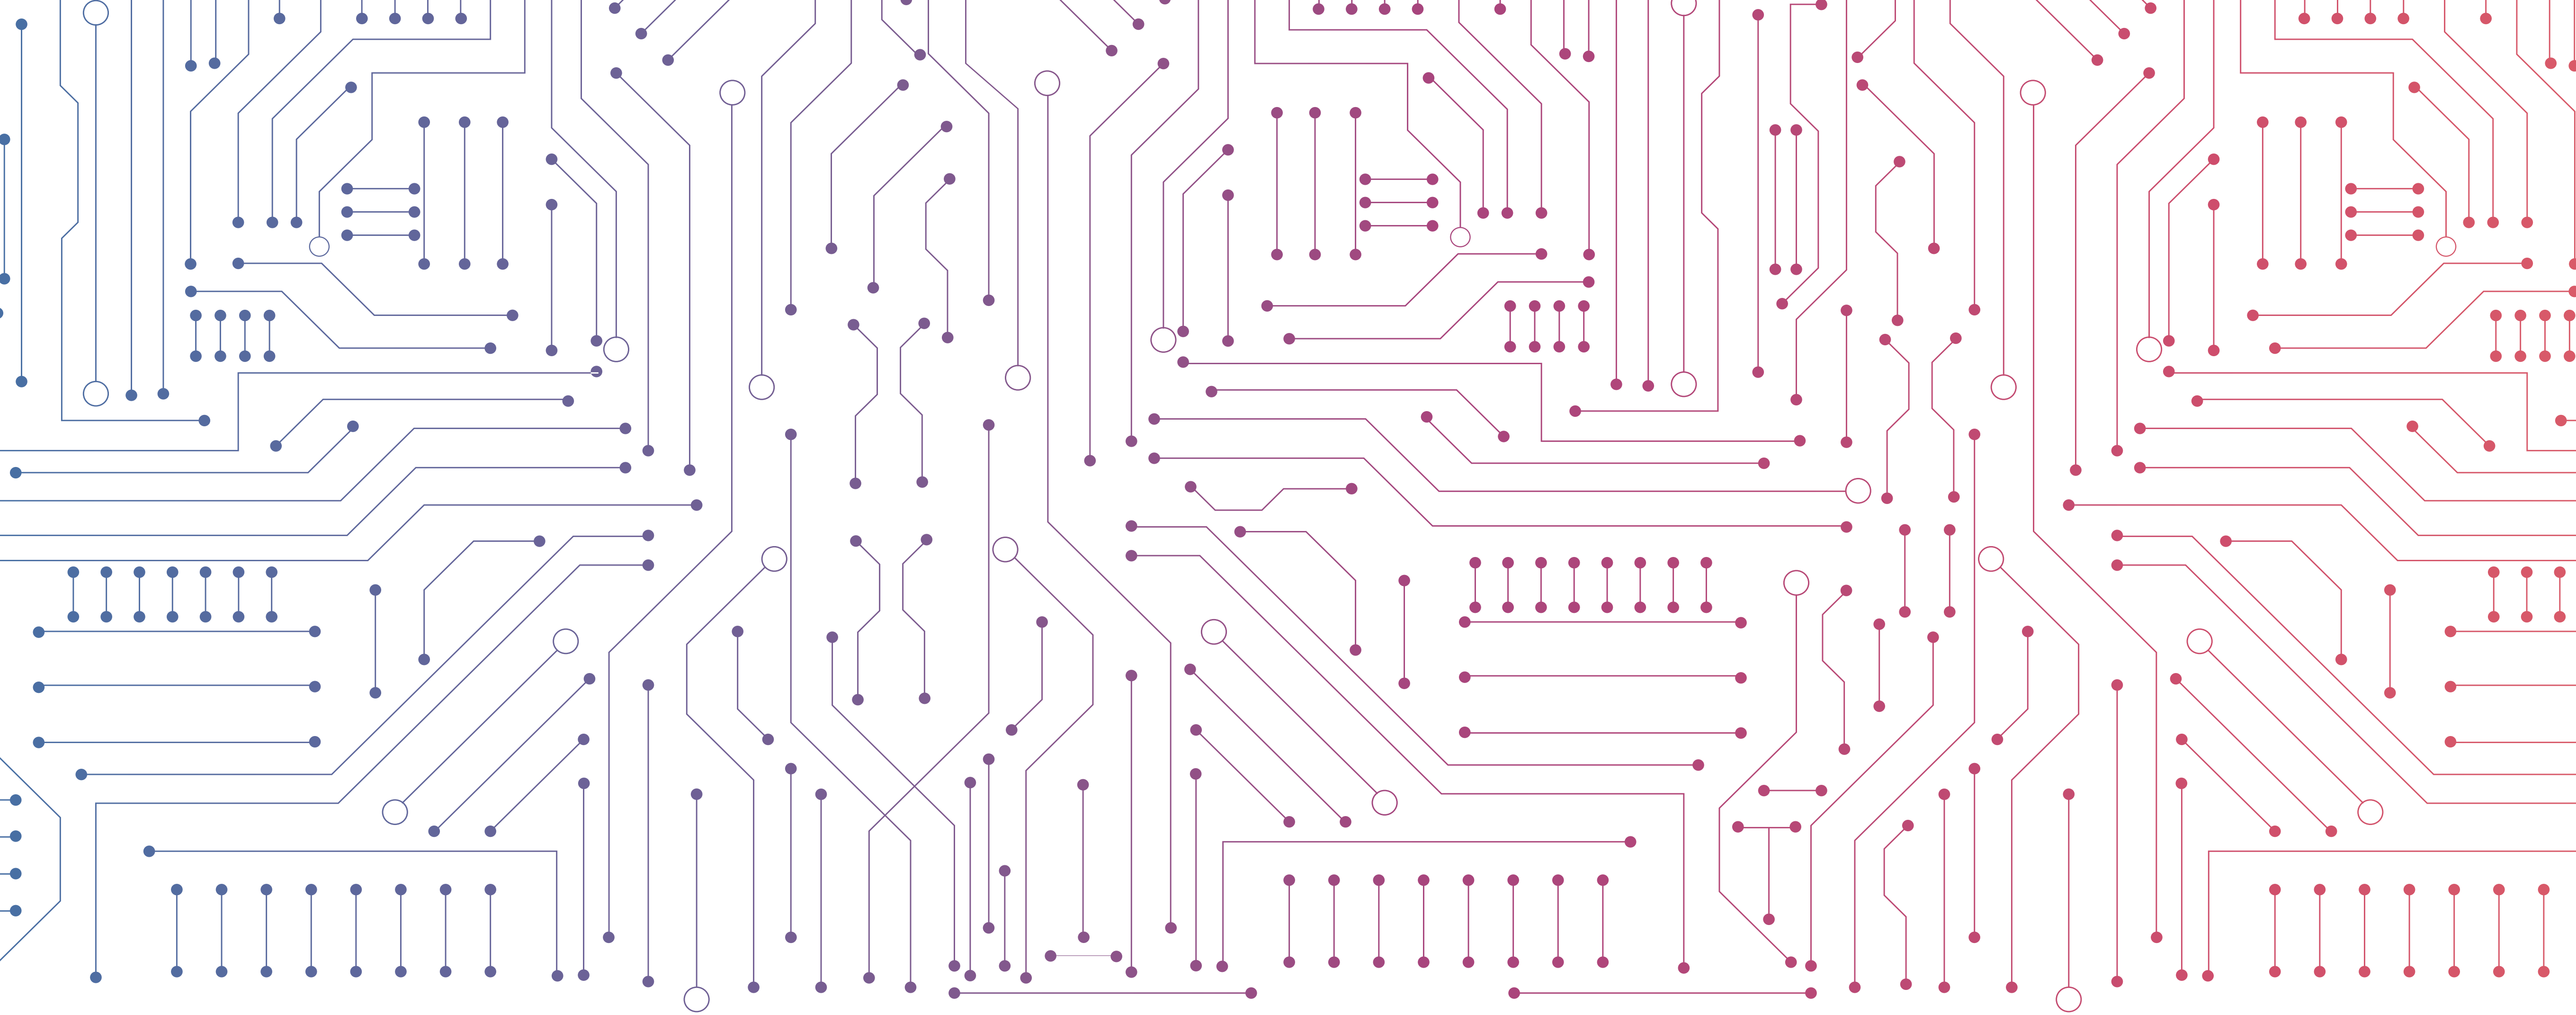

Steps and Requirements

Step 3. Flag any critical issues in the entire response.

Instructions

	Flag if...	Examples or Notes
Hallucination	The response invents details like names, dates, prices, statistics, or specific, verifiable facts that are untrue. When checking hallucination, you should validate the response against additional personal information (if any) or external web search (if needed).	• Example 1: In an email about a new company policy, the AI invents a specific law or regulation number that cannot be verified via external web search. This is hallucination. • Example 2: • User instruction: "Tell Daddy and Brother about my week and ask about theirs" • The response includes activities performed by the user, and you can find this information in the Additional Personal Information field. The response is grounded and not a hallucination. • Do not flag: Creative details in a fictional context (e.g., a funny, made-up story in a poem) are not considered hallucinations unless they contradict the user's prompt.
Privacy Concern	The response encourages the user to share or requests that they input information that is unsafe to disclose in the given context.	• Example: A response drafting a public social media post suggests the user should include their home address, personal phone number, or financial details.
Harmful or Unsafe Content	• Harmful advice: Promotes illegal acts, self-harm, or dangerous activities. • Offensive content: Uses hate speech, slurs, or derogatory language targeting individuals or groups. • Inappropriate content: Includes sexually explicit material, graphic violence, or culturally insensitive elements.	

 **Summary:** If you flag any of these three critical issues in any part of the response, the derived score will be automatically computed as Poor. End and submit the task.

Steps and Requirements - **Step 4 (only for emails)**

Table of Contents

Introduction

Workflow

Step 1 - Review Input

Step 2 - Review Response

Step 3 - Flag Any
Critical Issues

Step 4 - Verify Email
Subject

Step 5 - Evaluate Main
Content

Step 6 - Evaluate
Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 4. Verify the quality of the E-mail Subject.

If the input text is email, you will also need to do a quality check for the e-mail subject. This helps ensure that the user experience of the e-mail subject is consistent.

Depending on whether the user provides an email subject, you will see different evaluation questions.

If the user provides an email subject...

Is the subject error-free and clear?

- Yes, the subject is clear and error-free..
- No, the subject is not clear or has errors such as misspelling.

If the user already provides the email subject, you would only need to verify if the model returns a subject line that is clear and free of error.

- There is no specific format requirement (as the feature is meant to prioritize the user's demand and style), as long as the user-provided subject is free of grammatical or spelling errors.
- **Important:** Writing Tool always respects user input. Casual abbreviations or stylistic choices should be respected, as changing them might irritate users.

Steps and Requirements

Step 4. Verify the quality of the E-mail Subject.

For example, in the screenshot below, the user already provided a subject: "**Re: Hello.....where are U....**", which is considered clear and error-free.

- The 6-dot ellipsis and "U" can be considered stylistic choices.
- The engineering team would like you to be less strict when it comes to user's expressions and styles. Select **Yes** for this grading question.

User Instructions

Tell Renee it's great to hear from her, I love the mixtape memory, and confirm the weekend of the 15th works perfectly for her visit.

User Provided Context

Note: the user instruction is aimed at completing an existing email draft, displayed as the top email in the thread below.

K

Step 2 - Review Response

Step 3 - Flag Any Critical Issues

Step 4 - Verify Email Subject

Step 5 - Evaluate Main Content

Step 6 - Evaluate Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 4. Verify the quality of the E-mail Subject.

Instructions and Examples

1. Follow Topic + action Noun Format (Not Prepositional Phrases)

✓ Criteria	✅ PASS	❌ FAIL	Notes
Subject follows Topic + Nominalized Action pattern, avoiding prepositional phrase structures	"Meeting Cancellation" "Budget Approval" "Potluck Invitation" "Invoice Status", "Launch Timeline"	"Invitation to Potluck" "Request for Budget Approval" "Status of Invoice 1234" "Timeline for Product Launch"	Key Rules: - Action should be a noun (invitation, cancellation, approval) - Avoid phrases starting with prepositions (to, for, on, about, regarding, of) "Q3 Sales Report" is acceptable (Q3 is a modifier, not a prepositional phrase)

2. Uses Title Case

✓ Criteria	✅ PASS	❌ FAIL	Notes
Follows Chicago Manual Style - capitalize first and last words, plus all major words	"Team Outing Location" "Q3 Sales Report" "New Hire Orientation"	"Team outing location" "TEAM OUTING LOCATION" "team Outing Location"	Title Case Rules: - Capitalize: First/last words, nouns, verbs, adjectives, adverbs - Lowercase: Articles (a, an, the), conjunctions (and, or), short prepositions (in, on, to) unless first/last

Step 5 - Evaluate Main Content

Step 6 - Evaluate Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 4. Verify the quality of the E-mail Subject.

Instructions and Examples

5. Conveys Only ONE Main Idea

✓ Criteria	✔ PASS	✗ FAIL	Notes
Focuses on a single primary topic or action	• "Project Update", • "Expense Approval"	• "Project Update and Budget Review" • "Meeting Invite and Action Items" • "Project Update and Invitation for Questions"	Ask your self this question: Can you identify exactly ONE main purpose? If there's an "and" or multiple topics, it likely fails.

6. Neutral and Professional (No Hype/Subjective Language)

✓ Criteria	✔ PASS	✗ FAIL	Notes
Uses objective, business-appropriate language without marketing hype or subjective adjectives	• "Congratulations Dwight" • "Sunday Event Invitation" • "Join Us This Sunday" • "New Product Launch"	• Hype: "Congratulations, You're a Winner!", "Amazing Opportunity Inside!" • Subjective: "Join Us for an Exciting Event This Sunday!", "Incredible New Product Launch!"	Red Flag Words: Exciting, Amazing, Urgent, Important, Must-See, Incredible, Don't Miss, Winner, Special

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Overview

In this step, you will focus exclusively on the **main content** of the response. You will evaluate it against four specific quality dimensions. For each dimension, read the definition and examples carefully before selecting your rating.

Core Quality Dimensions

Dimension	Description
Instruction Adherence	Check if the response includes all key information from the prompt, uses the correct format (e.g., email, list, poem), and stays on topic.
Tone Appropriateness / Contextual Awareness	Check if the tone (e.g., formal, friendly, professional) matches the user's implied audience and purpose. For example, a message to a boss should sound different from a social media post.
Completeness	Check if the response incorporates all specific details (like names, dates, or numbers) that were provided in the user's prompt.
Length Appropriateness	Check if the response's length fits the requested format and purpose. It should be concise for a text message or title, but detailed enough for a summary or report.

Subject

Step 5 - Evaluate Main
Content

Step 6 - Evaluate
Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Individual Dimensions and Examples > Instruction Adherence >

Overview

This dimension measures whether the main content directly follows the user's explicit instructions. It assesses if the response delivers the correct topic, format, and key elements requested in the prompt.

Grading Question and Scales

- Question:** Does the output directly address what the user asked for?
- **Yes.** The output includes all key elements, uses the correct format, and is relevant to the instruction.
 - **No.** The output is missing key elements, uses the wrong format, or contains unrelated

Guideline Callouts

Format refers to the **structure and presentation style** of content (email, to-do list, research paper outline, bedtime story, etc.). When evaluating instruction adherence, check if the AI followed the requested format structure.

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Individual Dimensions and Examples > Instruction Adherence > Examples

	User Instruction	Response	Grade	Rationales
1	"Draft a two-sentence thank you note to my friend Alex for the birthday gift."	"Hi Alex, thank you so much for the thoughtful birthday gift! I really love it and appreciate you thinking of me."	 Yes	The response adheres to all instructions: it's a thank you note, it's addressed to Alex, it's about a birthday gift, and it is exactly two sentences long.
2	"Give me an outline for a presentation about the benefits of remote work."	"Remote work offers incredible flexibility, allowing employees to manage their own schedules. It also eliminates commuting time, which saves money and reduces stress. Many companies find that productivity increases when they trust their teams to work from home."	 No	The user asked for an outline (a specific format), but the AI provided a paragraph of text. This fails the format instruction.
3	"Write a 4-line poem about a cat watching the rain."	"Paws on the sill, a twitching ear, Raindrops race upon the glass. A world of wet, a world of gray, A cozy nap will help the time pass. The birds are all tucked safe away."	 No	The user specifically requested a "4-line poem." The response provides five lines, failing to adhere to a key element of the instruction.

Step 9 – Comparison

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Individual Dimensions and Examples > Tone Appropriateness / Contextual Awareness

Overview

This dimension assesses if the response uses a tone (e.g., formal, friendly, humorous) that is suitable for the implied audience and purpose.

Grading Question and Scales

Question: Is the tone suitable for the stated audience and context?

- **Yes.** The output uses a tone that is appropriate for the user's implied audience and purpose.
- **No.** The output is too formal/casual or has a mismatched emotional register.

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Individual Dimensions and Examples > Tone Appropriateness / Contextual Awareness

Examples

	User Instruction	Response	Grade	Rationales
1	"Write a professional email to my manager requesting a day off next Friday."	"Dear [Manager's Name], I am writing to formally request a day of paid time off on Friday, [Date]. I will ensure all my urgent tasks are completed before I leave. Thank you for your consideration."	✔ Yes	The tone is professional, respectful, and appropriate for communicating with a manager.
2	"Write a short, formal apology to a client for a delayed shipment."	"Hey there, so sorry about the shipment being late! Our bad. We're working on it and it should get to you soon. Hang tight!"	✗ No	The user requested a "formal apology," but the response is overly casual, using slang like "Hey there," "Our bad," and "Hang tight," which is inappropriate for the context.

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Individual Dimensions and Examples > Completeness

Overview

This dimension measures whether the response includes all critical information that was **provided in the user's prompt**. A complete response can be used as-is or with minimal edits, without the user needing to re-insert information they already gave.

Grading Question and Scales

Question: Can the user use this output as-is or with minimal edits, considering the user-provided context?

- **Yes (ready to use):** The output can be used as-is or with minimal edits because it includes all critical information from the prompt.
- **No:** The output is missing critical information that was provided in the prompt or has an incomplete structure.

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Individual Dimensions and Examples > Completeness > Examples

	User Instruction	Response	Grade	Rationales
1	"Write an email inviting my team to a project kickoff meeting in Conference Room B on Tuesday at 10am."	"Hi Team, I'd like to invite you all to our project kickoff meeting. Please join us in Conference Room B on Tuesday at 10am to discuss the project goals and timeline. Looking forward to it!"	✔ Yes (ready to use)	The response correctly incorporates all the details provided by the user (the event, location, day, and time), making it ready to send.
2	"Write an email inviting my team to a project kickoff meeting in Conference Room B on Tuesday at 10am."	"Hi Team, I'd like to invite you all to our project kickoff meeting. Please let me know what time works best for you to meet in Conference Room B. Looking forward to it!"	✗ No	The response fails to include the time ("10am") and day ("Tuesday") that were explicitly provided in the instruction, requiring the user to add this critical information back in.
3	"Create an event description for a charity bake sale. It's on Saturday, Dec 9th, from 9am to 3pm at the community hall. All proceeds go to the local animal shelter."	"Join us for our charity bake sale! We'll have delicious homemade treats for a great cause. The event will take place on Saturday, December 9th. All proceeds go to the local animal shelter."	✗ No	The response is structurally incomplete. It omits the time (9am-3pm) and the location (community hall), both of which were provided in the prompt. The user would have to make significant edits to add this essential information.

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Individual Dimensions and Examples > Length Appropriateness

Overview

The suggested reply should sound like something a real person would naturally say in this context, using authentic language and phrasing that is appropriate for the conversation's level of formality.

Grading Question and Scales

Question: Is the length suitable for the stated purpose?

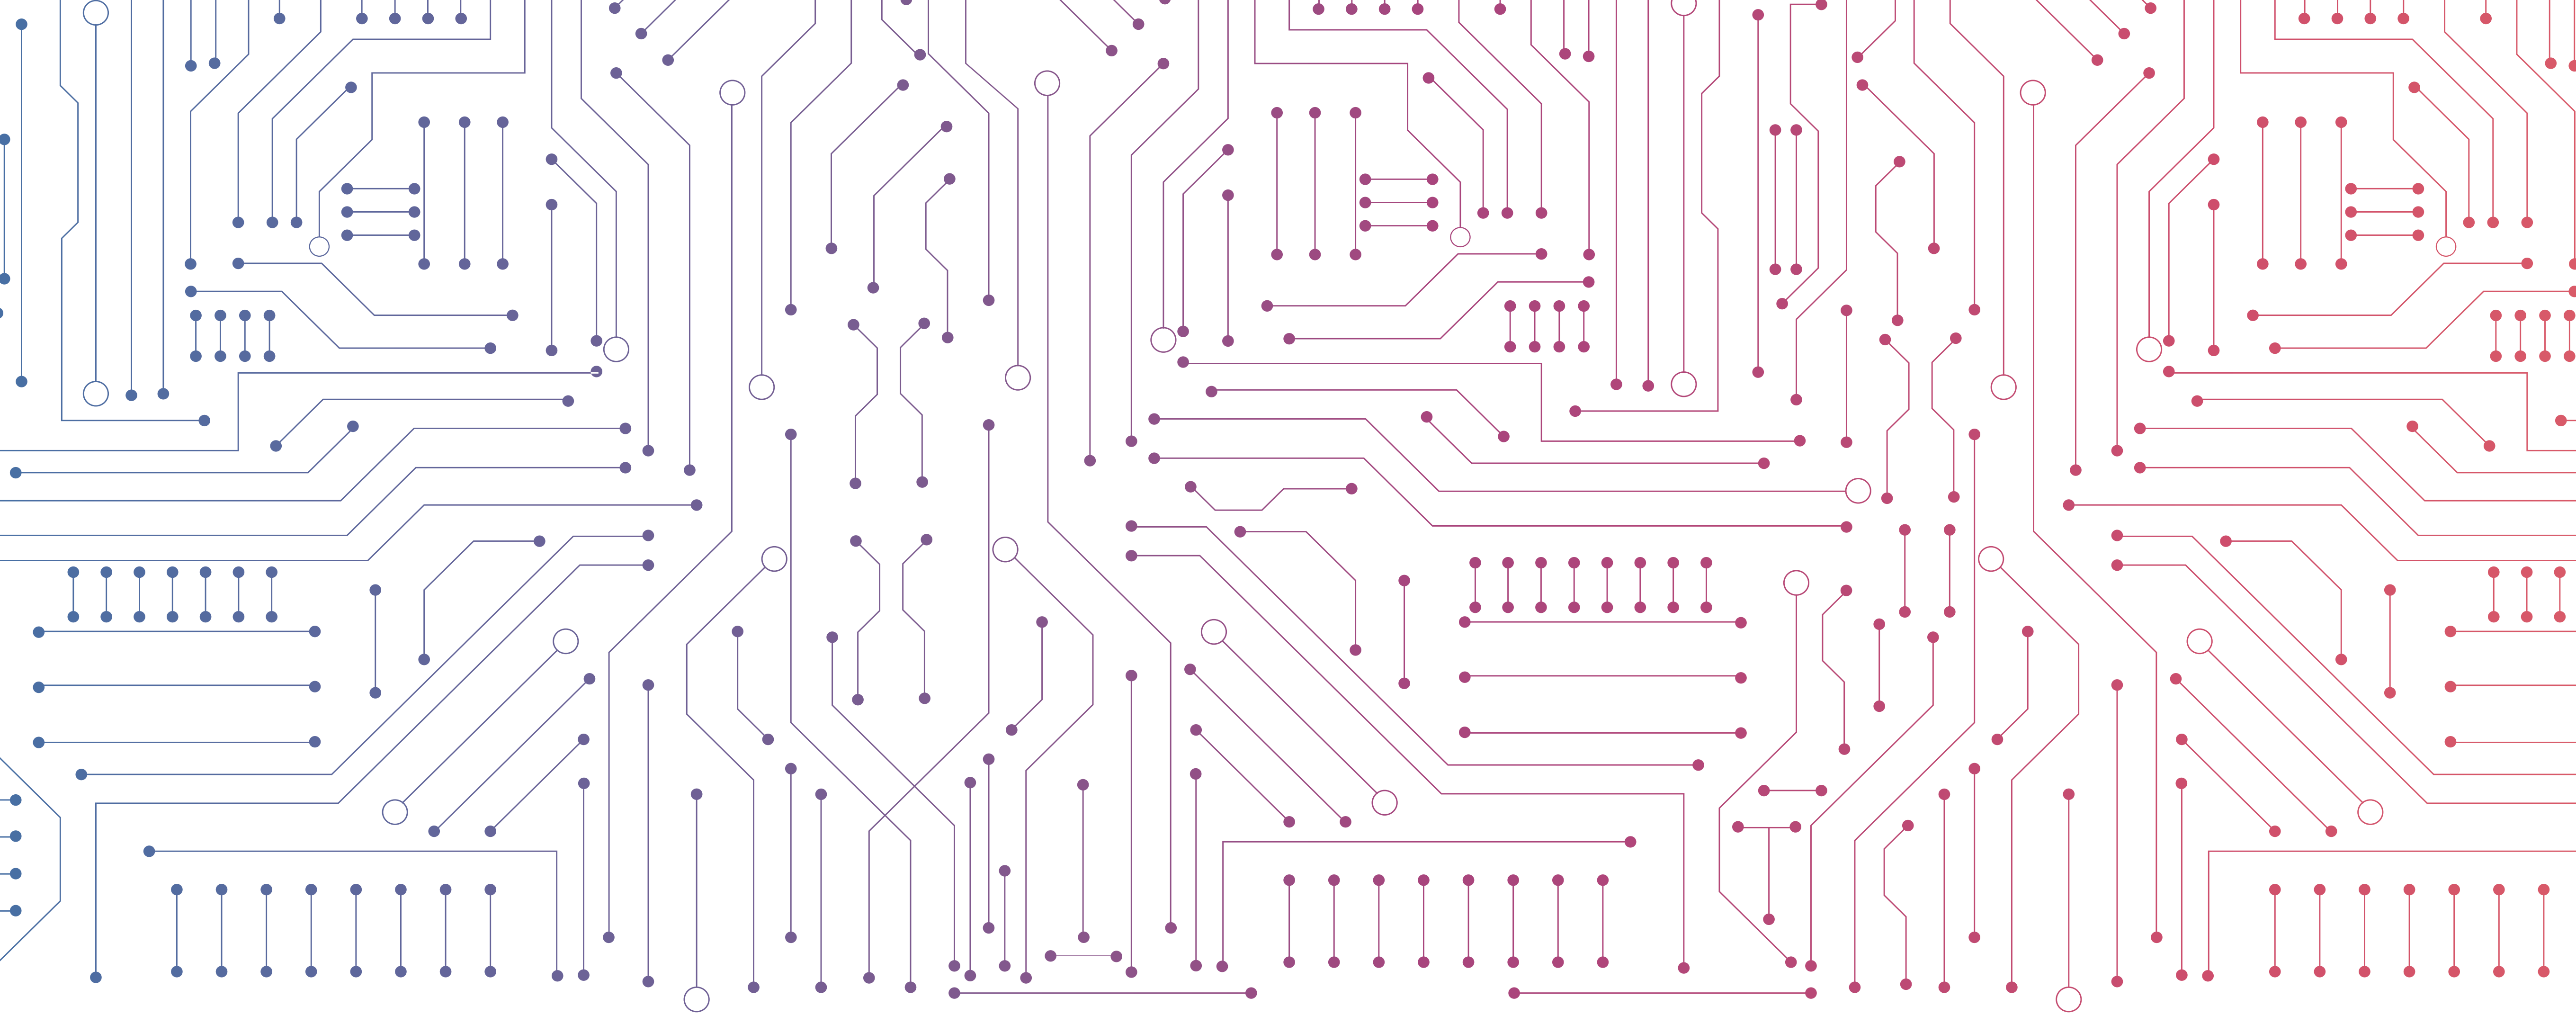

- **Yes:** The output's length is well-proportioned for the stated purpose and format.
- **No (too long/short):** The output is verbose when brevity is needed, or sparse when detail is expected.

Steps and Requirements

Step 5. Evaluate the core quality of the the main content based on the 4 dimensions.

Individual Dimensions and Examples > Length Appropriateness > Examples

	User Instruction	Response	Grade	Rationales
1	"Write a quick text to my friend to confirm we're still on for dinner tonight at 7."	"Hey! Just confirming we're still on for dinner tonight at 7?"	✔ Yes	The length is perfect for a text message—it's brief, direct, and serves its purpose perfectly.
2	"Write a title for my essay on the economic impact of the Industrial Revolution."	"An In-Depth Analysis of the Multifaceted and Transformative Economic Consequences Stemming from the Period Known as the Industrial Revolution in the 18th and 19th Centuries"	✗ No (too long)	The response is far too verbose and cumbersome for a title. A good title should be concise and impactful.
3	"Write a brief summary of my skills for a resume. I have 5 years of experience in project management, I'm an expert in Scrum, and I have a PMP certification."	"Project manager with PMP certification."	✗ No (too short)	While technically accurate, the response is too sparse. A "brief summary" should still encapsulate the key details provided. It omits the 5 years of experience and Scrum expertise, making it an unhelpfully brief summary that the user cannot use.

Step 8 – Holistic Rating

Step 9 – Comparison

Steps and Requirements

Step 6. Evaluate the utility of the **supplementary information** based on 1 dimension.

Overview

After evaluating the main content, your next step is to assess the helpfulness of any **supplementary information** the AI provided or suggested. This includes titles, subjects, suggestions (e.g., "add date"), or reference information from a web search.

This evaluation is separate from the core quality. The main content could be good while the suggestion or supplementary information is not so helpful, and vice versa.

Grading Question and Scales

Question: What is the collective utility of this set of suggestions as a whole?

- **Helpful:** Provided useful supplementary information
- **Neutral:** No supplementary info needed, or provided but not particularly useful
- **Missing:** Should have provided supplementary info but didn't

Step 9 - Comparison

Steps and Requirements

Step 6. Evaluate the utility of the **supplementary information** based on 1 dimension.

Examples

	User Instruction	Response	Grade	Rationales
1	Write an email to my book club about our next meeting."	Main Content: "Hi everyone, I'm writing to coordinate our next book club meeting..." Supplementary Info: • Book Title • Date and Time • Location	 Helpful	The user's prompt is vague. The AI correctly identifies the missing, essential details for a meeting announcement and provides actionable suggestions that help the user complete the task.
2	"Write a quick text to my sister: 'Hey, just landed safely in Chicago! Talk soon.'"	Main Content: "Hey, just landed safely in Chicago! Talk soon." Supplementary Info: (None provided)	 Neutral	The user's instruction is simple, complete, and requires no additional information. The AI correctly provided only the main content, as no supplementary information was needed. This is the correct behavior.
3	"Write a title for my essay on the history of ancient Rome."	Main Content: "The Rise and Fall of the Roman Empire" Supplementary Info: • Make it shorter • Make it more creative	 Neutral	The main content is a perfectly acceptable title. The suggestions provided are generic, subjective, and offer no concrete value to the user. Because the information isn't actively helpful, the rating is Neutral.
4	"Write an email to my book club about our next meeting."	Main Content: "Hi everyone, I'm writing to coordinate our next book club meeting. We will be discussing our book at the usual place. Please come prepared!" Supplementary Info: (None provided)	 Missing	The prompt is missing critical information (book title, date, time). A helpful response would have provided suggestions. Since no supplementary information was offered, the AI missed a key opportunity to assist the user.

Critical Issues

Step 4 - Verify Email
Subject

Step 5 - Evaluate Main
Content

Step 6 - Evaluate
Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 7. Evaluate the Localization of the entire output / response.

Overview

The response should feel like it was written by a native speaker in the target region. It adapts to local language, culture, and context.

A response fails the localization dimension if it feels "foreign," even if the grammar is technically correct.

Grading Question and Scales

Q. Does the response display content that is appropriate and relevant for your language and region?

- **Yes:** The response is fully appropriate for my language and region
- **No:** The response contains something inappropriate or irrelevant for my language and region
 - Awkward or clearly machine-translated phrasing
 - Incorrect mixed languages in the response
 - Wrong date format (e.g., MM/DD vs DD/MM), units of measurement, or number formatting
 - Wrong punctuation format for my language/region
 - Scrambled symbols (, □, ???, ?)
 - Content, examples, or references that don't fit my culture/region
 - Others. Please specify.

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 7. Evaluate the Localization of the entire output / response.

Instructions

- If **all** of the following are true, select Yes for the Localization question:
- Input text is in my language with no obviously incorrect or untranslated portions
 - Dates, numbers and units of measurement display in my local format
 - No garbled characters appear
 - All content, including cultural references, punctuations, and examples, make sense for my region

Step 9 - Comparison

Steps and Requirements

Step 7. Evaluate the Localization of the entire output / response.

Instructions

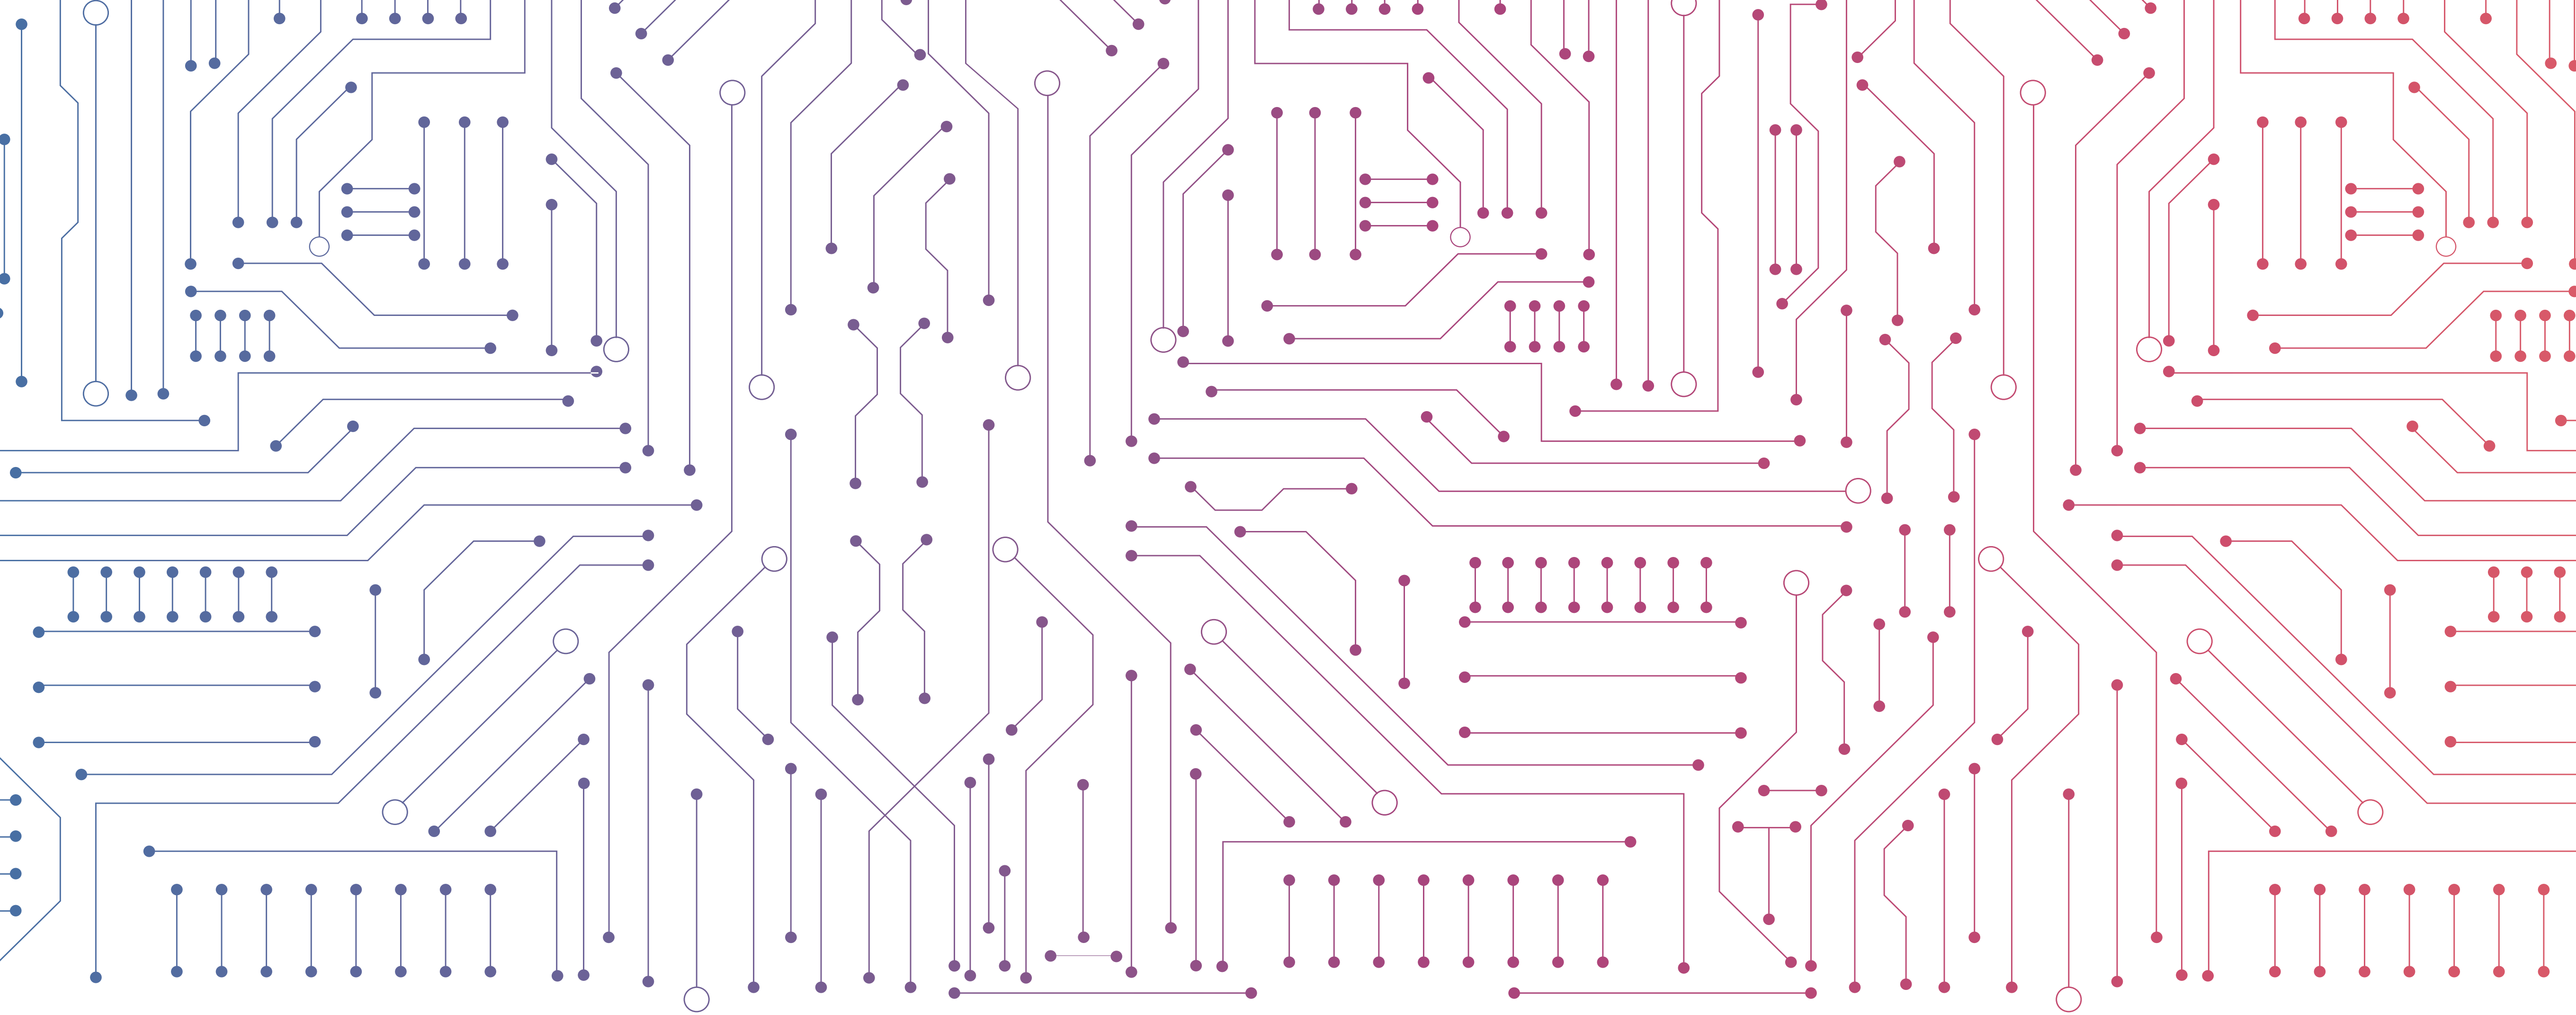

Guideline Callouts

1. Below scenarios are expected and NOT Localization issues:

- English proper names of companies, products, games, movies, etc **will appear frequently in other languages.**
- Some languages such as Hinglish use mixed languages.
- It’s possible that some scenarios use the base language structurally but include a small untranslated portion.
 - For example, “Send 你好嗎 to Ching Liu.”

2. Examples of wrong punctuation format

- ✗ Cómo estás? Qué sorpresa! **Vs** ✔ ¿Cómo estás? ¡Qué sorpresa!
- ✗ Il a dit "bonjour" en souriant. **Vs** ✔ Il a dit « bonjour » en souriant.
- ✗ Powiedział "to dobrze" i wyszedł. **Vs** ✔ Powiedział „to dobrze" i wyszedł.

Step 5 - Evaluate Main Content

Step 6 - Evaluate Supplementary Info

Step 7 - Localization

Step 8 - Holistic Rating

Step 9 - Comparison

Steps and Requirements

Step 8. Provide a holistic rating of the entire response.

Overview

The previous steps measured specific quality dimensions, but they cannot cover every possible aspect of a composition. This final rating is where your holistic judgment is most valuable.

You will see a **suggested overall quality** computed for you. However, your final decision can override the suggested rating.

Overall Quality

The system computed Overall Quality is: **poor**; you may adjust the rating according to your own insight.

How would you rate the overall quality of this composition?

- ☐ Excellent
Exceeds expectations. The response demonstrates exceptional quality that makes it stand out, such as notable creativity, insight, or helpfulness.
- ☐ Good
Meets expectations. The response is helpful, well-executed, and successfully accomplishes the user's goal.
- ☐ Fair
Meets some expectations but has noticeable flaws. The response is partially helpful but would require the user to make significant edits.
- ☐ Poor
Does not meet expectations. The response is unusable.

Steps and Requirements

Step 8. Provide a holistic rating of the entire response.

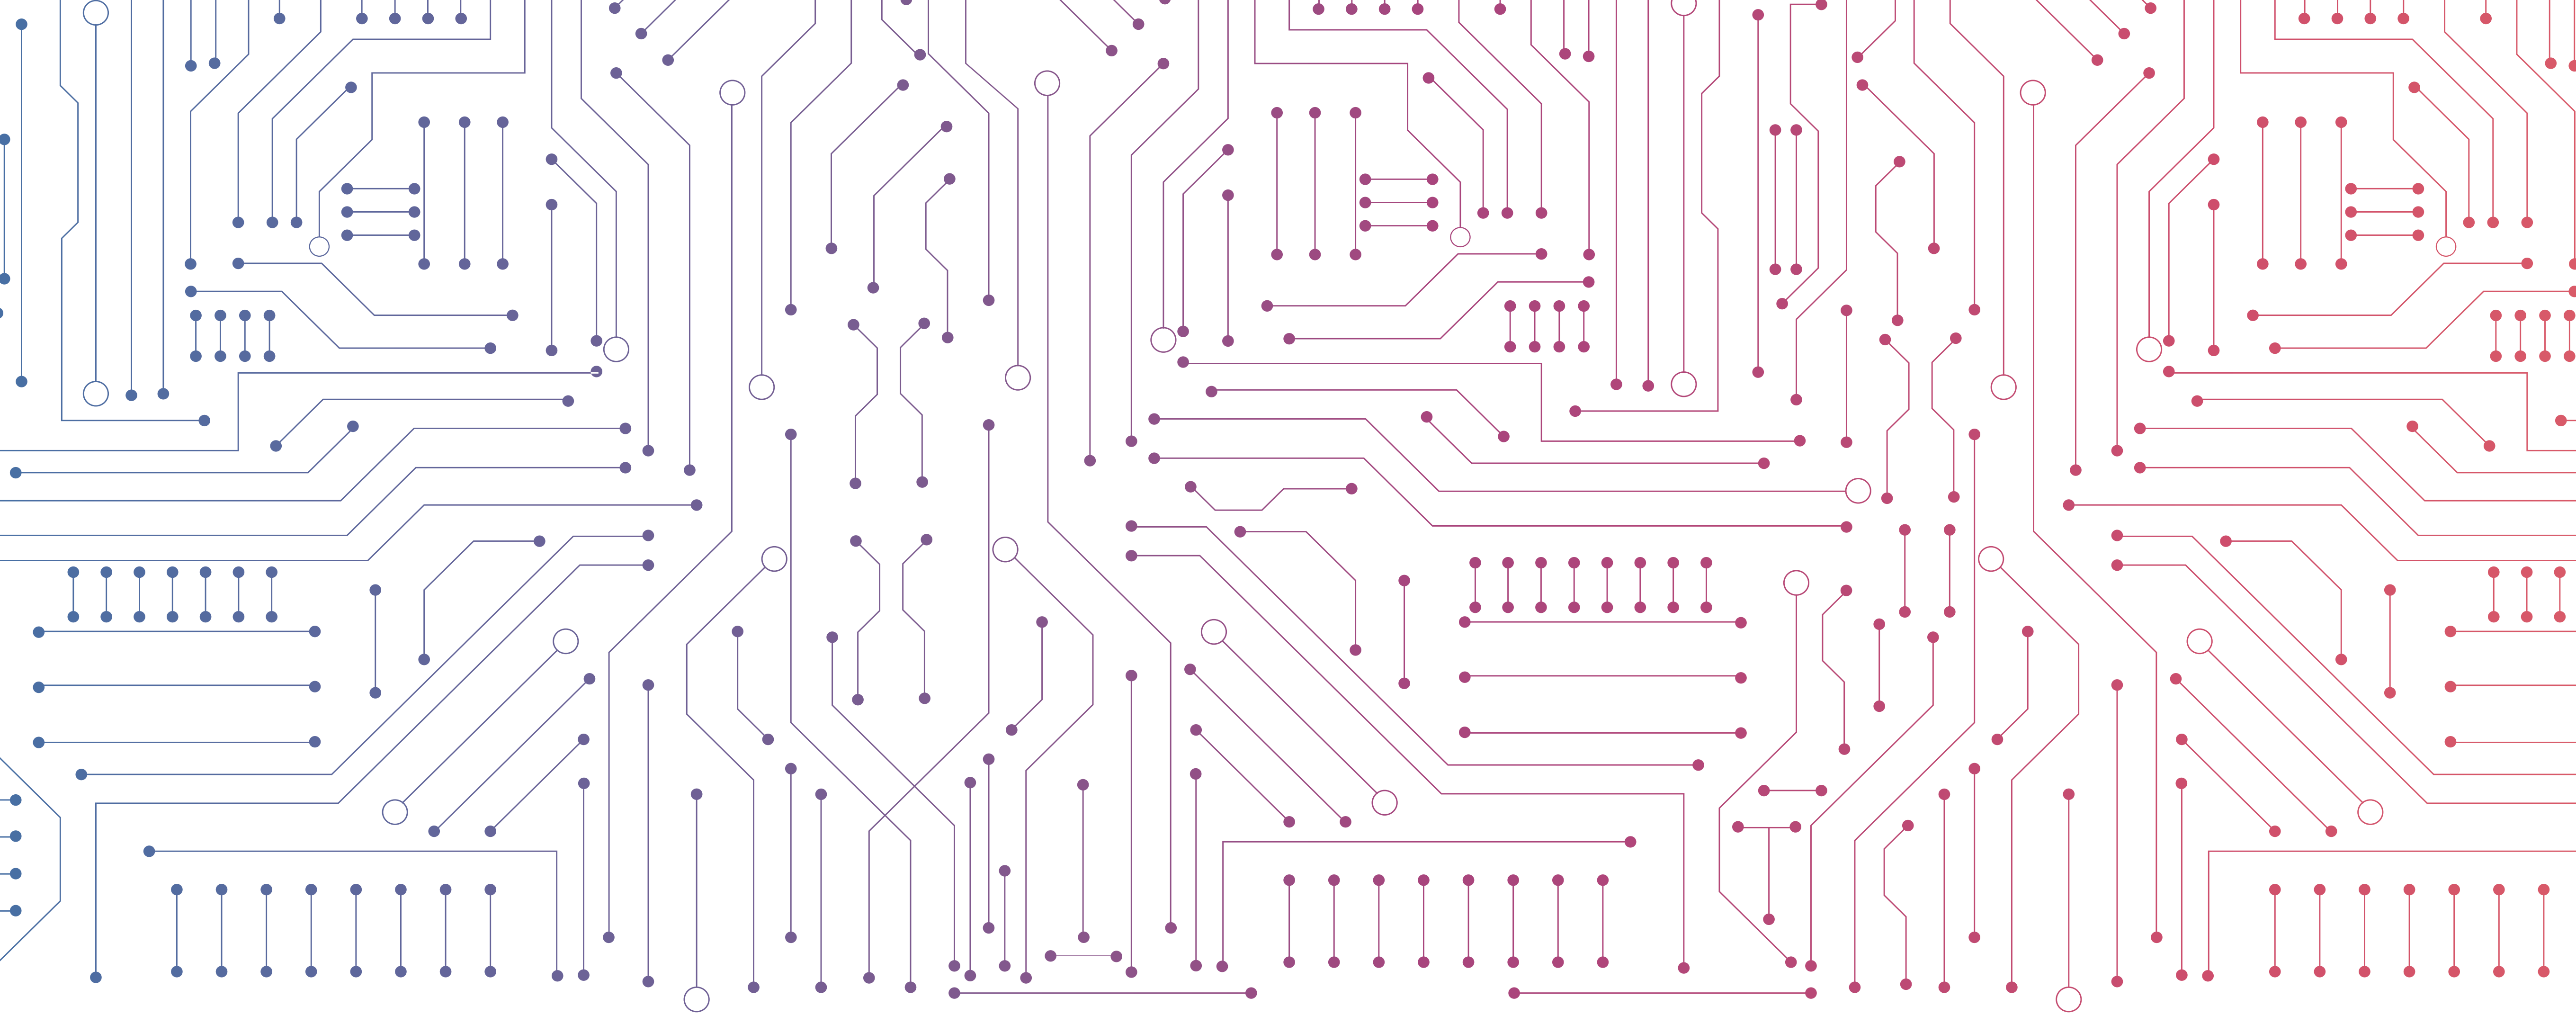

- 👉 Consider everything you've evaluated, plus any other qualities—like creativity, insightfulness, or actionability—that contribute to a successful response for the user's specific scenario.

Grading Question and Scales

Question: How would you rate the overall quality of this composition?

- **Excellent:** Exceeds expectations. The response demonstrates exceptional quality that makes it stand out, such as notable creativity, insight, or helpfulness.
- **Good:** Meets expectations. The response is helpful, well-executed, and successfully accomplishes the user's goal.
- **Fair:** Meets some expectations but has noticeable flaws. The response is partially helpful but would require the user to make significant edits.
- **Poor:** Does not meet expectations. The response is unusable.
